SECTION I	Introduction: Essential Clinical Knowledge	1
------------------	---	----------

1	Bone Biology and Wound Healing	3
----------	---------------------------------------	----------

1.1	Bone Biology	4
------------	---------------------	----------

Claudia Dellavia, Gaia Pellegrini, and Luiz Guilherme Fiorin

Bone Tissue Anatomical Aspects	4
Main Cellular Components,	4
Composition,	5
Structure,	6
Bone Remodeling and Healing,	6
Bone Remodeling,	6
Bone Healing,	7
What Can Compromise Bone Healing?,	7
Bone Angiogenesis,	8
Biomaterials for Bone Regeneration,	9
Bone Grafts,	10
Synthetic Hydroxyapatite-Based Biomaterials,	10
Polymers,	10
Bone Morphogenetic Protein-2,	11
Platelet Concentrates,	11
Osseointegration,	12
Phases of Osseointegration,	12
Bone Loading,	14
Threshold Strain,	14
References,	15

1.2 Wound Healing 18

Andrea Pilloni

Overview of the Wound Healing Process, 18

Phases of Wound Healing, 18

Which Factors Can Lead To Impaired Healing?, 19

Main Types of Wound Healing, 19

Oral Soft Tissue Wound Healing, 20

Oral Soft Tissue Special Features: Intrinsic Differences Between Oral Mucosa and Skin, 20

Scar and Scarless Wound Healing in Oral Soft Tissues, 20

Early Wound Healing Score: A Method To Assess Primary Intention Wound Healing, 21

References, 22

2 Applied Surgical Anatomy of the Jaws 24

Mohamed Sharawy

Maxilla: Surgical Anatomy, 24

Surgical Access To the Maxillary Sinus, 27

Muscles Attached To the Maxilla of Surgical Importance, 28

Sensory Innervation of the Maxilla, 29

Arterial Supply To the Maxilla, 30

Venous Drainage From the Maxilla, 31

Lymphatic Drainage From the Maxilla, 31

Mandible: Surgical Anatomy, 31

Muscle Attachment To the Mandible of Surgical Importance To Oral Implantologists, 32

Innervation of the Lower Jaw and Associated Structures, 34

Blood Supply to the Mandible, 36

Summary and Conclusions, 37

Acknowledgments, 37

References, 38

3 Radiographic Evaluation of the Alveolar Ridge in Implant Dentistry: CBCT Technology 40

Shikha Rath and David Hatcher

The Role of Radiography in Implant Dentistry, 40

Periapical Radiography, 40

Panoramic Radiography, 40

Occlusal Radiography, 42

Cone Beam Computed Tomography, 42

Anatomical and Architectural Considerations for Treatment Planning, 42

Anterior Maxilla, 42

Nasopalatine (Incisive) Canal,	42
Canalis Sinuosus,	42
Anterior Nasal Spine and Nasal Floor,	43
Pattern of Ridge Atrophy in the Anterior Maxilla,	43
Posterior Maxilla,	44
Maxillary Sinus,	44
Greater Palatine foramen,	46
Pattern of Ridge Atrophy in the Posterior Maxilla,	47
Anterior Mandible,	47
Mandibular Incisive Canal,	47
Lingual Foramen and Lateral Canals,	47
Genial Tubercles,	48
Pattern of Ridge Atrophy in the Anterior Mandible,	48
Posterior Mandible,	48
Inferior Alveolar (Mandibular) Canal,	48
Mental foramen,	48
Submandibular and Sublingual Fossae,	49
Lingual Nerve,	49
Pattern of Ridge Atrophy in the Posterior Mandible,	50
Imaging Considerations for CBCT Utilization,	50
Technical Considerations,	50
Bone Quality and Bone Density Assessment,	51
Pathology Detection,	51
Radiation Dose,	51
Interactive Implant Treatment Planning,	51
Surgical Guides,	54
Newer Technological Advances,	56
References,	59

4 Prosthetic Comprehensive Oral Evaluation in Implant Dentistry

62

Gary A. Morris

Initial Evaluation,	62
Diagnostic Work-Up,	62
Diagnosis and Treatment Plan,	63
Smile Evaluation,	63
Diagnostic Casts and Wax-Up,	66
Radiographic Implant Guide,	67
Clinical Applications,	76
Prosthetic Evaluation and Treatment Planning of Partially Edentulous Patients in the Esthetic Zone,	76

