

Index

A

AAFS Standards Board (ASB), xix, 61, 159, 174, 177, 309, 312
Abductive reasoning, 9, 17, 67, 143, 318
Absence of evidence is not evidence of absence case, 199–202
Accreditation, 255, 163, 175
Action information, 126
Albumin, 36, 55, 252, 253
Alcock, James, 143
Ambiguous trace configurations, 297
Amido black, 53, 122, 164, 239, 240, 267
Angle of Impact, 25, 87, 96, 99–101, 109, 149, 249
Animals and insects, 88–91
Arc or cast-off configurations, 69, 71, 164
Arterial configurations, spurting, 5, 63, 70, 71, 237, 238, 239, 297, 318
Aspirated, 73, 85, 127, 225, 226, 228
Associative evidence, xxi, 126, 175, 201, 277, 279
Automatic classification system, 62–63
Azimuth angle, 96–97

B

Back project, 101, 235, 297
Backspatter, 80, 81, 174, 243, 246, 247, 249
BackTrack Suite, 103
Bandwagon effect, 161
Belief engine, 143
Belt device, 104–105, 108–111
Benzidine, 52, 265
Beyerstein, Barry L., 158, 160–161, 174
Bias, 18, 76, 132, 140, 142, 155, 160–161, 198, 204, 221, 251, 253, 263, 316–317, 348
 cognitive biases, 140
 confirmation bias, 140
 congruence bias, 140
 contextual bias, 140, 142
 expectation bias, 140, 263
Blood substitute(s), 43, 292
Blood trace deposit formation, xxii, 24, 37, 111–116, 294
Blood traces on skin, 110, 196

Blowback, 80, 263–264, 270, 284–285, 289, 291–295, 297, 302
BlueStar, 53, 88
British Island Holiday Case, 194–199
Bryan, Joe, 158
BT (distance between source & stain), 62–63
Bullet trajectories, 250, 321
Bunker mentality, 161

C

Camm, David, xxiii, 139, 143, 147, 158, 163, 169, 241–251, 298
Capillary or capillaries, 36, 42, 78–80, 121, 154, 230, 285–286, 289–290, 292, 294–295
Catalytic tests, 52–53
 benzidine, 52, 265
 Kastle Meyer or phenolphthalin, 52, 211–212
 leuco-crystal violet, 52–53, 267
 leuco-malachite green, 52
 luminol, 52–53, 88, 122, 123, 147, 148, 236, 239
 ortho-toluidine, 52
Catherine Woods case, 55
Cell-serum separation, 253
Certifications and qualification standards, xix, 168, 176, 310, 322
Chemiluminescence, 52, 53, 88, 148
Chronological sequencing, 144
Claims of unusually high precision, 160
Classifying, xx, xxiii, 62, 124
Cleland, Carol E., 1–2, 17
Clot, clotted, clotting, 5, 24, 41–44, 55, 82–84, 173, 253, 293
CODIS, 56, 57
Cognitive biases, 140
Collaborative Testing Services (CTS), 176
Commingling of multiple blood traces, 16
Compositional analysis of bullet lead (CABL), 137–138
Compositionally indistinguishable volume of lead (CIVL), 137, 138
Concealed blood traces case, 264

Concepts of accuracy and precision, 150
 Confirmation bias, 140
 Congruence bias, 140
 Constant vigilance, 132, 163, 164
 Contact transfer(s), 63–68, 123, 126, 245, 263, 266, 267, 278, 298–302
 Contemporaneous notes, 18
 Contested fratricide case, 235–240
 Contextual bias, 140, 142
 Coomassie blue, 53
 Corrigan, William, 24, 180
 Crater (drop impacts), 115, 255
 Creeping inversion, 318
 Crime scene investigation, xxiv, 3, 6–16, 25, 119–121, 123, 130, 157, 167–169, 171, 176, 221, 257, 269, 274
Crime scene investigation stages, 6–16
 evidence documentation, 10–14
 evidence recognition, 8–10
 evidence recovery, packaging and transportation, 14–16
 scene protection and security, 6–8
 Critical thinking, 5, 161, 176
 Crossed polarizers, polarized light photography, 49, 51, 52, 148
 Cross sectional density, 96
 Crowning or “fingers,” 37, 89, 114, 146
 Crude age estimations, 152
 Cycling marks from magazine lips, 256

