Preface to the fifth edition ix

About the companion website xi

Part 1

Concepts 1

- 1 Microbial pathogens, classification and concepts 2
- 2 Innate and acquired immunity 4
- 3 The 'normal' flora in health and disease 6
- 4 Pathogenicity and pathogenesis of infectious disease 8
- 5 Making a microbiological diagnosis of infection 10
- 6 Antimicrobial therapy – principals and concepts 12
- 7 Antibacterial agents – pharmacology and modes of action 14
- 8 Antimicrobial use and stewardship 16
- 9 Emergence and detection of resistance 18
- 10 Sources and transmission of infection 20
- 11 Principles of infection control 22
- 12 Infection in the healthcare environment 24
- 13 Immunization 26
- 14 Emerging infections 28
- 15 High consequence infectious diseases and bioterrorism preparedness 30

Part 2

Bacteriology 33

- 16 *Staphylococcus* 34
- 17 Haemolytic streptococcal infections 36
- 18 Other Gram-positive cocci and the alpha-haemolytic streptococci 38
- 19 *Streptococcus pneumoniae* 40
- 20 *Listeria*, *Bacillus*, non-diphtheria *Corynebacterium* 42
- 21 Diphtheria, tetanus and pertussis 44
- 22 *Mycobacterium tuberculosis* 46
- 23 Non-tuberculous mycobacteria and leprosy 48
- 24 *Clostridium* 50
- 25 Non-sporing anaerobic infections 52
- 26 *Neisseria* and *Moraxella* 54
- 27 Small Gram-negative coccobacilli: *Haemophilus*, *Brucella*, *Francisella*, *Yersinia* and *Bartonella* 56
- 28 Pathogenicity of enteric Gram-negative bacteria 58
- 29 Enterobacteriaceae clinical syndromes 60

- 30** *Vibrio, Campylobacter and Helicobacter* 62
- 31** Environmental pathogens: *Pseudomonas, Burkholderia, Legionella* and *Acinetobacter* 64
- 32** *Chlamydia, Mycoplasma* and *Rickettsia* 66
- 33** Spiral bacteria 68

Part 3

Virology 71

- 34** Virus structure and classification 72
- 35** Antiviral therapy 74
- 36** Herpesviruses I 76
- 37** Herpesviruses II 78
- 38** DNA viruses: adenovirus, parvovirus and poxvirus 80
- 39** Measles, mumps and rubella 82
- 40** Influenza viruses 84
- 41** Parainfluenza and other respiratory viruses 86
- 42** Enterovirus and viruses that infect the gastrointestinal tract 88
- 43** Hepatitis viruses 90
- 44** Tropical, exotic or arbovirus infections 92

Part 4

Mycology 95

- 45** Yeast infections 96
- 46** Filamentous fungi 98
- 47** Antifungal drugs and antifungal therapy 100

Part 5

Parasitology 103

- 48** Intestinal protozoa 104
- 49** Malaria, leishmaniasis and trypanosomiasis 106
- 50** Intestinal helminths 108
- 51** Tissue helminths 110

Part 6

Systemic infection 113

- 52** Congenital and perinatal infections 114
- 53** HIV infection and AIDS 116
- 54** Pyrexia of unknown origin and puerperal sepsis 118
- 55** Sepsis 120
- 56** Endocarditis, myocarditis and pericarditis 122
- 57** Infections of the central nervous system 124
- 58** Acute respiratory tract infections 126
- 59** Chronic infections of the lung and hospital acquired pneumonia 128
- 60** Urinary and genital infections 130
- 61** Infections of the bones and joints 132
- 62** Bacterial diarrhoeal disease 134
- 63** Zoonoses 136
- 64** Infections in immunocompromised patients 138
- 65** Ocular infections 140
- 66** Infections of the skin and soft tissue 142

Index 144
