

Contents

Part I: Theoretical Aspects and Recent Trends

Some Recent Advances in Complex Networks	
Synchronization	3
<i>Guanrong Chen, Xiaofan Wang, Xiang Li, Jinhui Lü</i>	
Networks of Limit Cycle Oscillators with Parametric Learning Capability	17
<i>Julio Rodriguez, Max-Olivier Hongler</i>	
Ragged Synchronizability and Clustering in a Network of Coupled Oscillators	49
<i>Przemysław Perlikowski, Andrzej Stefanski, Tomasz Kapitaniak</i>	
Cumulant Analysis of Strange Attractors: Theory and Applications	77
<i>V. Kontorovich, Z. Lovtchikova</i>	
On Synchronization of Coupled Delayed Neural Networks	117
<i>Jinling Liang, Zidong Wang, Xiaohui Liu</i>	

Part II: Some Modelling and Simulation Examples

Multiset of Agents in a Network for Simulation of Complex Systems	153
<i>V.K. Murthy, E.V. Krishnamurthy</i>	
Simulation of Nonlinear Dynamics and Synchronization for Structural Control at Seismic Excitations	201
<i>Svetla Radeva</i>	

Part III: Applications in Transportation

**Emergence of Synchronization in Transportation Networks
with Biologically Inspired Decentralized Control** 237
Reik Donner

Synchronization of Movement for a Large-Scale Crowd 277
Boris Goldengorin, Dmitry Krushinsky, Alexander Makarenko

Part IV: Applications in Security Related System Concepts

**Adaptive Synchronization of Chaotic Systems and Its Uses
in Cryptanalysis** 307
Ying Liu, Wallace Kit-Sang Tang

**Trust-Based Collaborative Control for Teams in
Communication Networks** 347
P. Ballal, F.L. Lewis, G.R. Hudas

Part V: Further Application Areas – Pattern Recognition and Communications Engineering

**Coupled Oscillator Systems for Microwave Applications:
Optimized Design Based on the Study and Control of the
Multiple Coexisting Solutions in Systems with Symmetry** ... 367
Ana Collado, Apostolos Georgiadis
