

Contents

Introduction and Keynote Paper

1. Automating Instructional Design: An Introduction 1
Robert D. Tennyson and J. Michael Spector

2. Infrastructure for Courseware Engineering 11
Peter Goodyear

Part 1. Planning

3. Instructional System Development: The Fourth Generation 33
Robert D. Tennyson

4. Looking for the "Right" Answers or Raising the "Right" Questions?
A Dialogical Approach to Automating Instructional Design 79
Juana M. Sancho Gil

5. Open-Ended Learning Environments: Foundations, Assumptions,
and Implications for Automated Design 101
Michael J. Hannafin

6. Psychological Processes of Planning in Instructional Design
Teams: Some Implications for Automating Instructional Design 131
Markus Latzina and Franz Schott

7. Psychological Foundations for Automated Instructional Design 149
Robert L. Elmore and Robert D. Tennyson

Part 2. Production

8. Automating Decision Support in Instructional System Development:
The Case of Delivery Systems 177
Norbert M. Seel, Louise D. Eichenwald, and Nora F. N. Penterman

9. Scalability in Instructional Method Specification:
An Experiment-Directed Approach 217
Hein P. M. Krammer, Jan Bosch, and Sanne Dijkstra

10. Complex Technology-Based Learning Environment 245
Jorma Enkenberg

11. Fuzzy Logic Instructional Models: The Dynamic Construction of Programming Assignments in CASCO	265
<i>Jeroen J. G. van Merriënboer, Jaap Jan Luursema, Hans Kingma, Frans Houweling, and Arjen P. de Vries</i>	
12. Integrated Courseware Engineering System	303
<i>Robert D. Tennyson and Robert L. Elmore</i>	
13. Automated Instructional Design via Instructional Transactions	317
<i>Richard W. Cline and M. David Merrill</i>	
14. Integrating Systems Thinking and Instructional Science	355
<i>José J. Gonzalez and Pål Davidsen</i>	
15. Automated Instructional Design Advising	377
<i>J. Michael Spector and Darryl Song</i>	
16. Facilitating Discovery Learning in Computer-Based Simulation Environments	403
<i>Lars Vavik</i>	

Part 3. Implementation

17. Designing an Interactive Instructional Design Tool: Overcoming the Problem of Indirection	449
<i>Robin Johnson</i>	
18. Toward a Model for Evaluating Automated Instructional Design Systems	473
<i>Begoña Gros</i>	
19. Evaluation as a Tool for Research and Development: Issues and Trends in Its Applications in Educational Technology	491
<i>Steven M. Ross and Gary R. Morrison</i>	
20. Integrating and Humanizing the Process of Automating Instructional Design	523
<i>J. Michael Spector</i>	

Part 4. Working Group Summaries

21. Automating the Production of Instructional Material 547
Working Group: *Sonia Bartoluzzi (Chair), John Gammack, Michael Kerres, Hilbert Kuiper, Wisam Mansour, Alice Scandura, Katrin Schöpf, and Arvid Staupe*

22. Automating Instructional Planning 559
Working Group: *Jacqueline Bourdeau (Chair), Stefan Junginger, Michiel Kuiper, Ian Marshall, Scott Schwab, and Bernd Sorg*

23. Instructional System Development: Contributions to Automating Instructional Design Planning 571
Working Group: *Jorge Franchi (Chair), Mark Heidenfeld, Leif Martin Hokstad, Detlev Leutner, Janet McCracken, Sven Smars, Antje Völker, and Catherine Witt*

24. A Model of Interaction: In Search of a Holy Grail 581
Working Group: *Ann E. Barron (Chair), Bernd Dahn, Tricia Jones, Christen Krogh, Markus Latzina, Nigel Oxley, and Lara Stefansdottir*

Part 5. Appendem

25. Employment of System Dynamics in Modeling of Instructional Design (ISD⁴) 603
Grimstad Group: *Robert D. Tennyson, J. Michael Spector, José J. Gonzalez, Pål I. Davidsen, and Daniel J. Muriada*
