<b>1</b>	<b>Research Results of the Process of the Anomalous Elastic X-Ray Photon Scattering by a Many-Electron System</b>	<b>1</b>
1.1	Theoretical Process Description	1
1.1.1	Quantum-Mechanical Perturbation Theory	2
1.1.2	Form Factor Approximation and its Modifications	5
1.2	Measurement and Calculation Results of Spectral Characteristics of the Process	8
1.2.1	Study of the Real and Imaginary Parts of the Probability Amplitude of the Process	8
1.2.2	Differential Cross-Section Study of the Process	12
1.2.3	Study of the Atomic form Factor Structure	15
1.3	Statement of the Study Problems	16
<b>2</b>	<b>Many-Particle Effects at Anomalous Elastic X-Ray Photon Scattering</b>	<b>19</b>
2.1	Analytic Structure of the Differential Process Cross-Section	19
2.1.1	Construction of the Process Probability Amplitude	20
2.1.2	Form Factor of the Closed-Shell Atom	24
2.2	Anomalous Dispersion Kramers–Heisenberg–Waller Terms	26
2.2.1	Electron Shells Radial Rearrangement Effect	26
2.2.2	Multiple Atomic Excitation/Ionization Effect	29
2.2.3	Correlation Effects of the Random Phase Approximation with Exchange and Auger and Radiative Decay of the Deep Vacancy	34
2.3	Physical Interpretation of the Process Probability Amplitude	36
2.3.1	Goldstone–Hubbard–Feynman Diagrams Formalism	37
2.3.2	About the Scattered Photon Phase and Number	39

2.4	Calculation Algorithm of the Process Differential Cross-Section .....	40
2.4.1	Calculation of the Integral Amplitude Terms .....	40
2.4.2	Asymptotic Problem of the Partial Photoionization Cross-Sections .....	41
2.4.3	Calculation of the Double Photoionization Channels .....	41
2.5	Correlation Abnormalities of the Atomic Form Factor .....	42
2.5.1	Correlation Structure of the Atomic Form Factor .....	42
2.5.2	Calculation Results: $^{10}\text{Ne}$ Atom .....	44
2.6	Form Factor of the Open-Shell Atom .....	45
2.6.1	Analytic Structure of the Form Factor .....	46
2.6.2	Calculation Results: Atoms of $^{17}\text{Cl}$ , $^{21}\text{Sc}$ , $^{23}\text{V}$ , $^{35}\text{Br}$ , $^{39}\text{Y}$ , $^{73}\text{Ta}$ .....	47
2.7	Differential Cross-Sections of the Anomalous Elastic X-Ray Photon Scattering .....	49
2.7.1	Closed-Shell Atoms in the Ground State: $^{10}\text{Ne}$ , $^{18}\text{Ar}$ , $^{36}\text{Kr}$ , $^{54}\text{Xe}$ .....	50
2.7.2	Open-Shell Atoms in the Ground State: $^{11}\text{Na}$ , $^{42}\text{Mo}$ ....	71
2.8	Anomalous Elastic X-Ray Photon Scattering by an Atomic Ion .....	74
2.9	Many-Particle Effects in Formation of Scattering Indicatrixes .....	78

### 3 Effect of the Deep Vacancy Auger-Decay When Anomalous Elastic X-Ray Photon Scattering by an Atom .....

3.1	Effect of the Deep Vacancy Auger-Decay in Excitation/Ionization .....	83
3.1.1	Atom Photoexcitation .....	83
3.1.2	Photoionization of an Atom .....	89
3.2	Effect of the Deep Vacancy Auger-Decay in Excitation/Ionization .....	90
3.2.1	$1s\text{-}3p$ Photoexcitation of Neon .....	90
3.2.2	$1s\text{-}\varepsilon p$ Photoionization of Argon .....	92
3.2.3	Study of the K-Photoionization of $^4\text{Be}$ , $^{10}\text{Ne}$ , and $^{18}\text{Ar}$ Atoms using the Methods of Multi-channel Resonance Quantum Scattering Theory .....	93
3.3	Quantum Theory of the Post-Collisional Interaction Effect ....	96
3.3.1	One-channel Variant of the Theory .....	97
3.3.2	Generalization of the Theory .....	102
3.4	Main Results of Chapter 3 .....	103

<b>4</b>	<b>Many-Particle and Orientation Effects When Anomalous Elastic X-Ray Photon Scattering by a Linear Molecule . . . .</b>	<b>105</b>
4.1	Differential Cross-Section of the Process . . . . .	105
4.1.1	Form Factor of the Linear Molecule . . . . .	106
4.1.2	Anomalous Dispersing Kramers-Heisenberg-Waller Terms . . . . .	107
4.2	Anomalous Elastic X-Ray Photon Scattering by Two-Atom Molecule . . . . .	112
4.2.1	Scattering by the Molecules HF and HCl in the Energy Region of the $1\sigma$ - Shell Ionization Threshold . . . . .	112
4.2.2	Scattering by the Molecule CO in the Energy Region of the $2\sigma$ - Shell Ionization Threshold . . . . .	115
4.3	Main Results of Chapter 4 . . . . .	119
	<b>Conclusions . . . . .</b>	<b>121</b>
	<b>References . . . . .</b>	<b>125</b>
	<b>Index . . . . .</b>	<b>133</b>
