

Contents

Chapter 1 The Role of the Recovery Room.....	1
Introduction	1
Designing a Post-anaesthesia Care Unit.....	1
Equipment.....	2
Equipment Required at Each Recovery Bay.....	3
Cardiorespiratory Equipment.....	3
Paediatric Equipment.....	4
Miscellaneous Equipment.....	4
Drugs and Intravenous Fluids	5
Safety	5
Pollution	5
Blood-borne Infections	5
Staffing.....	6
Continuing Education and Training	7
Policies and Protocols.....	8
References and Bibliography.....	8
 Chapter 2 Normal Recovery.....	 9
Physiology of the Elimination of Drugs Used During Anaesthesia.....	9
Volatile Agents	9
Intravenous Induction Agents.....	9
Suxamethonium.....	9
Non-depolarising Muscle Relaxants	10
Analgesics	10
Progress of Normal Recovery	10
Stage IV: Medullary Paralysis.....	11
Stage III: The Stage of Surgical Anaesthesia	11
Stage II: The Stage of Excitement.....	11
Stage I: The Stage of Analgesia	12
Care-plan Nursing.....	12
Reception of the Patient.....	13
Basic Nursing Position and Safety.....	14
Routine Observations	14
Assessment of Colour	15
Peripheral and Central Cyanosis	15
Assessment of Respiratory Function.....	16
Assessment of Cardiovascular Function	16
Tissue Perfusion.....	16

Pulse Measurement	17
Doppler Ultrasonic Recorder	17
Blood Pressure Measurement	18
Sphygmomanometer and Stethoscope	18
Oscillotonometer	19
Automatic Blood-pressure Recording	19
Direct Arterial Pressure Measurement	20
Assessment of Level of Consciousness	23
Recognition of Blood Loss	24
Maintenance of the Airway	24
Insertion of Oropharyngeal Airway	25
Insertion of Nasopharyngeal Airway	26
Suction of the Upper Airway	27
Care of the Intubated Patient	28
Endotracheal Suction	28
Extubation	28
Care of the Patient with a Laryngeal Mask Airway (LMA)	29
The Ventilated Patient	29
Oxygen Therapy	30
Administration of Oxygen	30
Maintenance of Fluid Balance	33
Intravenous Fluid Therapy	34
Intravenous Infusions	34
Intravenous Infusion Drip Rates	34
Intravenous Injections	35
Blood Transfusion	35
Drainage Systems	37
Record Keeping and Charting	38
Criteria for Discharge	42
Discharge to a Ward	42
Discharge to Intensive Care or High-dependency Unit	43
Transfer of Patient to Ward Staff	43
References and Bibliography	43
Chapter 3 Pain Relief and Local Anaesthesia	45
Introduction	45
Gate-control Theory of Pain	45
Methods of Pain Relief	47
Analgesic Drugs	47
Patient-controlled Analgesia	49
Balanced Analgesia	49
Local Anaesthetic Techniques	53
Management of Toxic Reactions	54
Local Anaesthetic Agents	55
Specific Local Anaesthetic Blocks	56
Spinal Blockade	56
Epidural Blockade	57
Caudal Blockade	60
Local Infiltration	61
Intercostal Nerve Blockade	61

Intrapleural Blockade.....	61
Inguinal Field Blockade.....	62
Penile Nerve Block.....	62
Brachial Plexus Blockade.....	62
Intravenous Regional Anaesthesia (Bier's Block)	63
Digital Nerve Blockade	64
Femoral Nerve Blockade.....	64
Patient Management in the PACU.....	65
References and Bibliography.....	65
Chapter 4 Complications.....	67
Respiratory Complications	67
Signs of Hypoxaemia.....	67
Signs of Hypercarbia.....	67
Upper Airway Obstruction	68
Inadequate Ventilation (Hypoventilation).....	70
Hypoxaemia.....	75
Bronchospasm	76
Aspiration of Gastric Contents	77
Pneumothorax and Haemothorax	78
Tension Pneumothorax.....	79
Cardiovascular Complications	80
Hypotension.....	80
Hypertension.....	83
Bradycardia	83
Tachycardia.....	85
Dysrhythmias.....	87
Cardiac Arrest.....	90
Initial Management.....	92
Miscellaneous Complications	93
Delayed Return of Consciousness.....	93
Restlessness, Excitement and Delirium	96
Nausea and Vomiting.....	97
Shivering.....	98
Convulsions.....	99
Hypothermia.....	100
Hyperthermia.....	101
Malignant Hyperthermia.....	102
Blood Transfusion Reactions	103
Problems Associated with Massive Blood Transfusion.....	104
Failure of Coagulation.....	106
Oliguria.....	109
References and Bibliography.....	111
Chapter 5 Recovery in Different Branches of Surgery.....	113
Emergency Surgery	113
Surgery for Trauma	113
Surgery in the Accident Department.....	114
Gastroenterology.....	114
Endoscopy.....	114

