Numbers refer to plates

Introduction

Some terms: tissue, organ, parenchyma, stroma, system, apparatus	1
---	---

Bone Marrow and Hematopoiesis

Localization of the bone marrow	2
Components of the bone marrow	3
Structure of the bone marrow	4
Hematopoiesis	5
Erythropoiesis	6
Erythroblastic island	7
Erythropoietic cells	8
Granulopoiesis	9
Granulopoietic cells	10, 11
Lymphopoiesis, monopoiesis, and thrombopoiesis	12
Platelet-producing megakaryocyte and platelet release .	13

Blood

Survey of blood elements in a sinus of the bone marrow	14
Blood elements	15
Migration of some blood cells into connective tissue ...	16

Cardiovascular System

Components of the cardiovascular system	17
Heart	18
Atrioventricular valves	19
Arteries	
Elastic arteries	20
Muscular arteries	21
Arteriole, venule, postcapillary venule	22
Metarteriole with precapillary sphincters	23
Capillaries	
Continuous capillaries	24
Fenestrated capillaries	25
Sinusoidal capillaries	26
Continuous capillary with a pericyte	27
Medium-sized intracardiac vein with valves.	
Example: saphenous vein	28
Large veins. Example: vena cava superior and vena cava inferior	29
Arteriovenous anastomoses. Example: digital glomus organs	30

Lymphatic or Immune System

Components of the lymphatic or immune system.	
Lymphatic ring of the pharynx. Pharyngeal tonsil	31

IX

Palatine tonsil	32
Diapedesis of free cells through tonsillar epithelium ..	33
Lymph nodes	34
Cortex of a lymph node	35
Medulla and hilus of a lymph node	36
Antigen-presenting cells	37
Subcapsular sinus of a lymph node	38
Postcapillary venule	39
Lymph circulation through lymph nodes.	
Vascularization of lymph nodes. Lymphocyte	
circulation and recirculation	40
Spleen: stroma and parenchyma	41
Splenic parenchyma: white and red pulp.	
Splenic vascularization	42
Splenic cords and splenic sinusoids	43
Splenic cord	44
“Closed” and “open” splenic circulation	45
Splenic sinusoid	46
Thymus development and general structure	47
Thymic lobule	48
Thymic lobule: cortex and medulla	49
Blood-thymus barrier. Corticomedullary zone	50
Thymic cortex: epithelial-reticular cells	51
Thymic medulla: Hassall’s bodies	52
Lymphocyte and blood circulation in the thymus	53
Thymic involution	54
The initial lymphatic capillary	55
Collecting lymphatic vessel	56

Respiratory System

Components of the respiratory system. Wings of	
nostrils	57
Respiratory mucosa	58
Olfactory mucosa	59
Olfactory epithelium	60
Olfactory mucosa and a filum olfactorium	61
Epiglottis	62
Larynx	63
Trachea	64
Lungs, general description. Pseudostratified ciliated	
epithelium	65
Intrapulmonary bronchus	66
Preterminal bronchiole. Neuroepithelial bodies	67
Terminal bronchiole, respiratory bronchiole, lung	
acinus, and bronchiolar epithelium	68
Alveolar duct and alveoli	69
Lung alveolus	70
Alveolar septum	71
Alveolar epithelium, blood-air barrier	72

