Hybrid Computational Intelligence and GMDH Systems.....	1
Godfrey Onwubolu	
1 Introduction	1
2 Group Method of Data Handling (GMDH) Networks	2
2.1 GMDH Layers	3
2.2 GMDH Nodes	3
2.3 GMDH Connections	4
2.4 GMDH Network	5
2.5 Regularized Model Selection	5
2.6 GMDH Algorithm	6
2.7 Advantages of GMDH Technique.....	7
2.8 Limitations of GMDH Technique.....	7
3 Rationale for Hybrid Systems	11
4 Computational Intelligence	12
4.1 What Is Intelligence?	13
4.2 Can Computers Be Intelligent?	13
4.3 Computational Intelligence Paradigms	14
5 Hybrid GMDH Systems	21
6 Conclusion	23
References	23
Hybrid Genetic Programming and GMDH System:	
STROGANOFF	27
Iba Hitoshi	
1 Introduction	27
2 Background	28
2.1 System Identification Problems	28
2.2 Difficulties with Traditional GP	29
2.3 Numerical Approach to GP	31
3 Principles of STROGANOFF	31

3.1	STROGANOFF Algorithm	31
3.2	GMDH Process in STROGANOFF	32
3.3	Crossover in STROGANOFF	34
3.4	Mutation in STROGANOFF	35
3.5	Fitness Evaluation in STROGANOFF	36
3.6	Overall Flow of STROGANOFF	36
3.7	Recombination Guidance in STROGANOFF	38
4	Numerical Problems with STROGANOFF	40
4.1	Time Series Prediction with STROGANOFF	40
4.2	Comparison with a Traditional GP	43
4.3	Statistical Comparison of STROGANOFF and a Traditional GP	46
5	Symbolic Problems with STROGANOFF	52
5.1	Extension of STROGANOFF	52
5.2	Symbolic Regression	53
6	Applying STROGANOFF to Computational Finances	59
6.1	Predicting Stock Market Data	60
6.2	Developing Day-Trading Rules	68
7	Inductive Genetic Programming	72
7.1	Polynomial Neural Networks	73
7.2	PNN Approaches	74
7.3	Basic IGP Framework	77
7.4	PNN vs. Linear ARMA Models	79
7.5	PNN vs. Neural Network Models	80
8	Discussion	83
8.1	Comparison of STROGANOFF and Traditional GP	83
8.2	Genetic Programming with Local Hill Climbing ...	84
8.3	Limitations and Further Extensions of STROGANOFF	89
8.4	Applicability to computational finances	90
9	Conclusion	91
	Hybrid Genetic Algorithm and GMDH System	99
	Nader Nariman-zadeh and Jamali Ali

2	Modelling Using GMDH-Type Neural Networks	101
3	Hybrid Genetic/SVD Design of GMDH-Type Neural Networks	103
3.1	Application of SVD in the Design of GMDH-Type Networks	103
3.2	Application of SVD in the Design of GMDH-Type Networks	103
4	Single-Objective Hybrid Genetic Design of GMDH-Type Neural Networks Modelling and Prediction of Complex Processes	108

4.1	Application to the Modelling and Prediction of Level Variations of the Caspian Sea	108
4.2	Application to the Modelling and Prediction of the Explosive Cutting Process	111
5	Multi-objective Hybrid Genetic Design of GMDH-Type Neural Networks Modelling and Prediction of Complex Processes	115
5.1	Multi-objective Optimization	116
5.2	Multi-objective Uniform-Diversity Genetic Algorithm (MUGA)	117
5.3	Multi-objective Genetic Design of GMDH-Type Neural Networks for a Variable Valve-Timing Spark-Ignition Engine	120
5.4	Multi-objective Genetic Design of GMDH-Type Neural Networks for a Nonlinear System	125
5.5	Multi-objective Genetic Design of GMDH-type Neural Networks for Modelling and Prediction of Explosive Cutting Process	130
6	Conclusion	136