Prosthetic Evaluation and Treatment Planning of Partially Edentulous Patients in the Posterior Dentition, 80	
Prosthetic Evaluation and Treatment Planning of the Completely Edentulous Patient, 83	
Conclusion, 89	
References, 89	

5 Alveolar Ridge Defects and Bone Augmentation Techniques: Surgical Algorithm

92*Len Tolstunov*

Ridge Preservation and Ridge Augmentation, 92	
Ridge Preservation, 92	
Ridge Augmentation, 93	
Bone Defects, Bone Grafts, and Bone Grafting Techniques, 94	
Extraosseous Versus Intraosseous Alveolar Bone Defects, 94	
Onlay Versus Inlay Alveolar Bone Grafts, 94	
Static Versus Dynamic Surgical Techniques, 94	
Risk Factors in Bone Augmentation Procedures in Implant Dentistry, 95	
Main Surgical Techniques of Bone Augmentation in Implant Dentistry, 95	
Guided Bone Regeneration, 96	
Block Bone Grafting, 96	
Ridge-Split Expansion Procedure, 96	
Distraction Osteogenesis, 96	
Alternative Surgical Techniques, 97	
Graft Healing and Vascularization, 97	
Alveolar Bone Augmentation Decision Tree Algorithm, 97	
Alveolar Bone Classification By Deficiency (Abcd) – the Tolstunov Classification, 98	
Examples of the Tolstunov Classification, 98	
Conclusion, 101	
References, 102	

6 Incision Design, Soft Tissue Flaps, and Wound Closure in Alveolar Bone Augmentation Surgeries in Implant Dentistry

106*Tetsu Takahashi and Kensuke Yamauchi*

Incision Design in Alveolar Bone Augmentation Surgeries, 106	
Soft Tissue Flaps in Alveolar Bone Augmentation Surgeries, 106	
Vascularity Patterns, 106	
Flap Designs, 106	
Reflection of the Mucoperiosteum, 108	

Preparing for Wound Closure, 109	
Tension Release Incisions, 109	
Wound Closure in Alveolar Bone Augmentation Surgeries, 110	
Principles of Suturing, 110	
Types of Sutures, 111	
Complications, 112	
Nerve Injury, 112	
Bleeding, 112	
Wound Dehiscence, 112	
Conclusion, 113	
References, 113	

7	Biological Rationale of the Surgical Procedure: Bone Augmentation	116
	<i>Len Tolstunov</i>	

Graft Revascularization Sources, 117
Conclusion, 123
Acknowledgment, 124
References, 124

SECTION II	Ridge Preservation	127
-------------------	---------------------------	------------

8	Bone Grafting Materials for Bone Preservation and Augmentation in Implant Dentistry: Surgical Algorithm	130
	<i>Hanieh Nokhbatolfoghahaei and Arash Khojasteh</i>	

Autogenous Bone Grafts, 131
Allografts, 133
Xenografts, 134
Alloplasts, 135
Calcium Phosphates, 136
Tricalcium Phosphate, 136
Hydroxyapatite, 137
Conclusion, 137
References, 137

9	Guided Bone Regeneration for Extraction Sockets: Ridge Preservation	142
	<i>Waldemar D. Polido</i>	

Review of the Literature, 142
Surgical Technique, 143

Case Reports, 144
 Case 1, 144
 Case 2, 147
 Discussion, 150
 Conclusion, 151
 Acknowledgment, 151
 References, 151

10 Platelet-Rich Fibrin for Bone Augmentation in Implant Dentistry 154

Richard J. Miron and Michael A. Pikos

The Evolution (History) of Platelet-Rich Fibrin, 154
 Leukocyte and Platelet-Rich Fibrin, 155
 Protocols to Produce Platelet-Rich Fibrin Via Horizontal Centrifugation, 156
 Clinical Uses of Platelet-Rich Fibrin in Bone Augmentation, 157
 Use of Platelet-Rich Fibrin in Extraction Site Management, 157
 Platelet-Rich Fibrin for Guided Bone Regeneration, 160
 Platelet-Rich Fibrin for Sinus Grafting Procedures, 164
 Advantages of the Use of Platelet-Rich Fibrin, 166
 Discussion and Future Research, 167
 Conclusion, 171
 References, 172

