

Contents

1. Introduction	1
1.1 Magnetic Fields of Compact Cosmic Objects	1
1.2 Historical Review	6
1.3 Notations and Abbreviations	11
2. Interacting Charged Particles in Uniform Magnetic Fields	13
2.1 The N -Body Problem	13
2.2 The Uncharged Two-Body Problem	14
2.2.1 Hamiltonian and Wave Functions in Centre-of-Mass and Relative Coordinates	15
2.2.2 Classification, Quantum Numbers and Degeneracy in the Non-Interacting Case	15
2.2.3 Exact Solution for Harmonic Interaction	17
2.3 Scaling Properties of the Coulomb Problem	19
2.3.1 The General Case $K \neq 0$	19
2.3.2 The Special Case $K = 0$	20
2.3.3 Nuclear Charge (Z) Scaling	21
3. Methods of Solution for the Magnetized Coulomb Problem	23
3.1 General Considerations	23
3.1.1 Characteristic Domains of the Magnetic Field Strength	23
3.1.2 Expansions of the Wave Functions and Multiconfiguration Equations	24
3.1.3 Low-Field High-Field Correspondence	26
3.2 Numerical Treatment	29
3.2.1 Hartree-Fock-Like Methods	29
3.2.2 Coupled-Channels-Like Methods	31
3.2.3 Diagonalization Methods	32
4. Results for Low-Lying States	35
4.1 Energy Values	35
4.2 Wavelengths of the Hydrogen Atom	39
4.3 Wave Functions of the Hydrogen Atom	44
4.3.1 Graphic Representation of the Spatial Probability Distribution of the Electron	46
4.3.2 Pictorial Representation of the Spatial Probability Distribution of the Electron	49

5. Energies for Arbitrarily Excited States in Adiabatic Approximation	57
5.1 Asymptotic Property of the Effective Potentials	57
5.2 Numerical Results and Their Accuracy	58
6. Electromagnetic Transition Probabilities	69
6.1 The General Expressions	69
6.2 Effects of the Finite Proton Mass on the Transition Matrix Element	72
6.3 Results	74
6.4 Expressions for Electromagnetic Transitions in Adiabatic Approximation	78
6.4.1 Dipole Strengths	78
6.4.2 Selection Rules	79
6.4.3 Sum Rules	79
6.4.4 Asymptotic Formulae	80
6.4.5 Results and Discussion	82
7. Stationary Lines and White Dwarf Spectra	89
7.1 Stationary Lines	89
7.2 Spectra of Selected Magnetic White Dwarfs	95
7.2.1 Grw+70°8247	95
7.2.2 PG 1031+234	99
7.2.3 SBS 1349+5434	100
7.2.4 PG 1015+014	101
7.2.5 G227-35	101
7.2.6 MR Serpentis	104
7.2.7 LB 11146 (PG 0945+245)	105
7.3 Table of Magnetic White Dwarfs	106
7.4 Future Work	107
8. Relativistic Effects, Nuclear Mass Effects, and Landau-Excited States	109
8.1 Spin-Orbit Coupling	109
8.2 Effects of the Finite Proton Mass and of Motion Perpendicular to the Magnetic Field	113
8.3 Landau-Excited States	116
9. Helium-Like Atoms in Magnetic Fields of Arbitrary Strengths	123
9.1 Correspondence Diagrams	123
9.1.1 Short Review of the One-Electron Problem	123
9.1.2 The Two-Electron System in a Magnetic Field	124
9.1.3 The Correspondence for $1/Z = 0$	126
9.1.4 The Correspondence for the General Case	127

9.2	Method of Solution	129
9.2.1	The Hartree-Fock Method for Low to Intermediate Field Strengths ($\beta_Z \lesssim 1$) ..	130
9.2.2	The Hartree-Fock Method for High Field Strengths ($\beta_Z \gtrsim 1$)	132
9.3	Dipole Strengths, Oscillator Strengths, and Transition Probabilities	134
9.3.1	Selection Rules for the Spherical Ansatz	135
9.3.2	Selection Rules for the Cylindrical Ansatz	135
9.4	Results for the Two-Electron Problem	136
9.4.1	Energy Levels Calculated with a Single-Configuration Ansatz	136
9.4.2	Influence of Configuration Mixing	137
9.4.3	Comparison of Energy Values Obtained by Different Methods	140
9.4.4	Wavelengths, Dipole Strengths, Oscillator Strengths, and Transition Probabilities	143
10.	Highly Excited States	153
10.1	Results	154
10.1.1	Energy Levels	154
10.1.2	Transition Probabilities and Comparison with Experiments	155
10.2	Is There Chaos in Quantum Mechanics?	165
10.2.1	Introduction	165
10.2.2	Microwave Ionisation of Rydberg States of the Hydrogen Atom	167
10.2.3	Statistical Analysis of Energy-Level Sequences	169
10.2.4	Order and Chaos in the Hydrogen Atom in a Magnetic Field	172
10.2.5	Level Statistics for the Hydrogen Atom in Magnetic Fields	174
10.2.6	Resonances in Chaos – the Role of Periodic Orbits ..	175
10.2.7	“Scarring” of Wave Functions	177
	Outlook	183
A1.	Energy Values	185
A1.1	Tables of the Energy Values	185
A1.2	Figures of the Energy Values	217
A2.	Wavelengths	225
A2.1	Figures of the Wavelengths	225
A2.2	Tables of Stationary Wavelengths	231
A2.3	Figures of Stationary Wavelengths	236

A3. Electromagnetic Transition Probabilities	241
A3.1 Wavelengths, Dipole Strengths, Oscillator Strengths, and Transition Rates	241
A3.2 Oscillator Strengths and Transition Probabilities in Adiabatic Approximation	253
A3.3 Dipole Strengths of Stationary Transitions	259
A4. Helium and Helium-Like Atoms	263
A4.1 Tables of the Energy Values	263
A4.2 Wavelengths, Dipole Strengths, Oscillator Strengths, and Transition Rates	283
