Preface	xiii
Acknowledgement	xiv

Part 1

History and Theory

1	History of Local Anesthesia and Neural Therapy		2	
1.1	Introduction	2	1.2.1 Local Anesthesia	2
1.2	Anesthesia and the Treatment of Pain	2	1.2.2 Neural Therapy	3
2	Theoretical Foundations and Practice-Based Hypotheses		6	
2.1	Introduction	6	2.2.3 Sympathetic Afferent	9
2.2	Autonomic Nervous System	6	2.2.4 Parasympathetic Efferent	10
2.2.1	Anatomy and Function	6	2.2.5 Parasympathetic Afferent	11
2.2.2	Sympathetic Efferent	7	2.2.6 Afferent of the Phrenic Nerve	11
3	Interstitial Regulation System According to Pischinger and Heine		13	
3.1	Introduction	13	3.4 Interstitial Regulation System and Autonomic Nervous System	15
3.2	Structure and Function	13	3.5 Summary	16
3.3	Significance of Autonomic End Formation	15		
4	Ricker's Pathology of Relations		17	
4.1	Introduction	17	4.2.5 Properties of the Blood and its Components	19
4.2	Basics of the Experiments, Stimulus, and Stimulus Effects	17	4.2.6 Result of Pathological Sympathetic Nervous System Stimulation	20
4.2.1	Experiments with the Sympathetic Nervous System	18	4.2.7 Effect on Specific Tissues	20
4.2.2	Particulars of the Sympathetic Nervous System	18	4.3 Ricker's Three Stage Laws	21
4.2.3	Medication-Based Stimulus Disruption	19	4.4 Pathology of Relations and Neural Therapy	22
4.2.4	Reaction of the Vascular System	19		
5	Functional Aspects of the Autonomic Nervous System		23	
5.1	Introduction	23	5.3 Therapeutic Use of the Sympathetic Nervous System	24
5.2	Reaction and Function of the Sympathetic Nervous System	23		
6	Concept of the Segment in Neural Therapy		27	
6.1	Definition	27	6.2 Therapeutic Implications	27
7	Theory and Basic Principles of the Interference Field		29	
7.1	Introduction	29	7.3 Clinical Evidence of the Interference Field	32
7.1.1	Stimulus and the Sympathetic Nervous System	29	7.4 Interference Field and Segmental Disease	32
7.1.2	Causes of Chronic Irritation, Neuroplasticity	30	7.4.1 Fluid Transition	32
7.1.3	Stimulus Interruption—Turning Off the Interference Field	30	7.5 Case Histories and Interpretation	34
7.2	Pathogenesis of the Interference Field	31	7.6 Neurophysiological Criteria of the Interference Field	34
7.2.1	Temporal Relationships	31	7.7 Summary	35
7.2.2	Emergence of an Interference Field	31		
8	Local Anesthesia in Neural Therapy		36	
8.1	Introduction	36	8.2.3 The Effects of Procaine Reaction of the Blood Vessels	39
8.2	Local Anesthesia as a Neural Therapeutic Agent	36	8.3 Summary	42
8.2.1	Procaine for Neural Therapy	37		
8.2.2	Comparison of Procaine and Lidocaine	37		

Part 2

The Practice of Neural Therapy

9	Clinical Examination		44
9.1	Neural Therapeutic Medical History	44	44
9.2	Examination	46	47
9.2.1	Skin	46	48
9.2.2	Musculoskeletal System	46	49
9.2.3	Oral Cavity and Teeth	47	51
9.3	Palpation		51
9.4	Other Examination Options		67
9.5	Documentation		67
9.6	Structure of Neural Therapeutic Practice		68
9.7	Selecting the Neural Therapeutic Agent		70
10	Segments		71
10.1	Segment Diagnostics—Segmental Therapy	53	71
10.2	Lung Segment	56	73
10.2.1	Diagnostics	56	73
10.2.2	Therapy	58	73
10.2.3	Summary	58	73
10.3	Heart Segment	59	73
10.3.1	Diagnostics	59	73
10.3.2	Therapy	61	73
10.3.3	Summary	61	73
10.4	Hepatobiliary Segment	62	74
10.4.1	Diagnostics	62	74
10.4.2	Therapy	64	74
10.4.3	Summary	64	75
10.5	Stomach Segment	65	76
10.5.1	Diagnostics	65	76
10.5.2	Therapy		76
10.5.3	Summary		76
10.6	Pancreatic Segment		76
10.6.1	Diagnostics		76
10.6.2	Therapy		76
10.6.3	Summary		76
10.7	Intestinal Segment		76
10.7.1	Diagnostics		76
10.7.2	Therapy		76
10.7.3	Summary		76
10.8	Kidney Segment		76
10.8.1	Diagnostics		76
10.8.2	Therapy		76
10.8.3	Summary		76
11	Segment Diagnostics		77
11.1	Tabular Overview	77	77
12	Interference Field		81
12.1	Interference Field Diagnostics	81	81
12.2	Classification	81	82
12.3	Interference Field Therapy	82	82
12.4	Basic Principles		82
12.5	The Most Common Interference Fields		82
13	Maxillo dental Region		84
13.1	Example 1	84	84
13.2	Example 2	86	84
13.3	Example 3	88	84
13.4	Example 4	90	84
13.5	Example 5		92
13.6	Example 6		94
13.7	Summary		96
14	Neural Therapeutic Phenomena		98
14.1	Neural Therapeutic Phenomena and Types of Reactions	98	98
14.1.1	Segment Phenomenon	98	98
14.1.2	Reaction Phenomenon (According to Hopfer)	98	98
14.1.3	Retrograde Phenomenon (According to Hopfer)	98	98
14.1.4	Second Phenomenon (Huneke's Phenomenon)	99	99
14.1.5	Delayed Second Phenomenon	99	99
14.1.6	Incomplete Second Phenomenon		99
14.1.7	"Silent" Second Phenomenon		99
14.2	Tactical Approach		100
14.3	Side Effects		101
14.4	Failure of Neural Therapy		101
14.4.1	Causes		101
14.4.2	Further Diagnostic and Therapeutic Possibilities		101