SECTION III Ridge Augmentation: Horizontal 175

11 Guided Bone Regeneration with Resorbable and Non-Resorbable Membranes for (Mainly) Horizontal Alveolar Bone Augmentation in Implant Dentistry 178

John F. Hamrick and Trenton F. Jensen

Applied Surgical Anatomy, 178
 Indications and Contraindications, 179
 Indications, 179
 Contraindications, 179
 Basic Principles of Guided Bone Regeneration, 179
 Primary Wound Closure, 179
 Angiogenesis, 179
 Space Maintenance, 179
 Wound Stability, 179
 Description of Surgical Technique, 180
 Incisions and Flap Design, 180
 Flap Elevation and Site Preparation, 180
 Buccal Flap Release, 180

Harvesting of Bone, 180
Flap Closure Technique, 180
Case Reports, 181
Case 1, 181
Case 2, 183
Case 3, 184
Case 4, 187
Case 5, 189
Case 6, 191
Post-Operative Care, 192
Complications, 192
Discussion, 193
Conclusion, 193
References, 193

12	Autogenous Block Bone Graft for Horizontal Ridge Augmentation in Implant Dentistry	196
	<i>Arash Khojasteh and Farshid Bastami</i>	

Recipient Site Analysis, 196
Block Bone Augmentation Techniques, 197
Onlay Bone Grafting, 197
Guided Bone Regeneration and Onlay Bone Block Grafting, 197
Cortical Autogenous Tenting, 198
Regenerative Techniques in Bone Grafting, 199
Platelet Derivatives, 199
Mesenchymal Stem Cells, 199
Case Presentations, 200
Case 1, 200
Case 2, 201
Case 3, 201
Case 4, 203
Case 5, 204
Conclusion, 205
References, 206

13	Allogenic Block Graft as an Alternative To Autogenous Block Graft for Augmentation of Horizontal Alveolar Bone Defects in Implant Dentistry	210
	<i>Shankar Iyer</i>	

Indications for Allogenic Block Grafts, 211
Distinguishing Features of Irradiated Allogenic Block Grafts, 214

Materials and Methods, 214	
Patient Selection Criteria, 214	
Pre-Operative Considerations, 214	
Technique of Allogenic Block Graft for A Single Anterior Tooth, 214	
Flap Design, 214	
Preparation of the Recipient Bone Bed for Decortication and Periosteal Release Incision (Scoring), 214	
Conforming the Block, 217	
Fixation of the Block, 218	
Management of Voids and Coverage, 219	
Re-Entry for Implant Placement, 219	
Technique of Allogenic Block Graft for Anterior Sextant, 221	
Pre-Operative Planning, 221	
Surgical Procedure, 221	
Preparation of the Recipient Bed and Adaptation of the Allogenic Block, 222	
Post-Operative Assessment and Surgical Re-Entry, 224	
Biopsy Interpretation, 224	
Implant Placement and Completion of Prosthetic Rehabilitation, 227	
Technique of Allogenic Block Graft for Posterior Sextant, 228	
Pre-Operative Planning, 228	
Surgical Procedure, 229	
Preparation of the Recipient Bed and Adaptation of the Allogenic Block, 229	
Post-Operative Assessment and Surgical Re-Entry, 229	
Biopsy Interpretation, 230	
Implant Placement and Completion of Prosthetic Rehabilitation, 232	
Discussion, 234	
Conclusion, 235	
Acknowledgment, 235	
References, 235	

14

Ridge-Split Expansion Procedure for Horizontal Bone Augmentation in Implant Dentistry 239

14.1 Diagnosis and Treatment Planning 240 *Len Tolstunov*

History, 240	
Diagnosis and Treatment Planning, 240	
Patient (Host) Selection, 240	
Alveolar Ridge Defect Analysis and Classification, 241	
Diagnostic Work-Up, 243	
Cone Beam Computed Tomography, 244	
Surgical Stent, 245	
Instrumentation, 245	
References, 247	