Upper Gastrointestinal Tract Bleeding.....	115
Surgery for Intestinal Obstruction or Peritonitis	115
Bowel Surgery.....	115
Orthopaedic Surgery	116
Plaster Casts.....	116
Traction.....	117
Reduction of Fractures	117
Hip Operations	117
Fractured Vertebrae.....	118
Obstetrics and Gynaecology	118
Caesarian Section	118
Evacuation of Retained Products of Conception; Suction	
Termination of Pregnancy	119
Laparoscopy.....	119
Hysterectomy	120
Ear, Nose and Throat Surgery.....	120
Tonsillectomy.....	120
Laryngoscopy.....	121
Tracheostomy.....	121
Operations on the Nose.....	122
Middle-ear Surgery.....	123
Thyroid Surgery.....	123
Airway Problems	123
Thyroid Crisis or Storm	124
Dental and Faciomaxillary Surgery.....	124
Post-operative Bleeding	124
Wiring of the Jaw.....	125
Fracture of the Zygomatic Arch.....	125
Mentally Handicapped Patients	125
Ophthalmic Surgery.....	125
Position.....	126
Intra-ocular Pressure (IOP)	126
Pupil Size	126
Analgesia	126
Drug Interactions	126
Neurosurgery	126
Thoracic Surgery	130
Bronchoscopy.....	130
Thoracotomy.....	131
Pain Relief	132
Vascular Surgery	133
Pain Relief	134
Genito-urinary Surgery.....	135
Prostatectomy	135
Nephrectomy	136
Circumcision	137
Paediatric Surgery.....	137
Maintenance of Airway and Adequacy of Ventilation	137
Maintenance of Adequate Cardiovascular Function	139
Temperature Regulation.....	140

Fluid Balance	141
References and Bibliography.....	141
Chapter 6 Pre-existing Factors Affecting Recovery	143
Premedication.....	143
Anaesthetic Technique.....	143
Intravenous Induction Agents.....	143
Long-acting Inhalational Agents	144
Analgesic and Relaxant Technique.....	144
Regional Anaesthesia	144
Induced Hypotension.....	145
Ketamine.....	145
Pre-operative Drug Therapy.....	146
Anti-hypertensive Agents	146
Monoamine Oxidase Inhibitors (MAOIs).....	146
Corticosteroids.....	147
Insulin and Hypoglycaemic Agents	147
Anticoagulants.....	147
Diuretics.....	147
Antibiotics.....	148
Digoxin	148
Respiratory Disease	148
Chronic Bronchitis	148
Asthma.....	149
Cardiovascular Disease	149
Coronary Artery Disease	149
Hypertension.....	150
Cardiac Failure	150
Pacemaker.....	150
Neuromuscular Disease.....	151
Myasthenia Gravis	151
Muscular Dystrophy	152
Paraplegia.....	152
Liver Disease	152
Renal Disease	153
Endocrine Disorders	154
Diabetes Mellitus	154
Thyroid Disease	155
Hypothyroidism.....	155
Hyperthyroidism	155
Phaeochromocytoma	155
Porphyrria	156
Haematological Disease.....	156
Iron-deficiency Anaemia.....	156
Haemophilia	156
Sickle Cell Disease.....	157
Deficiency of Clotting Factors.....	158
Musculoskeletal Disease.....	158
Rheumatoid Arthritis	158
Osteoporosis	158

Ankylosing Spondylitis.....	159
Geriatric Patients.....	159
Pregnancy.....	160
Malnourishment.....	160
Obesity.....	160
References and Bibliography.....	161
Chapter 7 Recovery and Day Surgery	163
Patient Selection.....	163
Social Circumstances.....	163
Medical Factors	164
Procedure Selection	164
Examples of Suitable Procedures	164
Pre-admission Clinic.....	165
Documentation	166
Anaesthetic Management	166
Recovery from Anaesthesia	167
Discharge from the Hospital	167
Paediatrics	168
Management	169
Post-anaesthetic Complications	169
Pain.....	169
Regional or Local Anaesthesia	169
General Anaesthesia	170
References and Bibliography.....	171
Chapter 8 Monitoring.....	173
ASA Classification	174
Routine Monitoring	174
Respiratory System	175
Cardiovascular System.....	176
Metabolic Systems.....	176
Neurological System	176
Specific Monitors	177
Electrocardiograph (ECG)	177
Arterial Pressure.....	179
Invasive Methods	179
Non-invasive Methods.....	179
Pulmonary Artery Pressure	180
Oxygen Saturation.....	181
Neuromuscular Blockade.....	182
Carbon Dioxide Tension	183
References and Bibliography.....	183
Appendix A Drugs Commonly Used in the PACU.....	185
Appendix B Translations of Standard Recovery Phrases	191
Index.....	193
