

Contents

Session 1A: Surface Meshing

Size Function Smoothing Using an Element Area Gradient <i>John Howlett, Alan Zundel</i>	1
Removing Self Intersections of a Triangular Mesh by Edge Swapping, Edge Hammering, and Face Lifting <i>Soji Yamakawa, Kenji Shimada</i>	13
Conformal Refinement of Unstructured Quadrilateral Meshes <i>Rao Garimella</i>	31
Guaranteed-Quality All-Quadrilateral Mesh Generation with Feature Preservation <i>Xinghua Liang, Mohamed S. Ebeida, Yongjie Zhang</i>	45

Session 1B: Hexahedral Meshing

Advances in Octree-Based All-Hexahedral Mesh Generation: Handling Sharp Features <i>Loïc Maréchal</i>	65
Conforming Hexahedral Mesh Generation via Geometric Capture Methods <i>Jason F. Shepherd</i>	85
Efficient Hexahedral Mesh Generation for Complex Geometries Using an Improved Set of Refinement Templates <i>Yasushi Ito, Alan M. Shih, Bharat K. Soni</i>	103

Embedding Features in a Cartesian Grid <i>Steven J. Owen, Jason F. Shepherd</i>	117
 Session 2A: Optimization	
Label-Invariant Mesh Quality Metrics <i>Patrick Knupp</i>	139
Perturbing Slivers in 3D Delaunay Meshes <i>Jane Tournois, Rahul Srinivasan, Pierre Alliez</i>	157
Mesh Smoothing Algorithms for Complex Geometric Domains <i>Hale Erten, Alper Üngör, Chunchun Zhao</i>	175
A Novel Method for Surface Mesh Smoothing: Applications in Biomedical Modeling <i>Jun Wang, Zeyun Yu</i>	195
Quality Improvement of Non-manifold Hexahedral Meshes for Critical Feature Determination of Microstructure Materials <i>Jin Qian, Yongjie Zhang, Wenyan Wang, Alexis C. Lewis, M.A. Siddiq Qidwai, Andrew B. Geltmacher</i>	211
 Session 2B: Geometry	
Automatic CAD Models Comparison and Re-meshing in the Context of Mechanical Design Optimization <i>Jean-Christophe Cuillière, Vincent François, Khaled Souaissa, Abdelmajid Benamara, Hedi BelHadjSalah</i>	231
Distance Solutions for Medial Axis Transform <i>Hao Xia, Paul G. Tucker</i>	247
Automatic Non-manifold Topology Recovery and Geometry Noise Removal <i>Aurélien Alleaume</i>	267
A New Procedure to Compute Imprints in Multi-sweeping Algorithms <i>Eloi Ruiz-Gironés, Xevi Roca, Josep Sarrate</i>	281
Defeaturing CAD Models Using a Geometry-Based Size Field and Facet-Based Reduction Operators <i>William Roshan Quadros, Steven J. Owen</i>	301

Session 3A: Parallel & Hybrid**Towards Exascale Parallel Delaunay Mesh Generation***Nikos Chrisochoides, Andrey Chernikov, Andriy Fedorov.**Andriy Kot, Leonidas Linardakis, Panagiotis Foteinos* 319**On the Use of Space Filling Curves for Parallel Anisotropic Mesh Adaptation***Frédéric Alauzet, Adrien Loseille* 337**Mesh Insertion of Hybrid Meshes***Mohamed S. Ebeida, Eric Mestreau, Yongjie Zhang, Saikat Dey* 359**Tensor-Guided Hex-Dominant Mesh Generation with Targeted All-Hex Regions***Ved Vyas, Kenji Shimada* 377**Session 3B: Applications****Using Parameterization and Springs to Determine Aneurysm Wall Thickness***Erick Johnson, Yongjie Zhang, Kenji Shimada* 397**Hybrid Mesh Generation for Reservoir Flow Simulation in CPG Grids***T. Mouton, C. Bennis, H. Borouchaki* 415**VECTIS Mesher – A 3D Cartesian Approach Employing Marching Cubes***Lukáš Plaček* 429**Shape Operator Metric for Surface Normal Approximation***Guillermo D. Canas, Steven J. Gortler* 447**Session 4: Tetrahedral Meshing****The Meccano Method for Automatic Tetrahedral Mesh Generation of Complex Genus-Zero Solids***J.M. Cascón, R. Montenegro, J.M. Escobar, E. Rodríguez,**G. Montero* 463**Collars and Intestines: Practical Conforming Delaunay Refinement***Alexander Rand, Noel Walkington* 481**An Analysis of Shewchuk's Delaunay Refinement Algorithm***Hang Si* 499

Hexagonal Delaunay Triangulation <i>Gerd Sußner, Günther Greiner</i>	519
Tetrahedral Mesh Improvement Using Multi-face Retriangulation <i>Marek Krzysztof Misztal, Jakob Andreas Bærentzen, François Anton, Kenny Erleben</i>	539
 Session 5: Adaptivity	
Automatic All Quadrilateral Mesh Adaption through Refinement and Coarsening <i>Bret D. Anderson, Steven E. Benzley, Steven J. Owen</i>	557
Optimal 3D Highly Anisotropic Mesh Adaptation Based on the Continuous Mesh Framework <i>Adrien Loseille, Frédéric Alauzet</i>	575
Anisotropic Mesh Adaptation for Solution of Finite Element Problems Using Hierarchical Edge-Based Error Estimates <i>Abdellatif Agouzal, Konstantin Lipnikov, Yuri Vassilevski</i>	595
On 3D Anisotropic Local Remeshing for Surface, Volume and Boundary Layers <i>Adrien Loseille, Rainald Löhner</i>	611
A Comparison of Gradient- and Hessian-Based Optimization Methods for Tetrahedral Mesh Quality Improvement <i>Shankar Prasad Sastry, Suzanne M. Shontz</i>	631
