

CONTENTS

PART 1: INVITED LECTURES

Vorticity Generation in a Non-Premixed Flame Sheet W. T. ASHURST	3
A Numerical Simulation of Shock Generated Ignition Using the Random Choice Method J. F. CLARKE and G. SINGH	22
A Numerical Study of Mixing Enhancement in Supersonic Reacting Flow Fields J. P. DRUMMOND and H. S. MUKUNDA	36
Calculation of Low Mach Number Reacting Flows H. A. DWYER	65
Numerical Simulations of Flames and Detonations K. KAILASANATH, E. S. ORAN and J. P. BORIS	82
Recent Developments in the Coherent Flamelet Description of Turbulent Combustion E. MAISTRET, N. DARABIHA, T. POINSOT, D. VEYNANTE, F. LACAS, S. CANDEL and E. ESPOSITO	98
Improvements of the KIVA - II Computer Program for Numerical Combustion P. J. O'ROURKE, A. A. AMSDEN, T. D. BUTLER and T. L. McKINLEY	118
Renormalization Concept of Turbulent Flame Speed G. I. SIVASHINSKY	131
Numerical Simulation of Ignition Processes J. WARNATZ	149

PART 2: CONTRIBUTED LECTURES

Numerical Simulation of Inert and Reactive Flows by the Finite Element Method	173
S. AITA, A. FORESTIER, J. F. LEVY, N. MONTMAYEUR, A. TABBAL and H. BUNG	
Numerical Computation of Bifurcation Phenomena and Pattern Formation in Combustion	187
A. BAYLISS, B. J. MATKOWSKY and M. MINKOFF	
An Explicit Runge-Kutta Method for Turbulent Reacting Flows Calculations	199
A. A. BORETTI	
Knock Prediction in Spark Ignition Engines	211
R. A. COX, R. G. MYHILL and W. P. SWEETENHAM	
A Local Extinction of the Thermo-Diffusive Premixed Flame at Low Lewis Number	223
B. DENET and P. HALDENWANG	
Computer Simulation of Detailed Processes Occurring at Near Extinction Conditions of Flame Spread over Solid Fuels	233
C. DI BLASI, S. CRESCITELLI and G. RUSSO	
Induction Period Generation of a Supersonic Flame	245
J. W. DOLD	
A Numerical Solution for Reacting and Non-Reacting Flow	257
D. ELKAIM, M. AGOUZOUL and R. CAMARERO	
On the Equations for Reactive Granular Flow	269
P. F. EMBID and M. R. BAER	
Implicit Schemes for Subsonic Combustion Problems	277
G. FERNANDEZ and H. GUILLARD	
Numerical Study of Curvature Effects on Flame Quenching	287
G. FERNANDEZ, B. LARROUTUROU and G. I. SIVASHINSKY	
Computation of Low Froude Number Turbulent Diffusion Flames	299
D. GARRETON, N. MECHITOUA and P. L. VIOLLET	
Mass Conservation and Singular Multicomponent Diffusion Algorithms	310
V. GIOVANGIGLI	

Upwind Methods for Flows with Non-Equilibrium Chemistry and Thermodynamics B. GROSSMAN and P. CINNELLA	323
Second-Moment Computation of Strongly-Swirling Reacting Flow in a Model Combustor S. HOGG and M. A. LESCHZINER	338
A Numerical Simulation of Pulsed Reacting Jets A. HOSANGADI, C. L. MERKLE and S. R. TURNS	353
Effect of Heat Release and Equivalence Ratio on the Inviscid Spatial Stability of a Supersonic Reacting Mixing Layer T.L. JACKSON and C. E. GROSCHE	362
Transition to Detonation: A Numerical Study A. KAPILA and V. ROYTBURD	374
Shock Induced Self-Ignition of a Reactive Gas Mixture in an L-shaped Duct J. J. KLÖCKER	383
A Numerical Study of Propagating Premixed Turbulent Flames F. LACAS, D. VEYNANTE and S. M. CANDEL	395
Modélisation de la Combustion dans un Moteur Diesel d'Automobile P. PINCHON	407
The Numerical Simulation of Shock Initiation in Solid Explosives with Gas Inclusions H. Q. QIN and D. B. SPALDING	417
Pressure Spot Formation in Unstable Detonation Waves C. SCHMIDT-LAINE, J. W. DOLD and J. BUCKMASTER	428
Review of Theory of Mixing and Reaction Within a Vortical Structure W. A. SIRIGNANO	440
The Structure and Extinction of Tubular Premixed Laminar Flames M. D. SMOOKE and V. GIOVANGIGLI	450
On the Nonlinear Galerkin Methods R. TEMAM	461
Riemann-Problem-Based Techniques for Computing Reactive Two-Phase Flows E. F. TORO	472