Alveolar macrophages	73
Lung lobule and lung vascularization	74
Digestive Apparatus	
Lips and gingiva	75
Teeth, periodontal ligament, and cheek	76
Gingival crevice, dentin, and cementum	77
Odontoblasts and cementocytes	78
Dentinoenamel junction	79
Enamel	80
Tongue. Filiform and fungiform papillae	81
Circumvallata papilla, lingual glands, and lingual follicles	82
Taste bud	83
Hard and soft palate	84
Major salivary glands: general structure of their parenchyma	85
Parotid gland	
An overview	86
Detailed structure	87
Submandibular gland	88
Sublingual gland	89
Esophagus	90
Stomach	
General structure of the corpus	91
Corpus mucosa and submucosa. Vascularization of the mucosa	92
Foveola gastrica and neck of gastric glands proper ...	93
Body and base of a gastric gland proper	94
Pyloric antrum mucosa and submucosa	95
Small intestine	
Duodenum: an overview	96
Intestinal villi and crypts of Lieberkühn	97
Epithelium and lamina propria	98
Jejunum. Vascularization, innervation, and lymph circulation of the small intestine	99
Ileum, general structure, and Peyer's patches	100
Ileum, gut-associated lymphatic tissue, and M-cells ...	101
Large intestine	
Appendix	102
Colon	103
Colonic mucosa and submucosa. Vascularization of the colonic mucosa	104
Rectum. Anal canal and its blood circulation	105
Liver	
An overview	106
Classic liver lobule and liver vascularization	107
Portal canal	108
Border zone between the classic liver lobule and the portal canal	109

Hepatocytes	110
Liver sinusoid: endothelial and Kupffer cells	111
Liver sinusoids and the perisinusoidal cell of Ito	112
Bile pathways	113
Gallbladder	
An overview	114
Structure of the wall	115
Epithelium	116
Pancreas: an overview	117
Pancreatic parenchyma: an overview	118
Pancreatic acinus	119
Pancreatic islet of Langerhans	120
Its endocrine cells	121

Endocrine System

Hypophysis: an overview and general structure	
of the pars distalis	122
Hypophysis, pars distalis	
Cell cords and sinusoidal capillaries	123
Thyrotropic, adrenocorticotropic, and somatotropic cells	124
Mammotropic, gonadotropic, precursor, and folliculostellate cells	125
Hypophysis, pars intermedia	126
Hypophysis, lobus nervosus	127
Vascularization of the hypophysis	128
Pineal gland: development and overview	129
Pineal parenchyma and pineal cells	130
Thyroid gland: an overview	131
Thyroid follicles	132
Thyroid follicular epithelium	133
Biosynthesis of hormones by follicular cells	134
Parathyroid glands	135
Parathyroid cells	136
Adrenal glands: an overview and blood supply	137
Adrenal cortex	138
Adrenal medulla and chromaffin cells	139

Urogenital Apparatus

Overview of the urogenital apparatus. Urinary system:	
general description of the kidney	140
Urinary system	
Renal lobe	141
Renal lobule	142
Nephron: an overview	143
Two types of nephron	144
Renal corpuscle	145
Structure of a renal glomerulus	146
Glomerular filtration membrane	147
Glomerular basal lamina and glomerular slit membrane	148

Proximal tubule of the nephron	149
Distal tubule and thin segment of the nephron	150
Nephrocytes of proximal and distal tubules	151
Juxtaglomerular apparatus	152
Renal medulla	153
Detail of the renal medulla and interstitium	154
Collecting tubules of kidney	155
Vascularization, lymph circulation, and innervation of the kidney	156
Renal papilla and a minor calyx	157
Renal hilus	158
Ureter	159
Urinary bladder	160
Transitional epithelium and urinary bladder musculature	161
Female urethra	162
Male reproductive system	
Testis and seminiferous tubules	163
Seminiferous epithelium	164
Spermatogenesis	165, 166
Spermiogenesis	167
Spermatozoon	168
Interstitial tissue of the testis	169
Rete testis	170
Epididymis	171
Epithelia of the ductus epididymidis and ductuli efferentes	172
Ductus deferens	173
Function of the ductus deferens	174
Seminal vesicle	175
Wall of the seminal vesicle and its epithelium	176
Prostate	
An overview	177
Stroma and parenchyma	178
Tubuloalveolus and glandular epithelium	179
Penis	
An overview	180
Corpus cavernosum	181
Vascularization of the penis	182
Penile urethra and corpus spongiosum	183
Glans penis	184
Corpus spongiosum of the glans penis	185
Female reproductive system	
Ovary: an overview	186
Cortex of the ovary	187
Oogenesis	188
Development of ovarian follicles	189
Ovulation and formation of corpus luteum	190
Granulosa cells of tertiary ovarian follicle and lutein cells of corpus luteum	191

