Part I Methods of Neuroimaging and Assessment of Oral Functions 1

1	Introduction to Neuroimaging and the Brain–Stomatognathic Axis	3
1.1	Why Do Dentists Need to Understand the Brain?	3
1.2	What Is Neuroimaging?	6
1.3	How Does Neuroimaging Contribute to Clinical Practice?	15
1.4	The Brain–Stomatognathic Axis	17
	Further Readings	21
	References	22
2	Assessment of Human Brain Using MRI	25
2.1	Advantages and Limitations of Magnetic Resonance Imaging of the Brain	25
2.2	Research of Task-based Functional Activation	30
2.3	Research of Structural Features of the Brain	39
2.4	Research of Brain Connectivity	45
	Further Readings	56
	References	56
3	Assessment of Oral Functions	59
3.1	Assessment of Masticatory and Swallowing Performance	59
3.2	Assessment of Orofacial Pain and Somatosensory Experience	68
3.3	Assessment of Cognitive Functions and Emotional Experience	77
	Further Readings	81
	References	81

Part II Neuroimaging Research of Brain Mechanisms of Oral Functions 89**4 Brain Mechanisms of Oral Motor Functions 91**

- 4.1 Introduction of Brain Mechanisms of Motor Control 91
- 4.2 Brain Mechanisms of Human Mastication 98
- 4.3 Brain Mechanisms of Human Swallowing 109
- 4.4 Cognitive Processing and Motor Learning of Oromotor Movement 116
- Further Readings 120
- References 121

5 Brain Mechanisms of Oral Sensory Functions 128

- 5.1 Brain Mechanisms of Oral Somatosensory Processing 128
- 5.2 Brain Mechanisms of Gustation 136
- 5.3 Cognitive–Affective Issues of Oral Sensory Functions 141
- 5.4 Brain Mechanisms of Multisensory Integration 149
- Further Readings 154
- References 154

6 Brain Mechanisms of Pain and Anxiety of Dental Patients 161

- 6.1 Brain Mechanisms Related to Pain 161
- 6.2 Chronic Pain, Neural Plasticity and Central Sensitization 170
- 6.3 Brain Mechanisms of Chronic Orofacial Pain 178
- 6.4 Brain Mechanisms of Dental Fear and Anxiety 191
- Further Readings 199
- References 200

Part III Translational Research of Dental Neuroimaging 213**7 Age-related Differences in the Brain–Stomatognathic Axis 215**

- 7.1 Age-related Differences in Brain Mechanisms 215
- 7.2 Age-related Changes in Oral Sensorimotor Functions 220
- 7.3 Association Between the Brain and Oral Functions in Older People 229
- 7.4 Association Between Oral Conditions and Neurodegenerative Disorders 235
- Further Readings 245
- References 245

8 Brain Mechanisms of Adaptation of Oral Sensorimotor Functions 254

- 8.1 Brain Plasticity and Adaptation 254
- 8.2 Adaptation of Pain and Oral Sensory Functions 260
- 8.3 Functional Adaptation of Mastication and Swallowing 266
- 8.4 Brain Plasticity Associated with Oral Functional Training 271
- Further Readings 275
- References 275

9	A Synthesis Between Neuroimaging and Oral Healthcare	281
9.1	Assessment of Individual Differences in Brain–Stomatognathic Axis	281
9.2	Future Direction of Neuroimaging in Oral Neuroscience	287
	Further Readings	290
	References	290
	Index	292
