

# Contents

## Cognition

Symbolic and Subsymbolic Approaches to Cognition <i>D. Willshaw</i> .....	3
Mapping Across Domains Without Feedback: A Neural Network Model of Transfer of Implicit Knowledge <i>Z. Dienes, G.T.M. Altmann and S.-J. Gao</i> .....	19
Modelling Reaction Times <i>J.A. Bullinaria</i> .....	34
Chunking: An Interpretation Bottleneck <i>J. Slack</i> .....	49
Learning, Relearning and Recall for Two Strengths of Learning in Neural Networks 'Aged' by Simulated Dendritic Attrition <i>R. Cartwright and G.W. Humphreys</i> .....	62

## Perception

Learning Invariances via Spatio-Temporal Constraints <i>J.V. Stone</i> .....	75
Topographic Map Formation as Statistical Inference <i>R. Baddeley</i> .....	86
Edge Enhancement and Exploratory Projection Pursuit <i>C. Fyfe and R. Baddeley</i> .....	97
The "Perceptual Magnet" Effect: A Model Based on Self-Organizing Feature Maps <i>M. Herrmann, H.-U. Bauer and R. Der</i> .....	107
How Local Cortical Processors that Maximize Coherent Variation Could Lay Foundations for Representation Proper <i>W.A. Phillips, J. Kay and D.M. Smyth</i> .....	117

## Audition and Vision

Using Complementary Streams in a Computer Model of the Abstraction of Diatonic Pitch <i>N. Griffith</i> .....	137
---	-----

<b>Data-Driven Sound Interpretation: Its Application to Voiced Sounds</b>	
<i>L.S. Smith</i> .....	147
<b>Computer Simulation of Gestalt Auditory Grouping by Frequency Proximity</b>	
<i>M.W. Beauvois and R. Meddis</i> .....	155
<b>Mechanisms of Visual Search: An Implementation of Guided Search</b>	
<i>K.J. Smith and G.W. Humphreys</i> .....	165
<b>Categorical Perception as an Acquired Phenomenon: What are the Implications?</b>	
<i>J.M. Beale and F.C. Keil</i> .....	176
<b>Sequence Learning</b>	
<b>A Computational Account of Phonologically Mediated Free Recall</b>	
<i>P.J. Lovatt and D. Bairaktaris</i> .....	191
<b>Interactions Between Knowledge Sources in a Dual-Route Connectionist Model of Spelling</b>	
<i>D.W. Glasspool, G. Houghton and T. Shallice</i> .....	209
<b>Author Index</b> .....	227
