

Table of Contents

Tapas: Theory Combinations and Practical Applications (Invited Talk)	1
<i>Nikolaj Bjørner and Leonardo de Moura</i>	
Max-plus Algebraic Tools for Discrete Event Systems, Static Analysis. and Zero-Sum Games (Invited Talk)	7
<i>Stéphane Gaubert</i>	
Approximations of Discrete, Continuous, and Hybrid Systems (Invited Talk)	12
<i>George J. Pappas</i>	
Volume and Entropy of Regular Timed Languages: Analytic Approach	13
<i>Eugene Asarin and Aldric Degorre</i>	
Synthesis of Non-Interferent Timed Systems	28
<i>Gilles Benattar, Franck Cassez, Didier Lime, and Olivier H. Roux</i>	
Critical Paths in the Partial Order Unfolding of a Stochastic Petri Net	43
<i>Anne Bouillard, Stefan Haar, and Sidney Rosario</i>	
Speeding Up Model Checking of Timed-Models by Combining Scenario Specialization and Live Component Analysis	58
<i>Víctor Braberman, Diego Garbervestky, Nicolás Kicillof, Daniel Monteverde, and Alfredo Olivero</i>	
Efficient On-the-Fly Algorithm for Checking Alternating Timed Simulation	73
<i>Peter Bulychev, Thomas Chatain, Alexandre David, and Kim G. Larsen</i>	
Model Checking Logic WCTL with Multi Constrained Modalities on One Clock Priced Timed Automata	88
<i>Ashish Chiplunkar, Shankara Narayanan Krishna, and Chinmay Jain</i>	
Safe Runtime Verification of Real-Time Properties	103
<i>Christian Colombo, Gordon J. Pace, and Gerardo Schneider</i>	
Removing All Silent Transitions from Timed Automata	118
<i>Cătălin Dima and Ruggero Lanotte</i>	

Realizability of Real-Time Logics	133
<i>Laurent Doyen, Gilles Geeraerts, Jean-Francois Raskin, and Julien Reichert</i>	
Revisiting Decidability and Optimum Reachability for Multi-Priced Timed Automata	149
<i>Martin Fränzle and Mani Swaminathan</i>	
Analyzing Real-Time Event-Driven Programs.....	164
<i>Pierre Ganty and Rupak Majumdar</i>	
A Compositional Translation of Timed Automata with Deadlines to UPPAAL Timed Automata	179
<i>Rodolfo Gómez</i>	
Compositional Abstraction for Stochastic Systems	195
<i>Joost-Pieter Katoen, Daniel Klink, and Martin R. Neuhäuser</i>	
Stochastic Games for Verification of Probabilistic Timed Automata	212
<i>Marta Kwiatkowska, Gethin Norman, and David Parker</i>	
Checking Timed Büchi Automata Emptiness Using LU-Abstractions ...	228
<i>Guangyuan Li</i>	
On the Supports of Recognizable Timed Series.....	243
<i>Karin Quaas</i>	
Machine-Assisted Parameter Synthesis of the Biphase Mark Protocol Using Event Order Abstraction	258
<i>Shinya Umeno</i>	
Exploiting Timed Automata for Conformance Testing of Power Measurements	275
<i>Matthias Woehrle, Kai Lampka, and Lothar Thiele</i>	
Author Index	291
