

# CONTENTS

## PREFACE

### Numerical analysis of thin shell junctions

*Michel Bernadou* ..... 1

### A domain decomposition method for the eigenvalue problem in elastic multistructures

*Frédéric Bourquin* ..... 15

### Ellipticity of bending and membrane shell equations

*Philippe G. Ciarlet and Evariste Sanchez-Palencia* ..... 31

### Continuous up-dating of a shell geometry in a nonlinear analysis and applications to buckling simulation

*Iñigo Arregui, Philippe Destuynder and Michel Salaun* ..... 41

### A domain decomposition method for linear and nonlinear elasticity problems and its implementation on KSR1

*J.A. Alvarez-Dios, P. Le Tallec and M. Vidrascu* ..... 55

### Exact controllability, asymptotic methods and plates

*Isabel Figueiredo and Enrique Zuazua* ..... 69

### Error estimation for the linear three-dimensional elastic plate model

*Philippe Destuynder et Isabelle Gruais* ..... 75

### From three-dimensional elasticity to nonlinear membranes

*Hervé Le Dret and Annie Raoult* ..... 89

### Some more remarks on boundary value problems and junctions

*J.L. Lions* ..... 103

### A new formulation for arch structures. Application to optimization problems

*Veronique Lods* ..... 119
