Invited Papers

Virtual Reality: A Knowledge Tool for Cultural Heritage	1
<i>Geneviève Lucet</i>	

Computer Graphics Theory and Applications

Part I: Geometry and Modeling

Using Distance Information for Silhouette Preservation in Mesh Simplification Techniques	11
<i>Susana Mata, Luis Pastor, and Angel Rodríguez</i>	
Closed-Form Solutions for Continuous PCA and Bounding Box Algorithms	26
<i>Darko Dimitrov, Mathias Holst, Christian Knauer, and Klaus Kriegel</i>	

Part II: Rendering

An Importance Sampling Method for Arbitrary BRDFs	41
<i>Rosana Montes, Carlos Ureña, Rubén García, and Miguel Lastra</i>	
Generalization of Single-Center Projections Using Projection Tile Screens	55
<i>Matthias Trapp and Jürgen Döllner</i>	

Part III: Interactive Environments

Real-Time Generation of Interactive Virtual Human Behaviours	70
<i>Yue Zheng, Yulia Hicks, Dave Marshall, and Darren Cosker</i>	
CoGenIVE: Building 3D Virtual Environments Using a Model Based User Interface Design Approach	83
<i>Joan De Boeck, Chris Raymaekers, and Karin Coninx</i>	

Computer Vision Theory and Applications

Part I: Image Formation and Processing

Fast Medial Axis Extraction Algorithm on Tubular Large 3D Data by Randomized Erosion	97
<i>Gerald Zwettler, Roland Swoboda, Franz Pfeifer, and Werner Backfrieder</i>	

Self-calibration of Central Cameras from Point Correspondences by Minimizing Angular Error	109
<i>Juho Kannala, Sami S. Brandt, and Janne Heikkilä</i>	
Image Filtering Based on Locally Estimated Geodesic Functions	123
<i>Jacopo Grazzini and Pierre Soille</i>	

Part II: Image Analysis

Computation of Left Ventricular Motion Patterns Using a Normalized Parametric Domain	135
<i>Jaume Garcia-Barnes, Debora Gil, Sandra Pujadas, Francesc Carreras, and Manel Ballester</i>	
Improving Geodesic Invariant Descriptors through Color Information . . .	148
<i>Davide Migliore, Matteo Matteucci, and Pier Paolo Campari</i>	
On Head Pose Estimation in Face Recognition	162
<i>M. Saquib Sarfraz and Olaf Hellwich</i>	

Part III: Image Understanding

Edge-Based Template Matching with a Harmonic Deformation Model	176
<i>Andreas Hofhauser, Carsten Steger, and Nassir Navab</i>	
Implementation of a Model for Perceptual Completion in $R^2 \times S^1$	188
<i>Gonzalo Sanguinetti, Giovanna Citti, and Alessandro Sarti</i>	
Data Compression - A Generic Principle of Pattern Recognition?	202
<i>Gunther Heidemann and Helge Ritter</i>	
Hierarchical Evaluation Model: Extended Analysis for 3D Face Recognition	213
<i>Chauã C. Queirolo, Sidnei A. Drovetto, Luciano Silva, Olga R.P. Bellon, and Maurício P. Segundo</i>	
Estimation of 3D Instantaneous Motion of a Ball from a Single Motion-Blurred Image	225
<i>Giacomo Boracchi, Vincenzo Caglioti, and Alessandro Giusti</i>	

Part IV: Motion, Tracking and Stereo Vision

Integrating Current Weather Effects into Urban Visualization	238
<i>Frank Steinicke, Jörg Mensmann, Kai Rothaus, Jan de Buhr, Antonio Krüger, and Klaus Hinrichs</i>	

Guided KLT Tracking Using Camera Parameters in Consideration of Uncertainty	252
<i>Michael Trummer, Joachim Denzler, and Christoph Munkelt</i>	
Automated Object Identification and Position Estimation for Airport Lighting Quality Assessment	262
<i>James H. Niblock, Jian-Xun Peng, Karen R. McMenemy, and George W. Irwin</i>	
Author Index	277