D

Daubert v. Merrell Dow Pharmaceuticals, Inc., 135–136, 307
 David Camm case, 139, 143, 147, 158, 163, 169, 242–251
 Deductive reasoning, 9
 Deficiency in scientific integrity, 139–140
 Dehydrogenase isozyme identification, 55
 Density, 29–31, 33, 40, 43, 44, 151, 173, 293
 Depression, 111, 113
 Dew point, 252
 Dew Theory case, 252–254
 Diffusion, 53, 147, 160, 252, 253, 299–301
 Diluted blood, diluted blood deposits, 5, 83, 85, 123, 125, 218, 266
 Directional information, 129
DNA, xvi, xxi, 50, 52–58, 126, 128, 130, 136, 149, 159, 192–195, 197, 199, 203, 204, 209, 211, 213, 215, 217, 218, 220, 236, 242, 243, 246, 259, 261, 292, 317
 rapid DNA technologies, 55–57
 Documentation, xxiii, 4, 6–8, 10–14, 19, 43–44, 48–49, 53, 63, 86, 88, 127, 131,

147, 179, 183, 191–194, 201, 202, 218, 220, 222, 238–239, 247, 249–251, 254, 291, 298, 321
 Doyle, Sir Arthur Conan, 21
 Drag, 63, 95, 101, 103–104, 149
 Drop collapse, 76, 111, 297
 Droplet trajectory or trajectories, 69, 95–99, 101, 103–104, 106, 112, 124, 139, 149, 224, 226, 228, 232, 297
 Dry-labbing, 139

E

Eco, Umburto, 9
 Education, xix, xxii, xxiii, 4, 19, 43, 131–132, 139, 150, 162, 169–173, 176–177, 251, 272, 305–312, 319–320, 322
 Effective angle of incidence, 105
 Effects caused by interaction of blood and surface, 144
 Elevation angle, 101–102
 Entrained, 73, 85
 Error rate, 63, 137, 177
 Ethylenediaminetetraacetic acid (EDTA), 42, 207, 214, 215, 218
 Evidence recognition, 4–6, 10, 14–15, 18, 316
 Exculpation, 158, 164
 Expectation bias, 140, 263
 Experience, xix, xxiii, 4, 17, 19, 26, 119, 126, 131–132, 168, 169, 170, 172–174, 176, 177, 239, 251, 261, 267, 271–272, 310, 322, 342
 Experimental design, 152–153, 169, 171, 253, 295

F

Fabric issues, 298–301
 False expectations, 148–149
 False positives or false-positive, 53, 88
 Falsifiability, 18, 135, 159
 The Farhan Nasser Case, 186–191
 Fibrinogen, 36, 41–44
 Flies, 88, 90–91
 Flow and flow configurations, rivulets, xxvi, xxiv, 24, 63, 79, 82–83, 120–122, 144, 196, 290–293
 Flow stability, 33–34
 Fluorescein, 122
 Folly of casting technicians as scientists, 169
 Footwear outsole pattern(s), xx, 7, 13, 14, 49, 64, 121, 126–129, 144, 201, 207–208, 214, 220, 274–279
 Fourier transform infrared spectroscopy (FTIR), 281
 Framing effect, xv, 179–184

G

Generalist, 19, 139, 157, 168, 204, 222, 261, 262, 278, 279, 281
 Geometric configurations, xx, 63, 183
 Geometric interpretation, 26, 56
 Gravity, 95, 103–106
 Gross, Hans, xx, xxii, 22
 Gunshot to the forehead and the runaway car case, 270–273

H

Hairs in the recoil spring, 259
 Height of fall estimations, 151
 Hemaocrit, 36, 40, 44
 Heme, 52
Hemoglobin, 55–56, 253, 290
 to albumin ratio, 55, 253
 Hemostasis, 41
 Hierarchical structure or taxonomy, 62, 63
 Holistic approach or philosophy, xxi, 19, 152, 154, 177, 222, 269, 271, 320–321
 Holmes, Sherlock, 21
 Horizontal velocity, horizontal component of velocity, 95, 104–105
 Hungarian red, 53
 Hydrophobicity, 143, 146, 147
 Hyperspectral imaging, 55, 56
 Hypochlorite bleach, 53
 Hypothesis development, 17–18, 136, 143, 169
 Hypothesis testing, xix, 9, 17, 140, 316

I

Imagined Mist Pattern case, 262
 Impact crater from bullet impacts, 255, 258, 261
 Impact mechanism, 110–113
 Impact plane, 97, 122, 125
 Impenetrability, 161
 Inclined surfaces, 37, 98, 104, 116
 Incompetence, 159, 163, 173, 241, 242, 246
 Inculpation, 164
 Inductive reasoning, 9, 67
 Infrared (IR) absorption, 48
 Infrared (IR) hyperspectral imaging, 56
 Infrared (IR) luminescence or fluorescence, 48
 Infrared (IR) photography, 48, 58, 148
 Initial wounding, xxiv, 120–122, 140, 264
 Insect, 29, 88–91
 Insect traces, 88–91
 In-service training (IST), 172
 Interference filters, 48
 Investigator inexperience, 132
 Involution, 111

