Preface	xv
Contributors	xvii
1 Cellular and Molecular Approaches to the Study of Gliomas and Glial Development	
<i>M. Noble, K. Bevan and D. Venter</i>	1
Glial cell development in the rat optic nerve	1
Control of self-renewal in the O-2A lineage	3
Glial and neuronal development in the retina and cortex	4
Ramifications of current development studies for neuropathology	5
A serological analysis of gliomas	6
Glioma-derived cells can be divided into two superfamilies on the basis of antigen expression	6
Antigenic and morphological analyses of gliomas yield conflicting classification systems	7
Potential for positive feedback loops as contributors to growth of gliomas	8
Conclusion	9
References	10
2 Molecular Genetics of Brain Tumours	
<i>C.E. Jones and A.E. Harding</i>	13
Genetic techniques in studies of brain tumours	13
Molecular basis of tumorigenesis	16
Molecular genetics of benign brain tumours	18
Cytogenetic and molecular genetic studies of malignant brain tumours: gliomas	20
Oncogenes and gliomas	22
Molecular genetics of neuroblastomas	25
Conclusion	26
References	27

**3 Current Concepts of the Histopathological
Classification of Tumours of the Central Nervous
System**

S.R. VandenBerg, R.B. Hessler and M.B.S. Lopes 29

Introduction 29

Tumours of neuroepithelial tissue 32

 Astrocytic tumours 32

 Astrocytomas: fibrillary; protoplasmic;
 gemistocytic (neuroimaging correlations) 33

 Anaplastic astrocytoma 38

 Glioblastoma multiforme: giant cell glioblastoma;
 gliosarcoma 41

 Pilocytic astrocytoma 45

 Pleomorphic xanthoastrocytoma 46

 Subependymal giant cell astrocytoma 48

 Oligodendroglial tumours 49

 Oligodendroglioma 49

 Anaplastic oligodendroglioma 51

 Ependymal tumours 53

 Ependymoma 53

 Anaplastic ependymoma 55

 Myxopapillary ependymoma 55

 Subependymoma 57

 Mixed gliomas 58

 Mixed oligo-astrocytoma 58

 Malignant oligo-astrocytoma 59

 Choroid plexus tumours 59

 Choroid plexus papilloma 59

 Choroid plexus carcinoma 60

 Neuronal and mixed neuronal–glial tumours 60

 Gangliocytoma 60

 Dysplastic gangliocytoma of the cerebellum 61

 Desmoplastic infantile ganglioglioma 62

 Dysembryoplastic neuroepithelial tumour 63

 Ganglioglioma 65

 Malignant ganglioglioma 66

 Central neurocytoma 68

 Pineal parenchymal tumours 68

 Pineocytoma 70

 Pineoblastoma 72

 Mixed pineocytoma/pineoblastoma 74

 Embryonal tumours (neuroimaging correlations) . . . 74

 Medulloepithelioma 76

 Neuroblastoma 77

 Ependymblastoma 78

 Retinoblastoma 79

 Medulloblastoma 81

 Tumours of the meninges 84

 Tumours of meningotheial cells 84

Meningioma	86
Atypical meningioma	88
Anaplastic (malignant) meningioma	89
Papillary meningioma	91
Mesenchymal, non-meningothelial tumours	91
Haemangiopericytoma	92
Tumours of uncertain histogenesis	93
Haemangioblastoma	93
References	96

Colour plate section appears between pages 42 and 43

4 General Introduction to the Clinical Features of Malignant Brain Tumours

<i>M.F. Pell and D.G.T. Thomas.</i>	109
Epidemiology	109
Clinical presentation of primary malignant brain tumours	110
Symptoms and signs of raised intracranial pressure	111
Epilepsy	111
Focal signs	112
Specific clinical syndromes	112
Glioblastoma	113
References	114

5 Complications of Primary Malignant Brain Tumours

<i>N.V. Todd and D.I. Graham</i>	115
Complications of the tumour itself	115
Raised intracranial pressure	115
Clinical effects	115
Brain compliance	117
Tumour volume	118
Brain oedema	118
Hydrocephalus	119
Pathology of intracranial expanding lesions	120
Supratentorial expanding lesions: supracallosal hernia; tentorial hernia; central transtentorial hernia; haemorrhage and infarction in the midbrain and pons	120
Infratentorial expanding lesions: tonsillar hernia	123
Other features: pressure effects upon the skull; external herniation; pituitary	124
Focal or site-specific complications	124
Epilepsy	124
Focal neurological deficit	125
Spontaneous haemorrhage	126
Metastasis of primary brain tumours	128
Complications of treatment	131

