Glossary *xii*

- 1 History of Dental Implants** *1*
- 2 Osseointegration** *7*
 - Concept *7*
 - Factors affecting Osseointegration *8*
 - Implant Related *8*
 - Environment Related *19*
 - Success vs Survival *22*
 - New Concepts *24*
- 3 Implant Systems** *28*
 - Components *28*
 - Fixture *28*
 - Transmucosal *32*
 - Implant Types *33*
 - Prosthetic *36*
 - Abutments *38*
 - Screws *39*
 - Torque Wrench *39*
 - Laboratory *39*
 - Implant systems *40*
- 4 Patient Selection and Indications for Treatment** *43*
 - Patient Selection *44*
 - Generic Planning *45*
 - Site Specific Planning *48*
 - Indications for implant Treatment *54*
 - Follow up care *58*

5 Surgical and Prosthodontic Protocols 60

Surgical Protocols 60

- Timing of Implant Fixture Placement 61

- Computer Guided placement 65

Augmentation Procedures 66

- Timing 67

- Techniques 70

- Materials 73

Prosthodontic Protocols 78

- Type of Prosthesis 79

- Complications 83

Loading Protocols 85

Constructing the Prosthesis 85

Fitting the Prosthesis 87

Post insertion Instructions 87

Outcomes 88

6 Peri-Implant Tissues 90

Anatomy 90

Health 93

Disease 94

- Factors to consider 94

- Periimplant Mucositis 95

- Peri-implantitis 96

Assessment 99

Treatment 99

7 Maintenance Care around Dental Implants 109

Definition 109

Principles 110

Components 112

Intervals 118

Treatment During Maintenance care 122

Criteria for Success and Failure Dental Implant Retained Restorations 127

8 Role of the Hygienists/Therapists 129

Role as a Clinician 131

Role as an Educator 134

Implant Systems 138

Implant Restoration Types 138