Isolation of a laboratory, crime scene unit, 159

J

Joe Bryan case, 158

K

Kastle Meyer (phenolphthalin), 52, 211–212
 Kirk, Paul L., xvii, xxi, 21–25, 86, 108, 128, 129
 Knife in the gift bag case, 185–186

L

Lack of formal training, 161
 Lack of replicability, 159–160, 254
 Lack of teamwork, 130–131
 Laser scanning technology, 249–251
 Leuco-crystal violet, 52–53, 267
 Leuco-malachite green, 52
 Light emitting diode (LED), 48
 Limitations of laboratory SOPs, 54
 Limitations, problems, & common acceptance of the status quo, 130
 Luminol, 52–53, 88, 122, 123, 147, 148, 236, 239

M

MacDonell, Herbert, xxii, 25, 26, 38, 61, 101, 110, 129, 172, 184, 252–254, 295–296
 Machine learning, 62, 63
 Maggots, 88, 91
 Malfunction of semi-automatic pistol, 255, 257, 260–261
 Measurement uncertainty and significant figures, 150
 Mechanism(s) of production, xxiii, 5, 37, 38, 39, 52, 54, 62, 69
 Menstrual blood, 55
 Menstruum identification, 55
 Mentoring, 132, 170, 172, 174, 322
Misconceptions, 73–77, 86, 103, 114–115, 148, 170–173, 200–201, 283–302
 ambiguous trace configurations, 297–302
 asymmetrical blood projections from impacts, 302
 absence of physical evidence interpretation, 200–201
 blood traces produced by gunshot wounds, 283–295
 claimed equivalence of deposit and drop diameters, 296–297
 claims regarding the Balthazard et al. paper, 296
 droplet trajectories, 103
 education v. training, 170–173

Misconceptions (*cont'd*)

- false expectation of airborne droplets from the first wounding, 148
- The “Normal Drop” claim, 295–296
- secondary spatter, 73–77, 86, 114–115
- Misuse of data, 159, 160, 253
- Misuse of scientific method, 132
- Misuse of simulants, 153
- Molecular vibrations, 56
- Monochromators, 48
- Montage of synthesized sequence of drop impacting sessile drop, 37, 115
- Multi-disciplinary practitioner, 158
- Murder of a deputy: shooting in a hospital room case, 279–281
- Murder of an off-duty police officer case, 254–262
- Muzzle imprint, 257, 261

N

- Nassau County Police Laboratory (Forensic Evidence Bureau or “FEB”), 159
- Nasser, Farhan, 186–191
- National Institute of Forensic Science of Australia & New Zealand, 158
- Neglect of scientific principles, 132
- Newtonian fluid(s), 31, 32, 36, 44
- Newtonian relativity & relativistic motion, 104, 107, 109
- NIST OSAC, 307–308
- Noncontact transfers, 5, 69
- Non-Newtonian fluid, 31, 32

O

- Oblique illumination, 48, 144, 148, 216
- Obscured bloody imprint case, 273–279
- Observer-expectancy effect, 140
- O.J. Simpson case, 15, 128, 205–223
- On-site crime scene proficiency test, 176
- Opinion of a scientist vs. scientific opinion, 139
- Ortho-toluidine, 52
- OSAC(s), xix–xx, 26, 61–62, 176, 306–308, 317
- Over-interpretation, 125, 136–139, 143
- Overlapping blood trace, 144

P

- Parabolic trajectories, 98–99, 103, 149
- Pareidolia, 142–143, 180, 201, 299
- Park, Robert, 142
- Passive documentation, 7, 8, 14, 127
- Passive documentation case, 191–194

- Pattern directed sampling, 130
- Peer or technical review, 142, 163, 174–175, 310–312
- Peirce, Charles S., 9, 17
- People of NY v. Castro, 163
- Pernicious consequences, xxii, 22, 158, 172, 241–242, 251, 254, 319
- Phenolphthalin, 52, 211–212
- Photography**, 7, 10–13, 23, 37, 48–52, 53, 58, 78, 79, 105, 114, 148, 176, 192, 218, 239, 248, 250, 251, 275, 277, 296
 - with crossed polarizers, 49–52, 148
 - high-speed, 23, 35, 37, 69, 77–79, 98–99, 105–106, 111, 113–115, 292, 293, 296
 - infrared (IR), 48, 58, 148
- Photomicrographs of thin sections of tissue particulates, 260
- Physical evidence record, 1–8, 17–18, 119–122, 131, 154, 179, 191, 271, 318
- Physical fit, 135–136
- Poe, Edgar Allan, 21
- Poiseuille's equation, 32, 33
- Polarized light photography, 49, 51, 52, 148
- Polychromatic, 48
- Pooling, 82, 274
- Popper, Karl, 135
- Positional information, 128
- Post-event blood & other traces, xxii, 3, 7, 121, 104, 140–142, 264, 316
- Post-incident events, 3–6, 87, 122, 140
- Pre and post-event artifacts, 140
- Precipitin test, 265
- Presumptive tests, 47, 52, 53, 56, 126, 147, 211, 212, 221, 264, 265, 267
- Principles of blood trace reconstruction, 119–125
- Problems with interpretation of specific configurations, 148–152
- Professional development, 159, 174, 319
- Prosecutors, 7, 138, 162, 168, 175, 191, 193–194, 198–199, 223
- Protein-denaturing components, 53, 268
- Protein quantitation methods, 55
- Protein, serum protein, 36, 53
- Protein stain(s) or staining**, 52–53, 55, 122, 126, 164, 239, 240, 267
 - amido black, 53, 122, 164, 239, 240, 267
 - Coomassie blue, 53
 - Hungarian red, 53
- Pseudo-enzymatic or peroxidase-like, 52
- Pseudoscience, xxii, 135, 157–164, 254, 263

