

Table of Contents

Molecular Networks and Information Systems	1
<i>Stefan Węgrzyn and Lech Znamirowski</i>	
Sorting of Quantum States with Respect to Amount of Entanglement Included	11
<i>Roman Gielerak and Marek Sawerwain</i>	
Management of Web Services Based on the Bid Strategy Using the User Valuation Function	19
<i>Jolanta Wrzuszcak and Leszek Borzemski</i>	
A Markovian Model of a Call Center with Time Varying Arrival Rate and Skill Based Routing	26
<i>Jarosław Bylina, Beata Bylina, Andrzej Zola, and Tomasz Skaraczyński</i>	
A Novel Multicast Routing Protocol for Mobile Sensor Networks with Topology Control	34
<i>Jerzy Martyna and Marcin Nowrot</i>	
On the Lifetime Maximization Design of Mobile Ad Hoc and Sensor Networks	50
<i>Jerzy Martyna</i>	
Modeling of the Throughput Capacity of Hierarchical Mobile Ad Hoc and Sensor Networks	62
<i>Jerzy Martyna</i>	
Object Oriented Vertical Communication in Distributed Industrial Systems	72
<i>Rafał Cupek, Marcin Fojcik, and Olav Sande</i>	
Combining Timed Colored Petri Nets and Real TCP Implementation to Reliably Simulate Distributed Applications	79
<i>Wojciech Rząsa</i>	
Adaptive Streaming of Stereographic Video	87
<i>Krzysztof Grochla and Arkadiusz Sochan</i>	
The Influence of Electromagnetic Disturbances on Data Transmission in USB Standard	95
<i>Michał Maćkowski</i>	
Electromagnetic Emission Measurement of Microprocessor Units	103
<i>Michał Maćkowski and Krzysztof Skoroniak</i>	

Software Influence Upon AX.25 Protocol Performance	111
<i>Bartłomiej Zieliński</i>	
Buffer Capacity Adjustment for TNC Controller	119
<i>Bartłomiej Zieliński</i>	
The Reliability of Any-Hop Star Networks with Respect to Failures of Communication Nodes	127
<i>Jadwiga Kozłowska</i>	
A Floor Description Language as a Tool in the Process of Wireless Network Design	135
<i>Remigiusz Olejnik</i>	
Dependencies and Configurations of Solutions in Multicriteria Optimization in Nets	143
<i>Henryk Piech</i>	
Web Traffic Modeling for E-Commerce Web Server System	151
<i>Leszek Borzemski and Grażyna Suchacka</i>	
RULEGO Bioinformatical Internet Service – System Architecture	160
<i>Aleksandra Gruca, Marek Sikora, Łukasz Chróst, and Andrzej Polański</i>	
On the Performance of AQM Algorithms with Small Buffers	168
<i>Łukasz Chróst, Agnieszka Brachman, and Andrzej Chydzński</i>	
Adaptive RED in AQM	174
<i>Joanna Domańska and Adam Domański</i>	
QoS Aware MPLS Multicast in the MAN DiffServ Domain	184
<i>Sławomir Przyłucki</i>	
ServeR: .NET-Based Infrastructure for Remote Services of Statistical Computing with R-Project	192
<i>Dariusz Rafał Augustyn and Łukasz Warchał</i>	
Modelling of Multi-tier Internet Applications with the Use of BCMP Queueing Networks and Simulation Model in Simulink	200
<i>Andrzej Imielowski</i>	
Disaster's Impact on Internet Performance – Case Study	210
<i>Tomasz Biłski</i>	
Creating 3D Web-Based Viewing Services for DICOM Images	218
<i>Adam Piorkowski, Łukasz Jajec, and Kamil Szostek</i>	
Efficiency Analysis of the Server-Side Numerical Computations	225
<i>Adam Piorkowski and Daniel Plodzien</i>	

Adaptive Approach to Network Security	233
<i>Bogdan Ksiezopolski, Zbigniew Kotulski, and Pawel Szalachowski</i>	
PROFINET I/O Network Analyzer	242
<i>Rafał Cupek, Markus Bregulla, and Łukasz Huczala</i>	
Dual Bus as a Method for Data Interchange Transaction Acceleration in Distributed Real Time Systems	252
<i>Andrzej Kwiecień and Marcin Sidzina</i>	
Hierarchical Petri Net for the CPDev Virtual Machine with Communications	264
<i>Dariusz Rzońca and Bartosz Trybus</i>	
IEEE 802.11 Medium Access Mechanisms in Industrial Applications	272
<i>Wojciech Domagała</i>	
The General Concept of a Distributed Computer System Designed for Monitoring Rock Movements	280
<i>Piotr Gaj and Błażej Kwiecień</i>	
Remote Monitoring of Geological Activity of Inclined Regions –The Concept	292
<i>Jarosław Flak, Piotr Gaj, Krzysztof Tokarz, Stanisław Widel, and Adam Ziębiński</i>	
The IEEE Wireless Standards as an Infrastructure of Smart Home Network	302
<i>Mateusz Grabowski and Grzegorz Dziwoki</i>	
The Graphic Representation of Areas of Rough Sets Characterizing the Groups of Scheduled Tasks	310
<i>Henryk Piech</i>	
The Problem of Bandwidth Allocation in the Business Activity of Service Providers: Comparison and Analysis of Costs	318
<i>Bartosz Marcinkowski and Piotr Ostrowski</i>	
Network Transmission of 3D Mesh Data Using Progressive Representation	325
<i>Krzysztof Skabek and Łukasz Ząbik</i>	
Application of Distributed System in Control and Diagnostic Toothed Gears	334
<i>Andrzej Kwiecień, Jacek Rysiński, and Marcin Sidzina</i>	

Improving Availability of Industrial Monitoring Systems through Direct
Database Access 344
 Arkadiusz Jestratjew