Part 3

Injection Technique and Indications

15	General Information		104
15.1	Introduction	104	105
15.2	Positioning of the Patient	104	105
15.3	Disinfection	104	105
15.4	Injection Method		105
15.5	Briefing		105
15.6	Complications, Risks, and Errors		105

15.7	Dosage of the Local Anesthetic	106	15.8.3	Injection in Muscular Trigger Points and Muscle Insertions	107
15.8	Frequent Injections	106	15.8.4	Infiltration of Trigger Points	107
15.8.1	The Wheal	106	15.8.5	Infiltration of Scars	108
15.8.2	Infiltration of Geloses	107	15.8.6	The Intravenous Injection	109
16	Head	110	16.7.4	Complications	126
16.1	Injection under the Scalp	110	16.7.5	Material	126
16.1.1	Indications	110	16.8	Injection to the Pterygopalatine Ganglion, the Maxillary Nerve, and Maxillary Artery	128
16.1.2	Anatomy and Neurophysiology	110	16.8.1	Indications	128
16.1.3	Injection Technique	110	16.8.2	Anatomy and Neurophysiology	128
16.1.4	Material	110	16.8.3	Injection Technique	130
16.2	Injection to the Branches of the Trigeminal Nerve	112	16.8.4	Complications	130
16.2.1	Indications	112	16.8.5	Material	130
16.2.2	Anatomy and Neurophysiology	112	16.9	Injection to the Otic Ganglion and the Mandibular Nerve	132
16.2.3	Injection Technique	114	16.9.1	Indications	132
16.2.4	Complications	114	16.9.2	Anatomy and Neurophysiology	132
16.2.5	Material	114	16.9.3	Injection Technique (According to Hauberrisser)	134
16.3	Injection to the Mastoid	116	16.9.4	Material	134
16.3.1	Indications	116	16.10	Injection to the Major Occipital Nerve, Occipital Artery, and Minor Occipital Nerve	136
16.3.2	Anatomy and Neurophysiology	116	16.10.1	Indications	136
16.3.3	Injection Technique	116	16.10.2	Anatomy and Neurophysiology	136
16.3.4	Material	116	16.10.3	Injection Technique	136
16.4	Injection to the Facial Artery, Superficial Temporal Artery, and Auriculotemporal Nerve (from the Mandibular Nerve/Trigeminal Nerve)	118	16.10.4	Material	136
16.4.1	Indications	118	16.11	Injection into the Lymphatic Drainage Area of the Facial Skull	138
16.4.2	Anatomy and Neurophysiology	118	16.11.1	Indications	138
16.4.3	Injection Technique	118	16.11.2	Anatomy and Neurophysiology	138
16.4.4	Material	118	16.11.3	Injection Technique	138
16.5	Injection at and in the Parotid Gland	120	16.11.4	Material	138
16.5.1	Indications	120	16.12	Injection to the Tonsils	140
16.5.2	Anatomy and Neurophysiology	120	16.12.1	Indications	140
16.5.3	Injection Technique	120	16.12.2	Anatomy and Neurophysiology	140
16.5.4	Material	120	16.12.3	Injection Technique	142
16.6	Injection at the Jaw Joint	122	16.12.4	Material	142
16.6.1	Indications	122	16.13	Injection to the Teeth	144
16.6.2	Anatomy and Neurophysiology	122	16.13.1	Indications	144
16.6.3	Injection Technique	122	16.13.2	Anatomy and Neurophysiology	144
16.6.4	Material	122	16.13.3	Injection Technique	146
16.7	Injection to the Ciliary Ganglion (Retrobulbar Injection)	124	16.13.4	Material	148
16.7.1	Indications	124			
16.7.2	Anatomy and Neurophysiology	124			
16.7.3	Injection Technique	126			
17	Neck	150	17.3	Injection to the Stellate Ganglion (Cervical Thoracic Ganglion)	154
17.1	Injection in the Thyroid Gland	150	17.3.1	Indications	154
17.1.1	Indications	150	17.3.2	Anatomy and Neurophysiology	155
17.1.2	Anatomy and Neurophysiology	150	17.3.3	Injection Technique	156
17.1.3	Injection Technique	150	17.3.4	Material	160
17.1.4	Material	150	17.4	Injection to the Superior Cervical Ganglion	160
17.2	Injection to the Superior Laryngeal Nerve	152	17.4.1	Indications	160
17.2.1	Indications	152	17.4.2	Anatomy and Neurophysiology	161
17.2.2	Anatomy and Neurophysiology	152	17.4.3	Injection Technique	162
17.2.3	Injection Technique	152			
17.2.4	Material	152			

