

Contents

Part I Overview of Cosmological Parameters and Concept

Cosmological Parameters

J.R. Primack 3

The Cosmological Constant Problems

S. Weinberg 18

The Cosmological Constant from the Viewpoint of String Theory

E. Witten 27

The Dark Matter Telescope

J.A. Tyson et al. 37

Part II The Cosmological Constant Evidence

Dust Versus Supernova Cosmology

T. Totani 53

Measurement of the Cosmological Constant from Galactic Velocity Rotation Data

G.V. Kraniotis, S.B. Whitehouse 66

An Introduction to Quintessence

R.R. Caldwell 74

Is the Λ CDM Model Consistent with Observations of Large-Scale Structure?

E. Gawiser 92

Light Scalars in Cosmology

R.D. Peccei 98

Part III Precision Cosmology Measurements

Optimal Supernova Search Strategies

D. Huterer and M.S. Turner 107

The Second Peak: The Dark-Energy Density and the Cosmic Microwave Background

M.Kamionkowski and A. Buchalter 119

Latest Cosmological Constraints on the Densities of Hot and Cold Dark Matter

M. Tegmark et al. 128

Prospects for MAP & PLANCK

E.L. Wright 138

Studying Dark Matter with ACBAR on Viper

J.B. Peterson et al. 143

Resonant Photon-Graviton Conversion as a Probe into Inflationary Universe

P. Chen 149

Part IV Baryonic Dark Matter

Death of Stellar Baryonic Dark Matter

K. Freese et al. 159

EROS Microlensing Results: Not Enough Machos in the Galactic Halo

E. Aubourg 168

Neutralino Dark Matter Versus Galaxy Formation

P. Gondolo 177

Cosmological Relativity: A General-Relativistic Theory for the Accelerating Expanding Universe

M. Carmeli and S. Behar 182

Part V Theory of Dark Matter Processes

Relic Neutralinos and Dark Matter

N. Fornengo 195

CP Violation and Dark Matter

U. Chattopadhyay et al. 203

Mirror Dark Matter <i>R.N. Mohapatra and V.L. Teplitz</i>	211
Neutralino Proton Cross Sections for Dark Matter in SUGRA and D-BRANE Models <i>R. Arnowitt et al.</i>	222
Antimatter from Supersymmetric Dark Matter <i>F. Donato</i>	236
Relic Abundances and the Boltzmann Equation <i>M. Srednicki</i>	244
Supersymmetry, Q-Balls, and Dark Matter <i>A. Kusenko</i>	248
SIMP (Strongly Interacting Massive Particle) Search <i>V.L. Teplitz et al.</i>	256
Self-Interacting Dark Matter <i>B.D. Wandelt et al.</i>	263
Prediction of Ω_M and Estimate of Ω_Λ <i>H.P. Noyes</i>	275
Accurate Dark Matter Theory and Exact Solutions <i>M.J. Ivanov</i>	281
Part VI Possible Evidence for Dark Matter Particles	
Recent DAMA Results <i>R. Bernabei et al.</i>	293
Annual Signal Modulation to Search for WIMPs and Direct Searching <i>E. Choi et al.</i>	309
Recent Results from the Cryogenic Dark Matter Search for Weakly Interacting Massive Particles <i>R.J. Gaitskell et al.</i>	322
Pulse Shape Discrimination and Dark Matter Search with NaI (TI) Scintillator at the Laboratoire Souterrain de Modane <i>G. Gerbier et al.</i>	333
Interpretation of the Anomalous NaI Events <i>G. Chardin et al.</i>	340

Combining Information from Direct and Indirect Searches for WIMPs	
<i>A. Bottino</i>	349

Part VII Search for Dark Matter Particles Around the World

Progress on the Boulby Mine Dark Matter Experiments	
<i>N.J.C. Spooner et al.</i>	365

Status of the EDELWEISS Experiment	
<i>M. De Jésus et al.</i>	378

Status of Dark Matter Search with the HDMS Experiment and the GENINO Project	
<i>B. Majorovits et al.</i>	387

The CRESST Dark Matter Search	
<i>J. Jochum et al.</i>	399

Dark Matter Experiments in the Canfranc Underground Laboratory	
<i>F.T. Avignone III and A. Morales</i>	409

Dark Matter Results in the MIBETA Experiment	
<i>S. Pirro et al.</i>	420

Search for Dark Matter WIMPs Using Upward-Going Muons in Super-Kamiokande	
<i>S. Desai</i>	428

Search for SUSY Dark Matter with CMS at LHC	
<i>S. Shevchenko</i>	440

Part VIII New Detectors for the Dark Matter Search

Design of the ZEPLIN II Detector	
<i>H. Wang et al.</i>	453

Development of a Two-Phase Xenon Discriminating Detector for Use in Dark Matter Searches at the Boulby Underground Laboratory	
<i>D.Y. Akimov et al.</i>	461

A Project of a New Detector for Direct Dark Matter Search: MACHe3	
<i>D. Santos et al.</i>	469

Status and Prospects for SIMPLE

J.I. Collar et al. 477

**Measurement of Scintillation Amplification in a Xenon Detector
with a CsI-Luminescence Plate**

D. Cline et al. 485

Hot and Cold Dark Matter Search with GENIUS

L. Baudis et al. 493

Part IX Hot Dark Matter

Large Extra Dimensions and Hot Dark Matter

D.O. Caldwell 507

**Detecting Ultra High Energy Neutrinos
by Upward Tau Airshowers and Gamma Flashes**

D. Fargion 516

**Super-Kamiokande 0.07 eV Neutrinos in Cosmology:
Hot Dark Matter and the Highest Energy Cosmic Rays**

G.B. Gelmini 525

**Future Neutrino Astrophysics Projects
at the UK Boulby Mine**

P.F. Smith et al. 532

Symposium Agenda 541
