

Contents

1	The Importance of GaAs Technology in Europe	1
	<i>J A Turner</i>	
2	Impact on Major Community Applications (Ed. Ewald Pettenpaul and Alex Colquhoun)	
2.1	Satellite Communication	10
	<i>C Tronche</i>	
2.2	Mobile Millimetre-wave Communication	25
	<i>A Plattner</i>	
2.3	Airport Surveillance Radar	40
	<i>J M Dieudonne</i>	
2.4	Mobile Communication	49
	<i>E Pettenpaul, L Scharf and K J Schopf</i>	
2.5	Direct Broadcasting TV	58
	<i>T Meier and E Pettenpaul</i>	
2.6	Point to Multipoint Communication	72
	<i>F G Pedraja</i>	
2.7	Optical Communication	85
	<i>J L Conesa, J M Hernandez and M Salazar-Palma</i>	
3	Enabling Technologies (Ed. Andre Scavennec, Roland Diehl and Joseph Mun)	
3.1	Advanced HFETs and Pseudomorphic HFETs	94
	<i>S Gourrier</i>	
3.2	Advanced HBTs	106
	<i>D Pons</i>	
3.3	Advanced GaAs MMIC Technology	120
	<i>R W W Charlton and J A Turner</i>	
3.4	High Throughput Multiwafer MOVPE Reactor	127
	<i>H Jurgensen and P Frijlink</i>	
3.5	Epitaxy with "Safer-to-handle" Precursors	160
	<i>J P Hirtz and T Martin</i>	

4	Modelling and Measurements (Ed. Tom Brazil)	
4.1	Reliability Evaluation <i>F Magistrali and D Sala</i>	170
4.2	Forward and Reverse Engineering <i>P H Ladbrooke, J P Bridge and D R Bowler</i>	200
4.3	On-wafer Noise Parameter Measurements <i>Th. Sporkmann</i>	219
4.4	Noise Modelling in Semiconductor Devices <i>G Ghione, F Bonani, M Pirola and C U Naldi</i>	228
4.5	Non-linear Modelling <i>Y Crosnier and G Salma</i>	243
4.6	Power MESFET Modelling <i>F Gianinni and J L Garcia</i>	261
4.7	Coplanar Waveguide Modelling <i>R Kulke and Th. Sporkmann</i>	284
4.8	Planetary MOVPE Reactor Modelling <i>C Waucquez and J Marchal</i>	299
5	Future Aspects (Ed. Joseph Mun and Jim Turner)	
5.1	Manufacturing Issues <i>C L Sansom, J A Turner and D J Warner</i>	318
5.2	New devices and Technologies <i>H Brugger</i>	343
5.3	Nanoelectronics <i>S P Beaumont</i>	364
	Appendix - List of ESPRIT Projects on GaAs	387
	Index of Contributors	388
