Contents

1 Perception of sound 1
1.1 Octave and third-octave band filters 7
1.2 Hearing levels 9
1.3 A-Weighting 10
1.4 Noise fluctuating over time 12
1.5 Summary 13
1.6 Further reading 13
1.7 Practice exercises 14

2 Fundamentals of wave propagation 17
2.1 Thermodynamics of sound fields in gases 18
2.2 One-dimensional sound fields 24
2.2.1 Basic equations 24
2.2.2 Progressive waves 29
2.2.3 Complex notation 34
2.2.4 Standing waves and resonance phenomena 34
2.3 Three-dimensional sound fields 38
2.4 Energy and power transport 40
2.5 Intensity measurements 44
2.5.1 Time domain 45
2.5.2 Frequency domain 45
2.5.3 Measurement error and limitations 49
2.5.4 Standards 53
2.6 Wave propagation in a moving medium 53
2.7 Raised waves 59
2.8 Summary 62
2.9 Further reading 63
2.10 Practice exercises 63

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3 Propagation and radiation of sound 67
3.1 Omnidirectional sound radiation of point sources 67
3.2 Omnidirectional sound radiation of line sources 68
3.3 Volume velocity sources 70
3.4 Sound field of two sources 72
3.5 Loudspeaker arrays 85
3.5.1 One-dimensional piston 87
3.5.2 Formation of main and side lobes 91
3.5.3 Electronic beam steering 96
3.5.4 Far-field conditions 100
3.6 Sound radiation from plane surfaces 103
3.6.1 Sound field on the axis of a circular piston 106
3.7 Summary 110
3.8 Further reading 111
3.9 Practice exercises 111

4 Structure-borne sound 117
4.1 Introduction 117
4.2 Bending waves in beams 120
4.3 Propagation of bending waves 124
4.4 Beam resonances 126
4.4.1 Supported beams 127
4.4.2 Bilaterally mounted beams 129
4.4.3 Bilaterally suspended beams 132
4.5 Bending waves in plates 133
4.5.1 Plate vibrations 136
4.6 Summary 140
4.7 Further reading 141
4.8 Practice exercises 141

5 Elastic isolation 143
5.1 Elastic bearings on rigid foundations 145
5.2 Designing elastic bearings 150
5.3 Influence of foundations with a compliance 153
5.3.1 Foundation impedance 153
5.3.2 The effect of foundation impedance 154
5.4 Determining the transfer path 161
5.5 Determining the loss factor 162
5.6 Dynamic mass 164
5.7 Conclusion 166
5.8 Summary 167
5.9 Further reading 167
5.10 Practice exercises 167

6 Sound absorbers 171
6.1 Sound propagation in the impedance tube 171
6.1.1 Tubes with rectangular cross sections 176
6.1.2 Tubes with circular cross sections 176
6.2 Measurements in the impedance tube 178
6.2.1 Mini-max procedure 180
6.3 Wall impedance 183
6.4 Theory of locally reacting absorbers 186
6.5 Specific absorbent structures 191
6.5.1 The 'infinitely thick' porous sheet 191
6.5.2 The porous sheet of finite thickness 194
6.5.3 The porous curtain 198
6.5.4 Resonance absorbers 201
6.6 Oblique sound incidence 208
6.7 Summary 211
6.8 Further reading 212
6.9 Practice exercises 213

7 Fundamentals of room acoustics 217
7.1 Diffuse sound field 221
7.1.1 Reverberation 224
7.1.2 Steady-state conditions 226
7.1.3 Measurement of the absorption coefficient in the reverberation room 231
7.2 Summary 232
7.3 Further reading 233
7.4 Practice exercises 233

8 Building acoustics 237
8.1 Measurement of airborne transmission loss 239
8.2 Airborne transmission loss of single-leaf partitions 241
8.3 Double-leaf partitions (flexible additional linings) 252
8.4 Impact sound reduction 259
8.4.1 Measuring impact sound levels 259
8.4.2 Improvements 260
8.5 Summary 263
8.6 Further reading 264
8.7 Practice exercises 265

9 Silencers 267
9.1 Changes in the cross-section of rigid ducts 268
9.1.1 Abrupt change in cross-section 268
9.1.2 Duct junctions 270
9.1.3 Expansion chambers 275
9.1.4 Chamber combinations 279

9.2 Lined ducts 284
9.2.1 Ducts with rigid walls 286
9.2.2 Ducts with soft boundaries 288
9.2.3 Silencers with arbitrary impedance boundaries 290
9.3 Summary 308
9.4 Further reading 308
9.5 Practice exercises 308

10 Noise barriers 311
10.1 Diffraction by a rigid screen 312
10.2 Approximation of insertion loss 329
10.3 The importance of height in noise barriers 332
10.4 Sound barriers 333
10.5 Absorbent noise barriers 335
10.6 Transmission through the barrier 338
10.7 Conclusion 339
10.8 Summary 339
10.9 Further reading 339
10.10 Practice exercises 340
10.11 Appendix: MATLAB program for Fresnel integrals 342

11 Electro-acoustic converters for airborne sound 345
11.1 Condenser microphones 347
11.2 Microphone directivity 355
11.3 Electrodynamic microphones 358
11.4 Electrodynamic loudspeakers 362
11.5 Acoustic antennae 365
11.5.1 Microphone arrays 367
11.5.2 Two-dimensional sensor arrangements 374
11.6 Summary 380
11.7 Further reading 380
11.8 Practice exercises 381

12 Fundamentals of Active Noise Control 383
12.1 The Influence of Replication Errors 387
12.1.1 Perpendicularly Interfering Waves 389
12.2 Reflection and Absorption 390
12.3 Active Stabilization of Self-Induced Vibrations 395
12.4 Summary 403
12.5 Further Reading 404
12.6 Practice Exercises 404

13 Aspects and Properties of Transmitters 407
13.1 Properties of Transmitters 408
13.1.1 Linearity 408
13.1.2 Time Invariance 409
13.2 Description using the Impulse Response 410
13.3 The Invariance Principle 414
13.4 Fourier Decomposition 415
13.4.1 Fourier Series 416
13.4.2 Fourier Transform 424
13.4.3 The Transmission Function and the Convolution Law .. 426
13.4.4 Symmetries 428
13.4.5 Impulse Responses and Hilbert Transformation 430
13.5 Fourier Acoustics: Wavelength Decomposition 432
13.5.1 Radiation from Planes 434
13.5.2 Emission of Bending Waves 436
13.5.3 Acoustic Holography 438
13.5.4 Three-dimensional Sound Fields 439
13.6 Summary 442
13.7 Further Reading 443
13.8 Practice Exercises 444

A Level Arithmetics 449
A.1 Decadic Logarithm 449
A.2 Level Inversion 450
A.3 Level Summation 451

B Complex Pointers 453
B.1 Introduction to Complex Pointer Arithmetics 453
B.2 Using Complex Pointers in Acoustics 455

C Solutions to the Practice Exercises 459
C.1 Practice Exercises Chapter 1 459
C.2 Practice Exercises Chapter 2 463
C.3 Practice Exercises Chapter 3 468
C.4 Practice Exercises Chapter 4 480
C.5 Practice Exercises Chapter 5 486
C.6 Practice Exercises Chapter 6 489
C.7 Practice Exercises Chapter 7 497
C.8 Practice Exercises Chapter 8 501
C.9 Practice Exercises Chapter 9 503
C.10 Practice Exercises Chapter 10 505
C.11 Practice Exercises Chapter 11 508
C.12 Practice Exercises Chapter 12 510
C.13 Practice Exercises Chapter 13 514
