### Chapter

|                                                                                       |    |
|---------------------------------------------------------------------------------------|----|
| 0. INTRODUCTION .....                                                                 | 01 |
| 0.1 Preface .....                                                                     | 01 |
| 0.2 Statement of the research problem .....                                           | 02 |
| 0.3 Research methods .....                                                            | 03 |
| 0.4 Areas of investigation.....                                                       | 05 |
| 0.5 Research structure .....                                                          | 06 |
| 0.6 Size and design of the sample .....                                               | 07 |
| 1.0 THE GENERAL CHARACTERISTICS OF THE STUDY AREA .....                               | 08 |
| 1.1 A note on the geography of the study area .....                                   | 08 |
| 1.2 <i>Deme</i> .....                                                                 | 10 |
| 1.3 Family and household.....                                                         | 15 |
| 1.4 Marriage and divorce.....                                                         | 19 |
| 1.5 Pedigree and genealogy.....                                                       | 20 |
| 1.6 Administration and settlement.....                                                | 23 |
| 1.7 Education facilities.....                                                         | 33 |
| 1.8 Health services .....                                                             | 35 |
| 1.9 Other infrastructures.....                                                        | 35 |
| 2 THE ECONOMY .....                                                                   | 36 |
| 2.1 Characteristics of the Manāṣīr peasantry.....                                     | 36 |
| 2.2 Rich and poor .....                                                               | 42 |
| 2.3 Agricultural infrastructure.....                                                  | 44 |
| 2.4 Main economic activities.....                                                     | 45 |
| 2.4.1 Crop production.....                                                            | 45 |
| 2.4.2 Animal husbandry .....                                                          | 47 |
| 2.4.3 Date trees.....                                                                 | 47 |
| 2.4.4 Off-farm activities .....                                                       | 49 |
| 2.5 Market .....                                                                      | 50 |
| 2.5.1 Market Place.....                                                               | 50 |
| 2.6 Expenditure and consumption of peasant households.....                            | 51 |
| 3 EVOLUTION AND ESSENCE OF THE LAND TENURE SYSTEM IN<br>RIVERAIN NORTHERN SUDAN ..... | 58 |
| 3.1.1 Land and land tenure in the Christian era (600- 1504).....                      | 58 |
| 3.1.2 Land tenure during Black Sultanate (1504-1821).....                             | 61 |

|        |                                                                                             |     |
|--------|---------------------------------------------------------------------------------------------|-----|
| 3.1.3  | Land charters during the era of the Sultanate.....                                          | 63  |
| 3.1.4  | Land tax during the Sultanate.....                                                          | 66  |
| 3.1.5  | Land tenure during the Turko-Egyptian era (1821-1884).....                                  | 67  |
| 3.1.6  | Land during the Mahdia era (1884-1896).....                                                 | 73  |
| 3.1.7  | Land tenure during the colonial era (1898-1956).....                                        | 78  |
| 3.1.8  | Land and the post-colonial Sudan .....                                                      | 82  |
| 3.1.9  | Current land legislation .....                                                              | 83  |
| 3.2    | Evolution of the land tenure system in the study area .....                                 | 85  |
| 3.2.1  | An old legend of a land deed.....                                                           | 87  |
| 3.2.2  | Manāṣīr land tenure during the Turko-Egyptian era (1821-1884) .....                         | 89  |
| 3.2.3  | Manāṣīr land tenure during Mahdia era (1884-1896) .....                                     | 90  |
| 3.2.4  | Manāṣīr land during the colonial time.....                                                  | 92  |
| 3.2.5  | Problems confronted the colonial land settlement (1905-1909) .....                          | 98  |
| 4      | LAND OWNERSHIP AND TENURE .....                                                             | 103 |
| 4.1    | Thinking the evolutionary theory of land right .....                                        | 103 |
| 4.2    | Definition of land .....                                                                    | 105 |
| 4.3    | General characteristic of registered lands .....                                            | 107 |
| 4.4    | Acquisition of ownership of land .....                                                      | 108 |
| 4.5    | Land ownership in Islam .....                                                               | 109 |
| 4.6    | Land ownership in the Manāṣīr area .....                                                    | 112 |
| 4.6.1  | Uplands.....                                                                                | 112 |
| 4.6.2  | Free hold registered waterwheel's upland.....                                               | 112 |
| 4.6.3  | Government lands.....                                                                       | 115 |
| 4.6.4  | Leasehold government uplands occupied<br>before April, 1970 ( <i>matara masajala</i> )..... | 115 |
| 4.6.5  | Leasehold Government land occupied after April 1970 ( <i>matara miri</i> ).....             | 116 |
| 4.6.6  | Riverside lands .....                                                                       | 116 |
| 4.6.7  | Reclaimed and unoccupied lands .....                                                        | 118 |
| 5      | LAND SCARCITY .....                                                                         | 121 |
| 5.1    | Concept of land scarcity .....                                                              | 121 |
| 5.2    | How is land scarce?.....                                                                    | 122 |
| 5.3    | Small land holding.....                                                                     | 125 |
| 5.4    | Ecological dimension .....                                                                  | 127 |
| 5.4.1  | Diversification of production .....                                                         | 127 |
| 5.4.2  | Intensification of land use .....                                                           | 127 |
| 5.4.3  | Land scarcity and adapted crop varieties.....                                               | 129 |
| 5.4.4  | Soil reclamation, rehabilitation and allotment .....                                        | 131 |
| 5.4.5  | A case study of land reclamation and allotment.....                                         | 132 |
| 5.4.6  | Sedimentation traps .....                                                                   | 137 |
| 5.4.7  | Manure application.....                                                                     | 138 |
| 5.4.8  | Energy use .....                                                                            | 138 |
| 5.4.9  | Appropriate technology .....                                                                | 140 |
| 5.4.10 | Land scarcity and irrigation.....                                                           | 142 |

|          |                                                                                                                      |     |
|----------|----------------------------------------------------------------------------------------------------------------------|-----|
| 5.4.11   | Land scarcity, sharecropping and co-cropping.....                                                                    | 148 |
| 5.5      | Migration and buffering of demographic pressure.....                                                                 | 151 |
| 5.5.1    | Characteristics of migration .....                                                                                   | 152 |
| 5.5.2    | Forms of migration.....                                                                                              | 156 |
| 5.6      | Land scarcity and off-farm activities.....                                                                           | 157 |
| 5.7      | Production dimension.....                                                                                            | 158 |
| 5.7.1    | Land holding and productivity: An inverse relationship.....                                                          | 158 |
| 5.7.2    | Laboring intensity.....                                                                                              | 160 |
| 5-7-3    | The annual calendar and work intensity.....                                                                          | 161 |
| 5.7.4    | Intensity of agricultural activities per crop.....                                                                   | 164 |
| 6        | LAND FRAGMENTATION .....                                                                                             | 167 |
| 6.1      | Counter land fragmentation modes, practices and experiences .....                                                    | 170 |
| 6.2      | Land fragmentation: Case studies .....                                                                               | 175 |
| 6.2.1    | A hamlet and plots of land .....                                                                                     | 175 |
| 6.2.2    | Fragmentation of a plot of land: the case of <i>al-Mitaira</i> .....                                                 | 177 |
| 6.3      | A household and land fragmentation.....                                                                              | 184 |
| 6.4      | Fragmentation of riverside lands.....                                                                                | 186 |
| 7        | LAND OWNERSHIP RHETORIC AND REALITY.....                                                                             | 191 |
| 7.1      | Land and legal pluralism .....                                                                                       | 191 |
| 7.2      | Customary law.....                                                                                                   | 196 |