Contents

17.4.4	Material	162	17.5.1	Indications	166
17.5	Injection to the Accessory Nerve, Great Auricular Nerve, Transverse Cervical Nerve, and Lesser Occipital Nerve (Punctum Nervosum)	166	17.5.2	Anatomy and Neurophysiology	166
			17.5.3	Injection Technique	166
			17.5.4	Material	166
18	Spine	168			
18.1	Information on Diagnostics	168	18.6.2	Injection to the Spinal Roots L1–L4 (Lumbar Plexus)	184
18.2	Information on Therapy	169	18.6.3	Material	186
18.3	Injection to the Cervical Spine	170	18.6.4	Injection to the Spinal Roots L5–S3 (Sacral Plexus)	188
18.3.1	Indications	170	18.7	Injections in the Pelvic Region	192
18.3.2	Anatomy and Neurophysiology	170	18.7.1	Indications	192
18.3.3	Injection Technique	172	18.7.2	Anatomy and Neurophysiology	192
18.3.4	Material	172	18.7.3	Injection Technique	194
18.4	Injection to the Thoracic Spine	174	18.7.4	Material	194
18.4.1	Indications	174	18.8	Injection to the Lumbar Sympathetic Trunk	196
18.4.2	Anatomy and Neurophysiology	174	18.8.1	Indications	196
18.4.3	Injection Technique	176	18.8.2	Anatomy and Neurophysiology	196
18.4.4	Material	176	18.8.3	Injection Technique	196
18.5	Injection to the Lumbar Spine	178	18.8.4	Material	196
18.5.1	Indications	178	18.9	Injection in the Sacral and Lumbar Epidural Space	198
18.5.2	Anatomy and Neurophysiology	178	18.9.1	Indications	198
18.5.3	Injection Technique	180	18.9.2	Anatomy and Neurophysiology	198
18.5.4	Material	180	18.9.3	Injection Technique	201
18.6	Injection to the Spinal Roots L1–S3 (Lumbosacral Plexus)	182	18.9.4	Material	202
18.6.1	Introduction	182			
19	Abdomen, Retroperitoneum	204			
19.1	Injection to the Renal Hilum and the Renal Plexus	204	19.3.1	Indications	212
19.1.1	Indications	204	19.3.2	Anatomy and Neurophysiology	212
19.1.2	Anatomy and Neurophysiology	204	19.3.3	Injection Technique	214
19.1.3	Injection Technique	204	19.3.4	Complications	214
19.1.4	Material	204	19.3.5	Material	214
19.2	Injection to the Celiac Ganglion and the Major and Minor Splanchnic Nerves	206	19.4	Injection to the Branches of the Prostatic Plexus, in the Prostate	216
19.2.1	Indications	206	19.4.1	Indications	216
19.2.2	Anatomy and Neurophysiology	206	19.4.2	Anatomy and Neurophysiology	216
19.2.3	Injection Technique	206	19.4.3	Injection Technique	216
19.2.4	Material	210	19.4.4	Complications	216
19.3	Injection to the Branches of the Inferior Hypogastric Plexus (Pelvic Plexus)	212	19.4.5	Material	216
20	Joints	218			
20.1	Injection to the Shoulder Joint and Shoulder Girdle	218	20.3.2	Anatomy and Neurophysiology	224
20.1.1	Indications	218	20.3.3	Injection Technique	224
20.1.2	Anatomy and Neurophysiology	218	20.3.4	Material	226
20.1.3	Injection Technique	218	20.4	Injection to the Hip Joint	228
20.1.4	Material	220	20.4.1	Indications	228
20.2	Injection to the Elbow Joint	222	20.4.2	Anatomy and Neurophysiology	228
20.2.1	Indications	222	20.4.3	Injection Technique	228
20.2.2	Anatomy and Neurophysiology	222	20.4.4	Material	230
20.2.3	Injection Technique	222	20.5	Injection to the Knee Joint	232
20.2.4	Material	223	20.5.1	Indications	232
20.3	Injection to the Wrist and to the Finger Joints	224	20.5.2	Anatomy and Neurophysiology	232
20.3.1	Indications	224	20.5.3	Injection Technique	232
			20.5.4	Material	234