Surgery	131
Risks and benefits	131
Freehand biopsy	132
Stereotaxic biopsy	132
Internal decompression of tumour	133
Radiotherapy	134
Acute reactions	135
Early delayed reactions	135
Late delayed reactions: radionecrosis; diffuse leucoencephalopathy; intellectual deficits; hypothalamic–pituitary dysfunction; blindness; induction of brain tumours; alternative techniques of focused radiation	136
Chemotherapy: systemic complications; CNS complications; acute cerebellar syndrome; acute encephalopathy; chronic encephalopathy; neuropathology of disseminated necrotizing leucoencephalopathy; osmotic blood–brain barrier opening; other complications of antineoplastic agents	141
Steroids	144
References	145

6 Low-grade Gliomas

<i>J. Koivukangas</i>	151
Introduction	151
Low-grade cerebral astrocytoma	151
Incidence	152
Patient series	153
Clinical presentation	153
Special features	155
Development of malignancy.	155
Infiltration of astrocytomas.	156
Neurosurgical management	156
Expectant management	157
Biopsy	157
Stereotaxic biopsy	158
Open biopsy	158
Removal of tumour	159
Stereotaxic resection of low-grade astrocytoma	161
Non-stereotaxic resection of low-grade astrocytoma: rehearsal of surgical procedure; placement of craniotomy; ultrasound imaging; microsurgical dissection	161
Evaluation of surgical results	166
Future Considerations	168
Acknowledgements	168
References	169

7 Management of Brain Tumours in Childhood

<i>J. Punt</i>	171
Introduction: the sites; the cells; the patients	171
Primitive neuroectodermal tumour (PNET)	173
Surgery	173
Radiation therapy	174
Chemotherapy	175
Brain stem glioma	176
Craniopharyngioma	177
Surgery	177
Radiation therapy	179
Chemotherapy	180
Conclusion	180
Ependymoma	181
Surgery	181
Radiation therapy and chemotherapy	182
Pineal region tumours	183
Radiation therapy and chemotherapy	185
Conclusion	185
References	186

8 Central Nervous System Neoplasms in Acquired Immunodeficiency Syndrome

<i>Y.T. So, R.L. Davis and J.H. Beckstead</i>	193
Introduction	193
Primary CNS lymphoma	193
Clinical manifestations	194
Pathology	194
Treatment and prognosis	195
Systemic non-Hodgkin's lymphoma	196
Clinical manifestations	197
Pathology	198
Treatment and prognosis	199
Kaposi's sarcoma	199
Pathogenesis of neoplasms in immune deficiency	199
References	200

9 Metastatic Brain Tumours

<i>K. Takakura</i>	203
Introduction	203
General aspects	203
Primary tumours	203
Sites of metastatic involvement	205
Histological diagnosis	206
Age and sex	206
Signs and symptoms	209
Neurological symptoms	209

Time of onset	210
Investigations	211
Computed tomography scan	211
Magnetic resonance imaging	214
Angiography	215
Electroencephalography	216
Cytological examination of cerebrospinal fluid	216
Tumour markers	217
Treatment	217
Surgery	217
Indication	217
Preoperative management	218
Surgical technique	218
Postoperative care	218
Radiotherapy	218
Chemotherapy	219
Biological response modifiers	219
Outcome of treatment	219
References	220

10 Diagnostic Imaging of Brain Tumours

<i>B.E. Kendall and J.V. Hunter</i>	221
Introduction	221
Detection of an abnormality	221
Computed tomography and magnetic resonance imaging	221
Fluid	222
Calcification	223
Haemorrhage	223
Oedema	224
Contrast enhancement	224
Mass effect of tumours	226
Localization and assessment of extent of abnormality	230
Supratentorial masses	230
Cerebellar masses	230
Brain stem tumours	231
Characterization of a lesion	231
Glial tumours	231
Infarction	233
Intracerebral haemorrhage	233
Cerebral abscess	235
Granuloma	235
Opportunistic infection	237
Progressive multifocal leucoencephalopathy	237
Herpes simplex virus encephalitis	237
Parasitic infections	238
Hydatidosis	238
Cysticercosis	238

