## Invited Papers

|                                                                                                |   |
|------------------------------------------------------------------------------------------------|---|
| Concurrent Constraint Programming Based on Functional Programming<br>(Extended Abstract) ..... | 1 |
| <i>G. Smolka</i>                                                                               |   |

## Regular Papers

|                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------|-----|
| A Bisimulation Method for Cryptographic Protocols .....                                                   | 12  |
| <i>M. Abadi and A. D. Gordon</i>                                                                          |     |
| A Polyvariant Binding-Time Analysis for Off-line Partial Deduction ....                                   | 27  |
| <i>M. Bruynooghe, M. Leuschel and K. Sagonas</i>                                                          |     |
| Verifiable and Executable Logic Specifications of Concurrent Objects<br>in $\mathcal{L}_\pi$ .....        | 42  |
| <i>L. Caires and L. Monteiro</i>                                                                          |     |
| Complexity of Concrete Type-Inference in the Presence of Exceptions ..                                    | 57  |
| <i>R. Chatterjee, B. G. Ryder and W. A. Landi</i>                                                         |     |
| Synchronisation Analysis to Stop Tupling .....                                                            | 75  |
| <i>W.-N. Chin, S.-C. Khoo and T.-W. Lee</i>                                                               |     |
| Propagating Differences: An Efficient New Fixpoint Algorithm for<br>Distributive Constraint Systems ..... | 90  |
| <i>C. Fecht and H. Seidl</i>                                                                              |     |
| Reasoning about Classes in Object-Oriented Languages:<br>Logical Models and Tools .....                   | 105 |
| <i>U. Hensel, M. Huisman, B. Jacobs and H. Tews</i>                                                       |     |
| Language Primitives and Type Discipline for Structured<br>Communication-Based Programming .....           | 122 |
| <i>K. Honda, V. T. Vasconcelos and M. Kubo</i>                                                            |     |
| The Functional Imperative: Shape! .....                                                                   | 139 |
| <i>C. B. Jay and P. A. Steckler</i>                                                                       |     |
| Code Motion and Code Placement: Just Synonyms? .....                                                      | 154 |
| <i>J. Knoop, O. Rüthing and B. Steffen</i>                                                                |     |

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| Recursive Object Types in a Logic of Object-Oriented Programs .....                       | 170 |
| <i>K. R. M. Leino</i>                                                                     |     |
| Mode-Automata: About Modes and States for Reactive Systems .....                          | 185 |
| <i>F. Maraninchi and Y. Rémond</i>                                                        |     |
| From Classes to Objects via Subtyping .....                                               | 200 |
| <i>D. Rémy</i>                                                                            |     |
| Building a Bridge between Pointer Aliases and Program Dependences ..                      | 221 |
| <i>J. L. Ross and M. Sagiv</i>                                                            |     |
| A Complete Declarative Debugger of Missing Answers .....                                  | 236 |
| <i>S. Ruggieri</i>                                                                        |     |
| Systematic Change of Data Representation: Program Manipulations<br>and a Case Study ..... | 252 |
| <i>W. L. Scherlis</i>                                                                     |     |
| A Generic Framework for Specialization (Abridged Version) .....                           | 267 |
| <i>P. Thiemann</i>                                                                        |     |
| <b>Author Index</b> .....                                                                 | 283 |