20.6	Injection to the Upper and Lower Ankle Joints, the Tarsal/Metatarsal Joints, and the Toe Joints	236	20.6.2	Anatomy and Neurophysiology	236
20.6.1	Indications	236	20.6.3	Injection Technique	236
			20.6.4	Material	238

Part 4

Indications and Therapy

21	Indications and Therapy	242			
21.1	Introduction	242			
22	Head	244	22.5	Disorders of the Nose and Paranasal Sinuses	251
22.1	Headache	244	22.5.1	Diagnoses	251
22.1.1	Diagnoses	244	22.5.2	Therapy	251
22.1.2	Therapy	244	22.6	Disorders of the Ear and Vestibular Organ	252
22.2	Neuralgias	246	22.6.1	Diagnoses	252
22.2.1	Diagnoses	246	22.6.2	Therapy	252
22.2.2	Therapy	247	22.7	Disorders of the Mouth and Throat	253
22.3	Illnesses and Injuries of the Brain	249	22.7.1	Tonsils and Pharynx	253
22.3.1	Diagnoses	249	22.7.2	Salivary Glands, Oral, and Pharyngeal Mucosa	254
22.3.2	Therapy	249	22.7.3	Teeth, Periodontal Apparatus, and Gums	255
22.4	Eye Disorders	250			
22.4.1	Diagnoses	250			
22.4.2	Therapy	250			
23	Neck	256	23.2	Disorders and Dysfunctions of the Larynx	257
23.1	Disorders and Dysfunctions of the Thyroid	256	23.2.1	Diagnoses	257
23.1.1	Diagnoses	256	23.2.2	Therapy	257
23.1.2	Therapy	256			
24	Thorax	258	24.2.1	Diagnoses	259
24.1	Disorders of the Bronchia and Lungs	258	24.2.2	Therapy	259
24.1.1	Diagnoses	258	24.3	Mammary Gland Disorders	260
24.1.2	Therapy	258	24.3.1	Diagnoses	260
24.2	Disorders of the Heart and the Mediastinal Space	259	24.3.2	Therapy	260
25	Abdomen, Small Pelvis, and Retroperitoneum	261	25.4.2	Therapy	263
25.1	Stomach Disorders	261	25.5	Disorders of the Kidneys and Efferent Urinary Tracts	264
25.1.1	Diagnoses	261	25.5.1	Diagnoses	264
25.1.2	Therapy	261	25.5.2	Therapy	264
25.2	Disorders of the Small and Large Intestine	261	25.6	Disorders of the Female Internal Genitals	265
25.2.1	Diagnoses	261	25.6.1	Diagnoses	265
25.2.2	Therapy	262	25.6.2	Therapy	265
25.3	Disorders of the Liver and Bile Ducts	262	25.7	Disorders of the Male Internal and External Genitals	266
25.3.1	Diagnoses	262	25.7.1	Diagnoses	266
25.3.2	Therapy	263	25.7.2	Therapy	266
25.4	Disorders of the Pancreas	263			
25.4.1	Diagnoses	263			
26	Spine and Pelvis	267	26.1.1	Diagnoses	267
26.1	Degenerative and Inflammatory Diseases, Injuries	267	26.1.2	Therapy	267
27	Extremities and Joints	269	27.1.2	Therapy	269
27.1	Degenerative Disorders, Inflammations, and Injuries	269			
27.1.1	Diagnoses	269			

Contents

28	Nerves				272
28.1	Disorders of the Peripheral Nerves and Cranial Nerves	272	28.1.1	Diagnoses	272
			28.1.2	Therapy	272
29	Vessels				274
29.1	Disorders of the Arterial Vessels	274	29.2	Disorders of the Venous Vessels	274
29.1.1	Diagnoses	274	29.2.1	Diagnoses	274
29.1.2	Therapy	274	29.2.2	Therapy	274
30	Lymphatic System				276
30.1	Disorders of the Lymphatic Channels and Lymph Nodes	276	30.1.1	Diagnoses	276
			30.1.2	Therapy	276
31	Skin				277
31.1	Disorders and Injuries of the Skin and Its Appendages	277	31.1.1	Diagnoses	277
			31.1.2	Therapy	277
32	Tumors				279
32.1	Malignant Diseases	279			
33	Summary				280
