Preface	V
1 Radioactivity in Nature	1
1.1 Discovery of Radioactivity	1
1.2 Radioactive Substances in Nature	1
Literature	4
2 Radioelements, Isotopes and Radionuclides	5
2.1 Periodic Table of the Elements	5
2.2 Isotopes and the Chart of the Nuclides	6
2.3 Stability and Transmutation of Nuclides	10
2.4 Binding Energies of Nuclei	11
2.5 Nuclide Masses	14
Literature	16
3 Physical Properties of Atomic Nuclei and Elementary Particles	19
3.1 Properties of Nuclei	19
3.2 Elementary Particles and Quarks	24
Literature	27
4 Radioactive Decay	29
4.1 Decay Series	29
4.2 Law and Energy of Radioactive Decay	32
4.3 Radioactive Equilibria	35
4.4 Secular Radioactive Equilibrium	37
4.5 Transient Radioactive Equilibrium	39
4.6 Half-life of Mother Nuclide Shorter than Half-life of Daughter Nuclide	40
4.7 Similar Half-lives	41
4.8 Branching Decay	42
4.9 Successive Transformations	44
Literature	46
5 Decay Modes	47
5.1 Survey	47
5.2 Alpha-Decay	49
5.3 Beta-Decay	53
5.4 Gamma-Transitions	61
5.5 Proton-Decay and Other Rare Decay Modes	66
5.6 Spontaneous Fission	67
Literature	72

6	Nuclear Radiation	75
6.1	General Properties	75
6.2	Alpha Radiation	77
6.3	Beta Radiation	81
6.4	Gamma Radiation	85
6.5	Neutrons	90
6.6	Short-lived Elementary Particles in Atoms and Molecules	91
	Literature	93
7	Measurement of Nuclear Radiation	95
7.1	Activity and Counting Rate	95
7.2	Gas-filled Detectors	100
7.3	Scintillation Detectors	104
7.4	Semiconductor Detectors	106
7.5	Choice of Detectors	110
7.6	Spectrometry	113
7.7	Determination of Absolute Disintegration Rates	116
7.8	Use of Coincidence and Anticoincidence Circuits	117
7.9	Low-level Counting	117
7.10	Neutron Detection and Measurement	118
7.11	Statistics and Errors of Counting	119
7.12	Track Detectors	120
7.13	Detectors Used in Health Physics	124
	Literature	125
8	Nuclear Reactions	127
8.1	Mono- and Binuclear Reactions	127
8.2	Energetics of Nuclear Reactions	128
8.3	Projectiles for Nuclear Reactions	130
8.4	Cross Sections of Nuclear Reactions	134
8.5	Yield of Nuclear Reactions	138
8.6	Investigation of Nuclear Reactions	143
8.7	Mechanisms of Nuclear Reactions	144
8.8	Low-energy Reactions	146
8.9	Nuclear Fission	149
8.10	High-energy Reactions	158
8.11	Heavy-ion Reactions	162
8.12	Nuclear Fusion--Thermonuclear Reactions	165
	Literature	169

9	Chemical Effects of Nuclear Reactions	171
9.1	General Aspects	171
9.2	Recoil Effects	172
9.3	Excitation Effects	177
9.4	Gases and Liquids	181
9.5	Solids	184
9.6	Szilard–Chalmers Reactions	188
9.7	Recoil Labelling and Self-labelling	189
	Literature	191
10	Influence of Chemical Bonding on Nuclear Properties	193
10.1	Survey	193
10.2	Dependence of Half-lives on Chemical Bonding	194
10.3	Dependence of Radiation Emission on Chemical Bonding	195
10.4	Mössbauer Spectrometry	195
	Literature	199
11	Nuclear Energy, Nuclear Reactors, Nuclear Fuel and Fuel Cycles	201
11.1	Energy Production by Nuclear Fission	201
11.2	Nuclear Fuel and Fuel Cycles	206
11.3	Production of Uranium and Uranium Compounds	211
11.4	Fuel Elements	213
11.5	Nuclear Reactors, Moderators and Coolants	217
11.6	Reprocessing	224
11.7	Radioactive Waste	229
11.8	The Natural Reactors at Oklo	232
11.9	Controlled Thermonuclear Reactors	233
11.10	Nuclear Explosives	235
	Literature	236
12	Production of Radionuclides and Labelled Compounds	239
12.1	Production in Nuclear Reactors	239
12.2	Production by Accelerators	244
12.3	Separation Techniques	249
12.4	Radionuclide Generators	253
12.5	Labelled Compounds	255
	Literature	261
13	Special Aspects of the Chemistry of Radionuclides	265
13.1	Short-lived Radionuclides and the Role of Carriers	265
13.2	Radionuclides of High Specific Activity	267
13.3	Microamounts of Radioactive Substances	267
13.4	Radiocolloids	272
13.5	Tracer Techniques	274
	Literature	275

