

Table of Contents

Introduction	1
<i>F.W. Vaandrager</i>	
Formal Models and Analysis	
Verification of Clocked and Hybrid Systems	4
<i>Y. Kesten, Z. Manna, and A. Pnueli</i>	
Analyzing and Synthesizing Hybrid Control Systems	74
<i>M.S. Branicky</i>	
Model Checking Timed Automata	114
<i>S. Yovine</i>	
Real-Time Systems	
On Modeling Real-Time Task Systems	153
<i>D. Chen, A. Mok, and S. Baruah</i>	
A Modular Approach for Programming Embedded Systems	170
<i>S. Ren, G.A. Agha</i>	
Development and Engineering	
Proof-Based System Engineering and Embedded Systems	208
<i>G. Le Lann</i>	
A Design Notation and Toolset for High-Performance Embedded	249
Systems Development	
<i>D. Bhatt, J. Shackleton</i>	
The Maturity of Object-Oriented Methodologies	268
<i>A. van den Hoogenhof</i>	
Object Oriented Development of Embedded Systems with the	304
Octopus Method	
<i>J. Kuusela</i>	
Case Studies	
Engineering of Real-Time Systems with an Experiment in	316
Hybrid Control	
<i>A.P. Ravn, T.J. Eriksen, M. Holdgaard, and H. Rischel</i>	
Formal Methods in the Design of a Storm Surge Barrier	353
Control System	
<i>P. Kars</i>	
Statecharts in Use: Structured Analysis and Object-Orientation	368
<i>B.P. Douglass, D. Harel, and M. Trakhtenbrot</i>	

Industrial Perspective

Embedded Systems in Consumer Products	395
<i>R.H. Bourgonjon</i>	
The Long Road from Research to Telecommunication Applications	404
<i>H.F. van Rietschote</i>	
Development of Embedded Software at ICT	413
<i>F.T.G. Veltmaat</i>	
Author Index	423
