List of contributing authors — IX

Suparna Mukherji, Sharda Bharti, Gauri Shukla and Soumyo Mukherji
1 Synthesis and characterization of size- and shape-controlled silver nanoparticles — 1
1.1 Introduction — 2
1.2 Characterization of silver NPs — 3
1.2.1 UV-Vis spectroscopy — 4
1.2.2 Transmission electron microscopy — 5
1.2.3 Scanning electron microscopy and energy dispersive spectroscopy — 7
1.2.4 X-ray crystallography — 8
1.2.5 Fourier transform infra-red spectroscopy — 10
1.2.6 X-ray photoelectron spectroscopy — 10
1.2.7 Dynamic light scattering and zeta potential — 12
1.3 Synthesis of silver NPs — 13
1.3.1 Top-down approaches — 14
1.3.2 Bottom-up approaches — 21
1.3.3 Safety considerations — 97
1.4 Conclusions and future perspective — 100
Abbreviations — 101
References — 102
Bionotes — 115

Pei Zhang, Shudong Lin and Jiwen Hu
2 Synthesis and characterization of size-controlled silver nanowires — 117
2.1 Introduction — 118
2.2 Preparation methods — 119
2.2.1 Hard-template method — 119
2.2.2 Wet-chemistry method — 119
2.2.3 Factors influencing the polyol synthesis of AgNWs — 123
2.3 Characterization methodologies and instrumentation techniques — 132
2.3.1 Morphological investigations — 132
2.3.2 Optical and spectroscopic properties — 134
2.4 A broad category of examples and discussion — 135
2.4.1 Two-step method with a syringe pump — 136
2.4.2 Two-step method without syringe pump — 137

2.4.3 Cu-mediated method — 139
2.4.4 Fe-mediated method — 140
2.4.5 Stirring-control method — 141
2.4.6 Stirring-free $FeCl_3$-mediated method — 142
2.4.7 PVP-control method — 144
2.4.8 Rapid Cu-mediated method — 146
2.4.9 Bromide-mediated method — 147
2.4.10 Bromide-control method — 147
2.5 Critical Safety Considerations — 149
2.6 Conclusions and Future Perspective — 150
References — 151
Bionotes — 153

Jiawei Zhang, Huiqi Li, Zhiyuan Jiang and Zhaoxiong Xie
3 Size and Shape Controlled Synthesis of Pd Nanocrystals — 155
3.1 Introduction — 156
3.2 Preparation methods — 157
3.2.1 Synthetic approach for single-crystalline Pd nano-polyhedra with well-defined low-index facets — 158
3.2.2 Synthetic approach for single-crystalline Pd nano-polyhedra with well-defined high-index facets — 163
3.2.3 Synthetic approach for Pd NCs with CPT structure — 165
3.2.4 Synthetic approach for monodisperse spherical Pd nanoparticles (NPs) — 166
3.2.5 Synthetic approach for typical anisotropic Pd NCs — 168
3.3 Characterization methodologies and instrumentation techniques — 172
3.3.1 Routine characterization — 172
3.3.2 Identification of surface structures of NCs with different shapes — 174
3.3.3 Identification of CPT Pd decahedra and icosahedra — 177
3.4 General growth mechanisms of shape and sized-controlled Pd NCs — 178
3.4.1 Surface-regulating agent-mediated synthesis — 180
3.4.2 Seed-mediated synthesis — 182
3.4.3 Supersaturation-controlled methods — 183
3.4.4 Template-directed method — 185
3.4.5 Etching-mediated method — 186
3.4.6 Formation of CPT Pd NCs — 187
3.5 Critical safety considerations — 189

3.6 Conclusions and future perspective — **189**
References — **190**
Bionotes — **197**

Linlin Xu and Jun Yang
4 Size and shape-controlled synthesis of Ru nanocrystals — 199
4.1 Introduction — **200**
4.2 Preparation methods — **201**
4.2.1 Synthetic approaches for spherical Ru NCs — **202**
4.2.2 Synthetic approaches for one-dimensional (1D) Ru NCs — **226**
4.2.3 Synthetic approaches for two-dimensional (2D) Ru NCs — **227**
4.2.4 Synthetic approaches for Ru NCs with hollow interiors — **229**
4.2.5 Synthetic approaches for Ru NCs with other morphologies — **234**
4.3 Characterization Methodologies and Instrumentation Techniques — **241**
4.3.1 Spectral analysis — **241**
4.3.2 X-ray diffraction (XRD) — **244**
4.3.3 X-ray photoelectron spectroscopy (XPS) — **246**
4.3.4 Transmission electron microscopy — **249**
4.4 General growth mechanisms of size- and shape-controlled Ru nanocrystals — **252**
4.4.1 Stabilization of Ru NCs in polyol synthesis — **253**
4.4.2 Phase transfer-mediated synthesis of Ru NCs — **255**
4.4.3 Hollow Ru NCs from core-shell Ag@Ru nanostructures — **256**
4.4.4 Rambutan-like Ru NCs from Au seed-mediated growth — **258**
4.4.5 Ru nanodendrites formed by oleylamine reduction — **259**
4.4.6 Organometallic approaches for synthesizing Ru NCs — **260**
4.4.7 Stabilization of Ru NCs in ionic liquids — **261**
4.4.8 Growth mechanism for two-dimensional (2D) Ru NCs — **261**
4.5 Critical Safety Considerations — **261**
4.6 Conclusions and Future Perspective — **263**
References — **264**
Bionotes — **278**

5 Size-controlled atomically precise copper nanoclusters: Synthetic protocols, spectroscopic properties and applications — 279
5.1 Introduction — **280**
5.2 Methods of preparation — **284**
5.2.1 Top-down (NPs to NCs) approach — **284**
5.2.2 Bottom-up (atoms to NCs) approach — **284**

5.3 Characterization methodologies and instrumentations involved — 293
5.3.1 Steady-state spectroscopy — 293
5.3.2 Excited-state lifetime measurements — 295
5.3.3 Transmission electron microscopy — 295
5.3.4 Matrix-associated laser desorption ionization–time of flight — 297
5.4 Critical safety considerations — 298
5.5 Applications of the CuNCs — 298
5.5.1 Sensors — 298
5.5.2 Bio-imaging — 302
5.5.3 Nano-thermometry — 304
5.6 Conclusions and future perspective — 305
References — 305
Bionotes — 312
