

Contents

List of contributing authors — VII

Katrina Knauer

- 1 Circular plastics technologies: introduction — 1**
- 1.1 Plastics – the good, the bad, and the ugly — 1
- 1.2 Recycling – why is it so challenging? — 3
- 1.3 A circular economy – Is chemical recycling the answer? — 5
- References — 6

Katrina M. Knauer, Cody Higginson and Minjung Lee

- 2 Circular plastics technologies: pyrolysis of plastics to fuels and chemicals — 9**
- 2.1 Introduction — 9
- 2.2 Technical scope — 11
- 2.3 Summary and future perspectives — 26
- References — 27

Katrina Knauer, Cody Higginson, Yuanzhe Liang and Minjung Lee

- 3 Circular plastics technologies: depolymerization of polymers into parent monomers — 33**
- 3.1 Introduction — 33
- 3.2 Technical scope — 35
- 3.2.1 Solvolysis — 35
- 3.2.2 Thermal unzipping into monomers — 48
- 3.3 Summary and future outlooks — 52
- References — 53

Katrina Knauer and Minjung Lee

- 4 Circular plastics technologies: open loop recycling of waste plastics into new chemicals — 59**
- 4.1 Introduction — 59
- 4.2 Technical scope — 62
- 4.2.1 Solvolysis — 62
- 4.2.2 Polyolefins — 65
- 4.2.3 Oxidation — 68
- 4.3 Summary and future trends — 70
- References — 71