Secondary oocyte	192
Ovum with corona radiata	193
Fertilization: acrosomal and cortical reactions	194
Oviduct: an overview	195
Infundibulum and beginning of the ampulla.	
Structure of the oviduct wall	196
Oviduct: tunica mucosa and epithelium	197
Uterus: an overview	198
Endometrium and its blood supply	199
Menstrual and gravid cycles of the endometrium ..	200
Cyclic changes of uterine glands and their epithelial cells during the menstrual cycle	201
Segmentation and implantation. Blastocyst	202
Development of the chorionic villi	203
Formation of the placenta	204
Early and full-term placenta	205
Terminal placental villi in early and full-term placenta. Placental barrier	206
Cervix of uterus	207
Endocervix, cervical glands, and their epithelium ..	208
Vagina	209
Vaginal cycle	210

Locomotor Apparatus

Joints	211
Intervertebral disc and a diarthrosis	212
Synovial membrane	213

Integumentary System

Skin and appendages	
Thin skin and its blood supply	214
Thick skin and its blood supply	215
Epidermis and its specialized nonepidermal cells	216
Hair and hair bulb	217
Transverse sections of a hair	218
Hair root	219
Nail and its blood supply	220
Nail bed	221
Eccrine sweat glands	222
Apocrine sweat glands	223
Epithelial cells of eccrine and apocrine sweat glands ..	224
Inactive or resting mammary gland	225
Lactating mammary gland	226
Tubuloalveolus of a lactating mammary gland	227
Lactocytes in inactive and lactating mammary glands ..	228
Histophysiological changes and hormonal control of mammary gland activity	229
Sebaceous gland	230

Nervous System

Central nervous system. Spinal cord	231
Neurons of the spinal cord.	
Redlich-Obersteiner zone	232
Cerebellum	233
Detail of cerebellar cortex	234
Neuronal circuits of the cerebellum	235
Cerebral cortex	236
Columnar organization of the cerebral cortex	237
Choroid plexus	238
Meninges	239
Detailed structure of meninges	240

Sensory Systems

Visual system

A survey	241
Cornea	242
Ciliary body and blood-aqueous barrier	243
Ciliary muscle and accomodation of the eye	244
Trabecular meshwork and Schlemm's canal	245
Iris	246
Anterior surface of the iris	
and a stromal blood capillary	247
Sclera, choroid, and blood supply of the retina	248
Bruch's membrane, choriocapillaris, choroid stroma,	
and pigment epithelium of the retina	249
Lens	250
Vitreous body	251
Optic retina	252
Photoreceptors	253
Müller's cells	254
Macula lutea, fovea centralis, and optic papilla	255
Optic nerve	256
Eyelids	257
Lacrimal glands	258
Molecular sensory transduction mechanisms	259

Auditory system

Internal ear: bony and membranous labyrinth.	
A survey	260
Cochlea and cochlear duct	261
The organ of Corti viewed from above	262
The organ of Corti viewed from below	263
The organ of Corti	
Pillars and outer phalangeal cells	264
Reticular membrane	265
Inner and outer hair cells	266
Innervation of the organ of Corti. Spiral ganglion ...	267
Spiral limbus and interdental cells	268
Spiral ligament and stria vascularis	269
Epithelium of the stria vascularis	270

Middle ear	
Tympanic membrane and mucosa	
of the tympanic cavity	271
Auditory tube	272
External auditory meatus	273
Mechanism of hearing	274
Vestibular system: a survey. Maculae of the utricle	
and saccule	275
Neuroepithelium and the otolithic membrane	276
Vestibular and supporting cells of maculae	
of the utricle and saccule	277
Semicircular ducts and cristae ampullares	278
Mechanism of vestibular transduction	279
