

1	Introduction	1
2	Explicating the Context of Technological Mediation: Changes in Everyday Communication	11
2.1	Definition of Relevant Concepts	12
2.1.1	Interpersonal Communication	12
2.1.2	Technological Affordances	16
2.2	Permanent Individual Addressability through Mobile Media	18
2.2.1	Genesis: From Geographical Addressability to Permanent Connectedness	18
2.2.2	Consequences: New Contexts for Coordination, More Connections, and the Development of a Norm to be Available	21
2.3	Situating MIMAs and MIMA Group Chats Within the Overall Context of (Mobile) Online Communication	23
2.3.1	Classifying MIMAs as Social Media	25
2.3.2	MIMAs as Evolution of Texting and Instant Messaging	27
2.3.3	Identifying Affordances of MIMA Group Chats	30
2.4	Shortcomings of Current Research on MIMA Group Chats	35
2.4.1	Previous Research and the Importance of Considering Communication Content and Process	36
2.4.2	The Need for a Small Group Perspective	40
2.5	Summary: MIMA Group Chats as Context of Technological Mediation	42

3	Explicating The Social Context: Applying Small Group Research to the MIMA Group Chat Phenomenon	45
3.1	Definition of Relevant Concepts	47
3.1.1	Small Groups	47
3.1.2	Group Interaction	49
3.2	Expansion of the Interaction Repertoire Through MIMA Group Chats	56
3.3	The Group Chat Message: Result of the Interplay of Situation, Member, and Group	59
3.4	Non-Professional Secondary Groups (NPSGs) as Research Example	65
3.4.1	Specification and Demarcation of NPSGs	65
3.4.2	Benefits of Using MIMA Group Chats for the Specific Case of NPSGs	68
3.5	Summary: MIMA Group Chats Through The Lens of Small Group Research	69
4	Deriving Dimensions of MIMA Group Chat Communication	71
4.1	Coordinative Communication Content as Dimension	73
4.2	Socio-Emotional Communication Content as Dimension	76
4.3	Interaction Management as Dimension of Group Chat Communication	83
4.4	Temporality as Dimension of MIMA Group Chat Communication	87
4.5	Summary: Investigating NPSG's MIMA Group Chat Communication	88
5	Research Agenda of the Current Study	91
5.1	Describing Content of MIMA Group Chat messages	92
5.1.1	Identifying a Typology of MIMA Group Chat Messages	92
5.1.2	Distribution of Message Types According to Group Purpose	94
5.2	Messages as Part of the Larger Group Interaction Repertoire (Temporality)	96
5.3	Messages as Part of Coherent Conversations (Sequentiality)	98
5.4	Messages as Contributions by Members (Participation Dynamics)	103
5.4.1	Participation Equality and Member Activeness	104
5.4.2	Gender as Source Characteristic	107
5.5	Conclusion and Overview of Research Questions	109

6 Methodology of Empirical Investigation	113
6.1 Research Design and Data Collection Procedure	114
6.1.1 Method Choice	114
6.1.2 Recruitment Strategy, Research Material, and Sample Description	116
6.1.3 Ethical Considerations of Recruitment Strategy	120
6.2 Coding of Communication Content: Codebook	121
6.2.1 Definition of Coding Units	121
6.2.2 Definition of Context Units	122
6.2.3 Procedure of Coding and Reliability Testing	123
6.3 Measurements and Category Scheme	124
6.3.1 Formal Categories	125
6.3.2 Topic Reference	125
6.3.3 Coordinative Communication Content	128
6.3.4 Socio-Emotional Communication Content	130
6.3.5 Local Interaction Management: Conversation-Related Variables	133
6.4 Data Preparation and Cleaning	135
6.5 Data Analytical Remarks	137
6.5.1 Specifics of the Current Data Set	137
6.5.2 A Short Note on the Role of <i>p</i> -Values	138
7 Results and Interim Discussions	139
7.1 Describing Content of MIMA Group Chat Messages	140
7.1.1 Distribution of Content Categories (RQ1)	140
7.1.2 Cluster Analysis to Extract Message Typology (RQ2)	144
7.1.3 Distribution of Messages Types According to Group Purpose (RQ3)	153
7.1.4 Discussion on Message Typology	156
7.2 Messages as Part of the Group Interaction Repertoire (Temporality)	166
7.2.1 Temporality (RQ4), Periodicity (RQ5), and Temporal Location of Messages (RQ6)	166
7.2.2 Discussion on Findings Regarding Temporality	169
7.3 Messages as Part of Coherent Conversations (Sequentiality)	173
7.3.1 Identification of Thematically Related Conversations (RQ7)	173

7.3.2	Message Type and Conversational Position of Message (RQ8)	176
7.3.3	Prediction of Message Types Through Preceding Messages (RQ9)	178
7.3.4	Response Latency of Message Types (RQ10)	181
7.3.5	Discussion of Findings Regarding the Sequentiality of Messages	188
7.4	Messages as Contribution by Members (Participation Dynamics)	195
7.4.1	Participation Equality (RQ11)	196
7.4.2	Messages Sent by Highly Active Members (RQ12)	200
7.4.3	Gender Differences (RQ13)	201
7.4.4	Discussion on Findings Regarding Participation Dynamics	203
7.5	Short Summary of Findings	206
8	General Discussion of Results	209
8.1	Central Findings and Insights on NPSG's Chat Communication via MIMAs	210
8.2	Discussion of Empirical Investigation	215
8.3	Theoretical Perspective on Group Chat Communication via MIMAs	221
8.4	Programmatic Perspective on Group Chat Communication via MIMAs	225
8.5	Paradigmatic Perspective: Communication Research and The Role of Small Groups	234