Q

Quench, 48

R

Radial (“impact”) spatter, 5, 23, 61, 63, 73–74, 103, 128–129, 149–150, 181–182, 232

Raman hyperspectral imaging, 56

Raman spectrum of blood, 56

Rapid DNA technologies, 55–57

Rayleigh Number, 33

Rear curtain flash, 53, 88, 148

Reconstruction, xv, xx–xxiv, 3, 5, 17–19, 23, 26, 30, 42, 52, 63–66, 74, 83, 86, 103, 104, 119–155, 158, 160, 162, 163, 168–177, 180, 184, 189, 201, 203–204, 222, 224, 227–229, 233, 241–243, 249, 251, 253, 255–256, 259–264, 266–274, 280–281, 289, 291, 297, 306–310, 312, 316–318, 320–322

reconstruction v. reenactment, 18–19

Reconstructionists, xxiii, 169

Reenactment, 18–19

Region of convergence, 101, 103

Region of origin, 96, 101–104, 149, 150

Reynolds number, 33, 37, 62

Rivulets, 66, 82–83, 91

RNA analysis, 55

S

Samuel Gerber and the “surgical instrument,” 181

Samuel Sheppard case, 128, 142, 180–184

Satellites, satellite or micro droplets, 37, 70, 72, 114, 115, 299

Scene as a recording medium, 1

Scientific method, 8, 9, 12, 18–19, 23, 26, 132–133, 136, 139–140, 143, 154, 157–159, 163, 169, 170, 172–173, 185, 198, 263, 278, 316, 317, 341

Secondary spatter, 73–77, 86, 114–115

Sedimentation, 40, 42

Sensitivity of detection, 159, 160

Serum separation, 82, 84, 253

Sheindlin, Judge Gerald, 163

Sheppard, Samuel, 128, 142, 180–184

Shooting of a Driver case, 160, 230–235

Simpson, Orenthal James (O.J.), 15, 128, 205–223

Spatter associated with gunshot wounds, 78

Specific gravity, 31

Spines, 37, 145, 152

Splash configurations, 5, 37, 114

Standard operating procedures, SOPs, 54–55, 322

Stereomicroscope, 135, 216, 217, 244, 298, 300

Stomping homicide: misuse of enhancement reagents, 266

Stove-pipe jamb mark, 255–256

Stroboscopic photography, 98–99, 105–106

Surface normal, 96–97, 99, 110, 113

Surface tension, 29, 30, 37, 38, 40, 43, 44, 111, 112, 173, 293

SWGSTAIN, xix, 61–62, 176, 305–308

T

Takayama microcrystal test, 265

Taxonomic classification system, 62, 63

Taxonomy, 61–64, 124

Taylor reliability study, 63

Teamwork, 130–131, 168, 223, 319

Temporal information, 129

Terminology, typology, and taxonomy, 61–92

Timeline of historical sciences, 2

Time since deposition, 56, 152

Tissue (body), 41, 78–81, 121, 153–154, 171, 229–230, 255, 257, 259–261, 283–295, 298

tissue fragments in the recess of the pistol frame, 259–260

tissue simulant, 285–295

tissue spatter from a large caliber gunshot case, 229–230

Trace formation, xxii, 24, 37, 294

Trail configurations, 6, 66, 71, 72, 89, 128, 141, 207, 211, 212

Triple homicide, 202–204

Tunable light sources, 48, 58

TWG or TWGS, technical working group(s), 159, 305

Typology, 61–63, 124

typology for blood trace deposits, 63–91

typology system, 63

U

Ultior motives, 161–162

Unavoidable environmental events, 90

Unfired cycled cartridges, 260

V

Vectors, 95, 108

Verification stage of the scientific method, 143

Vertical crime scene case, 223–229

Vertical velocity, vertical component of
velocity, 98, 105–109
Viscoelasticity, 34
