Part I. Isoelectric Focusing

1. Theoretical and General Aspects	1
Reminiscences about the Genesis of Isoelectric Focusing and Generalization of the Idea	
A. Kolin	3
Stable pH Gradients – A Key Problem in Isoelectric Focusing	
H. Rilbe.	35
Electrofocusing in Buffers: Formation of Natural pH Gradients, Flexibility, Gradient Stability, Relation to Isotachopheresis and Preparative Potential	
A. Chrambach and N. Y. Nguyen	51
Comparison of pH Gradients Used for Isoelectric Focusing	
J.S. Fawcett	59
On the Temperature Dependence of Isoelectric Points of Proteins with Special Reference to Isoelectric Focusing	
S. Fredriksson.	71
2. Carrier Ampholytes	85
Carrier Ampholyte Distribution	
R.K. Brown, M.L. Caspers and S.N. Vinogradov	87
Characterization of Carrier Ampholytes by New Visualization Reactions and Chromatographic Methods	
B. J. Radola, H. Tschesche and H. Schuricht	97
Synthesis of Carrier Ampholytes for Isoelectric Focusing Containing Sulfonic and Phosphonic Acid Groups Covering a Wide pH Range	
N. Grubhofer and C. Borja	111
3. Analytical Methodology	121
Staining of Proteins in Polyacrylamide Gels	
O. Vesterberg and L. Hansén	123

VIII

Isoelectric Focusing of Complex Protein Mixtures in the Nanogram Range and Enzyme Kinetics of Dehydrogenases Following IEF G. Bispink and V. Neuhoff	135
Soft Laser Scanning Densitometer Compatible with the High Resolution Obtained by Electrofocusing R. A. Zeineh.	147
Immunocore Electrofocusing: A Separation and Detection Technique Amenable to Scanning Densitometry R. A. Zeineh.	153
Rapid, Convenient and Economical Procedures for the Determination of the Isoelectric Spectra of Proteins D. H. Leaback.	155
A Simple Method of Choosing Optimum pH-Conditions for Electrophoresis Å. Rosengren, B. Bjellqvist and V. Gasparic	165
pH Determinations in Isoelectric Focusing with an Iridium Electrode E. Gianazza, P.G. Righetti, S. Bordi and G. Papeschi	173
Anomalous Behaviour of Horseradish Peroxidase in Isoelectric Focusing H. Delincée and B.J. Radola	181
Does Lipoprotein Lipase Bind Ampholytes? G. Bengtsson and T. Olivecrona	189
 4. Biochemical Applications	 197
Zein: Macromolecular Properties, Biosynthesis and Genetic Regulation P. G. Righetti, E. Gianazza, F. Salamini, E. Galante, A. Viotti and C. Soave	199
Growth and Isoelectric Patterns of Peroxidase in Tobacco Tissue Cultures Under the Influence of Growth Regulator Systems W. Rücker and J. Markotai	213
A Method for Simultaneous Analysis of Several Genetic Loci in Mice After Electrofocusing K.R. Narayanan and A.S. Raj	221
Phylogenetic Differences in Isoelectric Components of Liver Acid Phosphatase and LDH Between Genera of Two Closely Related Rodent Families (Muridae and Microtidae) A. Kubicz and L. Wolańska	233
Fractionation of Nucleic Acids on Isoelectric Focusing J.W. Drysdale	241

5. Clinical Applications.	253
Polyacrylamide Gel Isoelectric Focusing of Alpha-1-Proteinase Inhibitors (α_1 Pi) Phenotypes: I. Optimal Condition, Histochemical and Proteinase Probe Studies	
R.C. Allen, P.M. Oulla, P. Arnaud and J.S. Baumstark	255
Polyacrylamide Gel Isoelectric Focusing (PAGIF) Applied to Alpha-1-Proteinase Inhibitor (A_1 Pi) Phenotyping.	
II. Immunochemical Procedures	
P. Arnaud, C. Chapuis-Cellier, G.B. Wilson, J. Koistinen, R.C. Allen and H.H. Fudenberg	265
High Resolution Phenotyping of α_1 -Antitrypsins by Thin-Layer Polyacrylamide Electrofocusing	
J.O. Jeppsson	273
Broad-Beta Disease (Hyperlipoproteinaemia Type III): Genetics, Gene Frequency and Diagnosis Without Ultracentrifugation	
G. Utermann, M. Hees and K.H. Vogelberg.	281
Screening for Abnormal Hemoglobins in the Newborn: A Highly Economic Procedure Using Isoelectric Focusing	
K. Altland	295
The Crystallins of the Aging Lens from Five Species Studied by Various Methods of Thin-Layer Isoelectric Focusing	
J. Bours.	303
Separation of Erythrocyte Membrane Components in Electric Field. Polyacrylamide Gel Isoelectric Focusing: A Potential Method for the Diagnosis of Membrane Abnormality	
P.K. Das, D. Graesslin and H.W. Goedde	313
Microheterogeneity of Serum Glycoproteins as Revealed by Flat-Bed Gel Isoelectric Focusing	
A. Hamann.	329
Diagnosis of Cystic Fibrosis (CF) – Purification and Distinction Between CF Protein and Ciliary Dyskinesia Activity in CF and Asthmatic Sera Using Isoelectric Focusing and the Rabbit Tracheal Ciliary Bioassay	
G.B. Wilson, M.T. Monsher, P. Arnaud and H.H. Fudenberg.	337
Microheterogeneity of Human Kininogen, Alpha-2-HS and Alpha-1-Acid Glycoproteins by Thin-Layer Isoelectric Focusing	
U. Hamberg, U. Turpeinen and U. Knuutinen	351
A Genetic Variant of Amylase from Human Parotid Saliva Detected by Isoelectric Focusing	
J.C. Pronk	359