14 Radioelements	277
14.1 Natural and Artificial Radioelements	277
14.2 Technetium and Promethium	280
14.3 Production of Transuranium Elements	283
14.4 Further Extension of the Periodic Table of the Elements	292
14.5 Properties of the Actinides	295
14.6 Properties of the Transactinides	301
Literature	306
15 Radionuclides in Geo- and Cosmochemistry	309
15.1 Natural Abundances of the Elements and Isotope Variations	309
15.2 General Aspects of Cosmochemistry	312
15.3 Early Stages of the Universe	313
15.4 Synthesis of the Elements in the Stars	315
15.5 Evolution of the Stars	317
15.6 Evolution of the Earth	318
15.7 Interstellar Matter and Cosmic Radiation	320
Literature	321
16 Dating by Nuclear Methods	323
16.1 General Aspects	323
16.2 Cosmogenic Radionuclides	324
16.3 Terrestrial Mother/Daughter Nuclide Pairs	328
16.4 Natural Decay Series	330
16.5 Ratios of Stable Isotopes	332
16.6 Radioactive Disequilibria	333
16.7 Fission Tracks	334
Literature	335
17 Radioanalysis	337
17.1 General Aspects	337
17.2 Analysis on the Basis of Inherent Radioactivity	338
17.3 Neutron Activation Analysis (NAA)	340
17.4 Activation by Charged Particles	344
17.5 Activation by Photons	346
17.6 Special Features of Activation Analysis	347
17.7 Isotope Dilution Analysis	349
17.8 Radiometric Methods	351
17.9 Other Analytical Applications of Radiotracers	353
17.10 Absorption and Scattering of Radiation	353
17.11 Radionuclides as Radiation Sources in X-ray Fluorescence Analysis (XFA)	354
Literature	355

18 Radiotracers in Chemistry	357
18.1 General Aspects	357
18.2 Chemical Equilibria and Chemical Bonding	357
18.3 Reaction Mechanisms in Homogeneous Systems	359
18.4 Reaction Mechanisms in Heterogeneous Systems	363
18.5 Diffusion and Transport Processes	368
18.6 Emanation Techniques	369
Literature	372
19 Radionuclides in The Life Sciences	373
19.1 Survey	373
19.2 Application in Ecological Studies	374
19.3 Radioanalysis in The Life Sciences	374
19.4 Application in Physiological and Metabolic Studies	376
19.5 Radionuclides Used in Nuclear Medicine	377
19.6 Single Photon Emission Tomography (SPET)	380
19.7 Positron Emission Tomography (PET)	381
Literature	382
20 Technical and Industrial Applications of Radionuclides and Nuclear Radiation	385
20.1 Radiotracer Techniques	385
20.2 Absorption and Scattering of Radiation	387
20.3 Radiation-induced Reactions	388
20.4 Energy Production by Nuclear Radiation	391
Literature	393
21 Radionuclides in the Geosphere and the Biosphere	395
21.1 Sources of Radioactivity	395
21.2 Mobility of Radionuclides in the Geosphere	398
21.3 Reactions of Radionuclides with the Components of Natural Waters	400
21.4 Interactions of Radionuclides with Solid Components of the Geosphere	404
21.5 Radionuclides in the Biosphere	408
Literature	413
22 Dosimetry and Radiation Protection	417
22.1 Dosimetry	417
22.2 External Radiation Sources	420
22.3 Internal Radiation Sources	421
22.4 Radiation Effects in Cells	423
22.5 Radiation Effects in Man, Animals and Plants	424
22.6 Non-occupational Radiation Exposure	427
22.7 Safety Recommendations	429
22.8 Safety Regulations	431
22.9 Monitoring of the Environment	434
Literature	434
