Abstract	i
Kurzfassung	iii
List of Figures	ix
List of Tables	xiii
List of Abbreviations and Symbols	xv
1. Introduction	1
1.1. Catalytically Active Surfaces	1
1.2. Material Selection	4
1.2.1. Additively Manufactured Hydrogel	5
1.2.1.1. State of the Art	7
1.2.1.2. Additive Manufacturing of Hydrogels . .	8
1.2.1.3. Imprinted Biocatalysts	9
1.2.2. Surface-Initiated <i>Smart</i> Polymer Synthesis	10
1.2.2.1. State of the Art	11
1.2.2.2. Surface Functionalization	12
1.2.3. Spider Silk Fusion Protein	17
1.2.3.1. State of the Art	18
1.2.3.2. Processing Techniques	19
1.3. Model Reactions	22
2. <i>Smart</i> Reactors in Biocatalysis - Motivation and Objectives	27
3. Materials and Methods	29
3.1. Hydrogel Synthesis	29

3.2.	Polymer Grafting from Particles and 3D-Printed Structures	30
3.2.1.	Amino-Functionalization	31
3.2.2.	Initiator-Modification	31
3.2.3.	Polymer Layer Synthesis	32
3.3.	Characterization Methods	33
3.3.1.	Proton Nuclear Magnetic Resonance (NMR) . . .	33
3.3.2.	Micro Computed Tomography (μ -CT)	34
3.3.3.	Fluorescence Microscopy	34
3.3.4.	Scanning Electron Microscopy (SEM)	35
3.3.5.	Fourier-Transform Infrared Spectroscopy	35
3.3.6.	NCHS-Analytics	35
3.3.7.	Inductively Coupled Plasma Mass Spectrometry (ICP-MS)	36
3.3.8.	X-ray Photoelectron Spectroscopy (XPS)	36
3.3.9.	Thermogravimetric Analysis (TGA)	36
3.4.	Recombinant Production of Esterase 2	37
3.4.1.	Fusion Protein Est2-C16	38
3.4.2.	Hydrogel Assembly	38
3.5.	Biochemical Characterization Methods	38
3.5.1.	Standard Activity Assay	38
3.5.1.1.	<i>p</i> NP Extinction Coefficient	39
3.5.1.2.	Protein Concentration	39
3.5.1.3.	pH-/T-Dependent Activity and Stability	39
3.5.1.4.	Influence of Buffer and Additives	40
3.5.1.5.	Storage Stability	40
3.5.2.	Substrate Screening Esterase 2	41
3.6.	Model Reactions	41
3.6.1.	Esterase 2	41
3.6.2.	CalB	42
3.6.3.	Batch Reaction	42

3.6.4. Rotating Bed Reactor	42
3.6.5. Gas Chromatography	43
3.6.5.1. Esterase 2	43
3.6.5.2. CalB	44
3.7. Immobilization Methods	45
4. Biocatalytic Surfaces Through Additively Manufactured Hydrogels	47
4.1. Formulation of 3D-Printed Hydrogels	47
4.2. Characterization of Hydrogels	49
4.3. Application of Hydrogels as Immobilization Matrix in Aqueous and Organic Solvents	52
4.4. Interim Summary	56
5. Surface Modifications of 3D-printed Structures - Smart Materials	57
5.1. Choice and Analysis of Additively Manufacturable Material	57
5.2. Polymer Synthesis for Surface Enhancement on Polyamide 12	61
5.2.1. Chemical Characterization of PA12 Surfaces	62
5.2.2. Optimization of Surface-Induced Polymer Synthesis	66
5.2.3. Topographic Characterization of Modified PA12 Surfaces	71
5.2.4. Thickness Determination of Grafted PAA Layer . .	75
5.3. Influence of Grafted Polymer Layer on Stimuli-Sensitive Behavior	77
5.4. Influence of Grafted Polymer Layer on Enzyme Activity .	80
5.4.1. Immobilization of Esterase 2 from <i>Alicyclobacillus acidocaldarius</i>	81
5.4.2. Immobilization of Lipase B from <i>Candida antarctica</i>	83
5.5. Application in Batch Reactor	86

5.6. Interim Summary	93
6. Spider Silk Fusion Protein - Towards Biocatalytically Active Surfaces	95
6.1. Biochemical Characterization	95
6.1.1. Temperature- and pH-dependent Activity and Stability	95
6.1.2. Storage Stability	99
6.1.3. Influence of Additives	99
6.1.4. Substrate Scope	102
6.1.5. Kinetic Investigation of Butyl Levulinate Hydrolysis	103
6.2. Process Stability of Spider Silk Fusion Protein	105
6.3. Interim Summary	108
7. Overall Discussion and Outlook	109
7.1. Paving the Way to <i>smart</i> Reactors	109
7.2. Implementing <i>smart</i> Reactors in Industry - Technology Readiness Level	112
8. Summary	115
Bibliography	117
A. Appendix	149
A.1. Buffer Composition	149
A.2. TGA Results Silica-PP Filament	150
A.3. Polymer Conversion Determination - NMR	151
A.4. μ -CT Images	152
A.5. Influence of Additives on Est2-WT and Est2-C16 Activities	153
A.6. Matlab Script - Kinetics	155