6. Two-Dimensional Techniques	367
Biological Applications of Two-Dimensional Gel Electrophoresis R.D. Ivarie, D.H. Gelfand, P.P. Jones, P.Z. O'Farrell, B.A. Polisky, R.A. Steinberg and P.H. O'Farrell	369
Plant Proteins Evaluated by Two-Dimensional Methods H. Stegemann	385
Two-Dimensional Separation of Lymphocyte Microsomal Membrane Proteins: Isoelectric Focusing Linked to SDS-Polyacrylamide Gel Electrophoresis H. Knüfermann	395
Mammalian Mitochondrial Ribosomes: Two-Dimensional Gel Electrophoresis of the 55 S- and the Corresponding Subunit Proteins W. Czempiel	405
Crossed Immuno-electrofocusing for Standardization and Characterization of Fungal Antigens K. Holmberg and T. Wadström	413
7. Preparative Separations	421
Isoelectric Focusing in Free Water W.D. Denckla	423
Preparative Electrofocusing in Flat-Beds of Granulated Gel — Methodological Aspects A. Winter	433
Preparative Scale Purification of Bacterial Enzymes and Toxins by Isoelectric Focusing and Isotachopheresis T. Wadström, R. Möllby, B. Olsson, J. Söderholm and C.J. Smyth	443
Preparative Zone Convection Electrofocusing in Helical Glass Tubes R. Quast	455
Chromatofocusing: Isoelectric Focusing on Ion Exchangers in the Absence of an Externally Applied Potential L.A.AE. Sluyterman and J. Wijdenes	463
8. Separation of Cells	467
New Instrumentation and Procedures for the Analysis of Mammalian Cells by Electrophoretic Techniques N. Catsimpoolas and A.L. Griffith	469
Continuous-Flow Isoelectric Focusing: Further Studies on Human Red Blood Cells and on the Separation of Rat Liver Light Mitochondrial Fraction W.W. Just and G. Werner	481

Preparative Electrofocusing of Native and Modified Living Mammalian Cells in a Stationary Ficoll/Sucrose Gradient	
W. Manske, B. Bohn and R. Brossmer	495

Part II. Isotachopheresis

1. Analytical and Preparative Methodology	503
The Principle of Preparative Capillary Isotachopheresis	
L. Arlinger	505
Preparative Capillary Isotachopheresis: Separation of μg Amounts of Some Human Serum Proteins	
U. Moberg, S.G. Hjalmarsson, L. Arlinger and H. Lundin.	515
Quantitative Determination of Picomoles ADP by Means of Steady State Mixed Zones in Isotachopheresis	
J.P.M. Wielders and F.M. Everaerts	527
Thin-Layer Polyacrylamide Gel Isotachopheresis, Crossed Immuno-Isotachopheresis and Crossed Isotachopheresis-Electrofocusing	
C.H. Brogren	549
Isotachopheresis of the Cerebrospinal Fluid (CSF) Proteins: Advantage of Prior Dialysis and its Practical Realization	
P. Delmotte	559
2. Applications	565
Plasma Protein Fractionation in Sephadex by Isotachopheresis Using Discrete Spacers	
M. Bier and A. Kopwillem.	567
Immuno-Isoelectric Focusing Analysis of Antibodies Fractionated by Isotachopheresis	
G. Peltre and C.H. Brogren	577
Analytical and Preparative Isotachopheresis in Column and Flat-Bed Gels for Fractionation of Antibodies	
C.H. Brogren and G. Peltre	587