Paragonimiasis, schistosomiasis	238
Extrinsic tumours	239
Meningioma	239
Epidermoid	241
Cholesterol granuloma	241
Dermoid	243
Parasellar tumours (intrinsic and extrinsic)	243
Chordoma, chondroma, chondrosarcoma	244
Neurinoma	244
Paranglioma	244
Extrinsic malignancies	245
Sphenoid mucocele	245
Subdural and extradural empyema	245
Meningeal infiltration	245
Intracerebral metastasis	245
Imaging characteristics of intrinsic tumours	249
Anaplastic or malignant astrocytoma – grades III and IV	250
Benign astrocytoma – grades I and II	251
Subependymal giant cell astrocytoma	251
Lhermitte–Duclos disease	254
Ganglioglioma	255
Hamartoma	255
Ependymoma	255
Oligodendroglioma	256
Malignant lymphoma	256
Primitive neuroectodermal tumour	257
Classical medulloblastoma	257
Adult medulloblastoma	258
Congenital medulloblastoma	258
Supratentorial neuroectodermal tumour	258
Colloid cyst	258
Choroid plexus papilloma	258
Intraventricular meningioma	259
Pineal region tumour	259
Germinoma	259
Pineal teratoma	260
Pineocytoma	260
Pineal astrocytoma	260
Haemangioblastoma	260
Multiple primary brain tumours	260
Cavernous haemangioma	261
Neuroblastoma	261
Facilitation of treatment and further surgical planning	261
Monitoring of therapy and outcome of treatment	262
Surgery	262
Radiotherapy	262
References	263

11 Surgery for Primary Malignant Brain Tumours

<i>J. Ashraf and R. Bradford</i>	265
Historical introduction	265
Principles of surgery	267
Establishment of diagnosis	267
Cyto-reduction and alteration of tumour kinetics	268
Relief of symptoms and improvement in survival	268
Principles of perioperative care	269
Surgical methods	270
Methods of establishing tissue diagnosis	270
Freehand biopsy	270
Image-guided stereotaxic biopsy	271
Ultrasound-guided biopsy	273
Methods of tumour resection	273
Principles of craniotomy: positioning and exposure; identification of tumour and resection	274
Lobectomy as a method of resection: frontal; temporal; occipital	275
Additional surgical methods	277
Surgical treatment of gliomas within a specific site	278
Recent advances in surgical methods	285
Operating microscope	286
Lasers	286
Ultrasonic surgical aspirator	287
Computer-interactive stereotaxic tumour excision	287
Intraoperative ultrasonography	290
Results of surgery	291
The case for reoperation for gliomas	294
Conclusion	295
References	296

12 Radiotherapy for Malignant Brain Tumours

<i>M. Brada and L. Vanuytsel</i>	299
Biological basis of radiotherapy	299
Radiation tolerance of the central nervous system	302
Spinal cord tolerance	303
Brain tolerance	304
Radiotherapy technique	306
New radiotherapy techniques	307
Radiotherapy in specific tumours	308
High-grade astrocytomas	308
New approaches	310
Low-grade astrocytomas	311
Oligodendroglioma	313
Ependymoma	314
Medulloblastoma	316
Pineal tumours	318

Primary cerebral lymphoma	319
Radiotherapy in other tumours: optic nerve glioma; meningioma; craniopharyngioma	321
Brain metastases	322
Conclusion	324
References	324

13 Chemotherapy of Malignant Brain Tumours

<i>P. Krausebeck and B. Müller</i>	329
Summary	329
Introduction	329
Curative concepts	330
Evaluation of therapy	331
Special features of chemotherapy of malignant brain tumours	332
Space limitation	332
Absence of lymph drainage	332
Blood-brain barrier	332
Neurotoxicity	334
Topographical considerations and tumour vascularization	334
Postoperative radiological appearances	336
Specific treatment	336
Symptomatic therapy	336
Mode of application	336
Systemic administration: intravenous; oral	336
Local application: intra-arterial; intratumoral	337
Modifications of the blood-brain barrier	338
Administration into the cerebrospinal fluid	338
Timing of chemotherapy	338
Clinical classification of malignant CNS neoplasia	339
Proliferation	340
Chemotherapy of specific tumour types	340
Malignant intrinsic brain tumours	340
Anaplastic gliomas and glioblastomas: overview of results of intravenous therapy	340
Malignant mesenchymal neoplasms (sarcomas)	346
Lymphomas and leukaemias	346
Brain metastases	347
Carcinomatous meningitis: management	348
Conclusion	349
Appendix I: Some abbreviations and acronyms	350
References	350

14 Immunotherapy of Brain Tumours

<i>Y. Sawamura and N. de Tribolet</i>	355
Introduction	355

Brain tumour immunology: surface antigens on brain tumour; humoral immune response; cell-mediated immune response; modulation of the host immune response by gliomas	355
Immunotherapy	359
Monoclonal antibodies	360
Biological response modifiers: interferons; interleukin-2; tumour necrosis factor; OK-432 and PS-K	364
Adoptive cellular therapy	366
Conclusion	369
References	369
Index	371