14.2 Surgical Principles of the Ridge-Split Expansion Procedure	249
<i>Len Tolstunov</i>	
The Maxilla Is Not An Upside-Down Mandible, 249	
Vascularization: Vascular Periosteal Flap, 249	
Secondary Intention and Wound Healing: Ridge-Split Expansion Procedure and Guided Bone Regeneration, 250	
Osteo-Condensation of Surrounding Bone, 252	
Osteo-Mobilization of the Buccal Bone Fragment, 253	
Conclusion, 253	
References, 253	
14.3 Mandibular Two-Stage Alveolar Ridge-Split Expansion Procedure	254
<i>Len Tolstunov</i>	
Surgical Procedure: Mandibular Ridge Split, 254	
Stage 1: Corticotomy, 254	
A Common Question, 256	
Stage 2: Split Expansion Graft, 256	
Case Report, 258	
References, 260	
14.4 Maxillary Single-Stage Alveolar Ridge-Split Expansion Procedure	261
<i>Len Tolstunov</i>	
Case Report of A Maxillary Single-Stage Alveolar Split Procedure with Simultaneous Implant Placement, 263	
References, 265	
14.5 Advanced Ridge-Split Expansion Techniques for an Experienced Practitioner	266
<i>Len Tolstunov</i>	
Single-Stage Mandibular Alveolar Split with A Closed Flap (Closed Mand C-SEG), 266	
Single-Stage Alveolar Split and Immediate Implant with A Closed Flap (Closed C-SEG-I) (Figures 14.5.1–14.5.4), 266	
Single-Stage Alveolar Split with An Open Flap (Open C-SEG), 267	
Single-Stage Alveolar Split and Immediate Implant with An Open Flap (Open C-SEG-I) (Figure 14.5.5), 267	
Spreader-Driven Ridge Expansion Approach (With Or Without Implant) (Figures 14.5.6 and 14.5.7), 268	
Case Report of Alveolar Split with Conical Progressive Osteotomes, 269	
Conclusion, 271	
References, 271	
14.6 Complications of the Ridge-Split Expansion Procedure and Conclusion	272
<i>Len Tolstunov</i>	
Conclusion: “10 Commandments” for the Alveolar Split, 275	
References, 276	

Ridge-Split Expansion Procedure Utilizing Piezoelectric Surgery for Horizontal Bone Augmentation in Implant Dentistry

Case 3, 507
Complications, 508
Discussion, 510
Conclusion, 510
References, 510

29

Complete-Arch Dental Implant Treatment as an Alternative (to Bone Grafting) Surgical Technique

513

29.1 Complete-Arch Dental Implant Treatment Using Photogrammetry and Delayed Immediate Loading **514**

Ole T. Jensen and M. Donald Ross

Complete-Arch Site Classification, 514
Full-Arch Treatment: Restorative Building Blocks, 517
Building Block 1: Centric Relation, 517
Building Block 2: Vertical Dimension of Occlusion, 517
Building Block 3: Case Planning, 518
Building Block 4: Surgery, 519
Building Block 5: Provisionalization, 519
Building Block 6: Soft Tissue, 522
Discussion, 523
Conclusion, 523
References, 524

29.2 Maxillary Full-Arch Staged Ceramo-Metal Implant Rehabilitation **525**

Len Tolstunov

Case Report, 526
History, 526
Examination and Clinical Presentation, 526
Diagnosis, 527
Treatment Options, 528
Final Treatment Plan, 529
Surgical-Restorative Sequence Performed, 529
Stage 3 (3 Months Later), 531
Discussion, 534
Hybrid Or All-On-Four Full-Arch Implant Prosthesis Design, 534
Ceramo-Metal Crown-And-Bridge Implant Prosthesis Design, 534
Conclusion, 534
References, 535

SECTION VII Tissue Bioengineering**537****30 Tissue Bioengineering and Regeneration
in Implant Dentistry****540***Tara Aghaloo and Jacob Taylor*

Basics of Wound Healing, 540
Bone Biology and Grafting, 540
Guided Bone Regeneration, 542
Soft Tissue Regeneration, 543
Tooth Development and Regeneration, 543
Dental Stem Cells, 544
Bone Marrow Stem Cells, 545
Cells, Scaffolds, and Growth Factors, 545
Conclusion, 546
