Growing up with Asymptotics

Growing up with Asymptotics
By M. Van Dyke.....3

Part I Vorticity and Turbulence

Instabilities and Vortex Patterns in Circular Couette Flow with Axial Density Stratification
By E.J. Hopfinger, B.M. Boubnov and E.B. Gledzer13

Vortices Subjected to Non-Axisymmetric Strain - Unsteady Asymptotic Evolution
By H.K. Moffatt.....29

Some Contributions to Asymptotic Theory for Turbulent Shear Flows
By K. Gersten.....37

Turbulent Entrance Flow in a Channel: An Asymptotic Approach
By H. Herwig and M. Voigt.....51

An Efficient Wave Interaction Mechanism within a Turbulent Boundary Layer
By S. Ortiz and E. Deriat.....59

Part II Hydrodynamic Instability

Bifurcations of Capillary-Gravity Interfacial Waves
By F. Dias.....69

The Effect of a Low-Frequency Modulation on Some Codimension 2 Bifurcations
By M.N. Ouarzazi and P.A. Bois.....77

Finite Amplitude Waves in a Boundary Layer Flow over Compliant Walls
By M. Rossi and U. Ehrenstein.....85

Recent Developments in the Theory of the Non-Linear
Stability of High Reynolds Number Flows
By A. G. Walton.....93

Weakly Non-Linear Instability of the Laminar Boundary Layer
Calculated by a Parabolic System of Equations
By Ch. Airiau and G. Casalis.....99

Applying a Condition of Observability to Constitutive Equations of Laminar Motion
By L. Brun.....107

Part III Non-Linear Waves

Hysteresis and Interaction of Standing Waves with Faraday Excitation By A.D.D. Craik and J.G.M. Armitage.....	117
About the Radiation Diagram of an Underwater Acoustic Source in the Presence of Gravity Waves By D. Euvrard	129
Finite-Amplitude, Pulsed, Ultrasonic Beams By F. Coulouvrat and K.E. Frøysa.....	145
Long-Waves on Thin Viscous Liquid Film: Derivation of Model Equations By R.K. Zeytounian.....	153

Part IV Aerodynamics and Rarefied Gas Flows

On Global Existence Theorems for the Initial-Boundary-Value Problem for the Boltzmann Equation By C. Cercignani.....	165
Diffusion Approximation and Arnold's "Cat Map" By F. Golse.....	179
Second Order Analysis of the Inner Shock Structure By J.M. Reese, L.C. Woods, F.J.P Thivet and S.M. Candel.....	191
Transient Behaviour of a Gaseous Cavity Attached to a Projectile in a Two-Phase Flow By A. Dymnt.....	205
From the Analytical Theory to Hypersonic Aircraft Design By A. Merlen.....	221
Upstream Influence in Mixed Convection at Small Richardson Number on Triple, Double and Single Deck Scales By P.Y. Lagrée.....	229
Asymptotic Modelling for Separating Boundary Layers By J. Mauss.....	239

Going on with Asymptotics

Going on with Asymptotics By J.P. Guiraud....	257
