

Contents

1	Introduction	1
1.1	Historical Background	1
1.2	Intent and Motivation	2
1.3	Layout and Contents	3
1.4	Application of the Graphical Theory	5
2	Properties of $3jm$- and $3nj$-Symbols	7
2.1	Properties of $3jm$ -Symbols	7
2.2	Properties of $3nj$ -Symbols	10
2.3	Comment on Notation	10
3	Basic Tools for the Graphical Method	11
3.1	Graphical Representation of $3jm$ -Symbols	11
3.2	Special Elements of the Graphical Method	13
3.3	Treatment of $3jm$ -Symbols with a Zero-line	14
3.4	Direct Change of a Node Sign	15
3.5	Single External Line	17
3.6	Two-line Nodes	19
3.7	A Simple Closed Diagram	21
3.8	Reversal of Direction for an Internal Line	24
3.9	Line Reversal of an External Line	25
3.9.1	Reversal of an Outgoing Line	26
3.9.2	Reversal of an Ingoing Line	26
3.9.3	Reversal of an Outgoing Line and a $j = 0$ -Line	27
3.9.4	Reversal of an Ingoing Line and a $j = 0$ -Line	28
4	Orthogonality Relations for $3jm$-Symbols	31
4.1	Identity for $3jm$ -Symbols I	31
4.2	Identity for $3jm$ -Symbols II	34
4.3	Identity for $3jm$ -Symbols III	36

5	Properties of the $6j$-Symbol	41
5.1	Definition of the $6j$ -Symbol	41
5.2	Symmetry Properties of the $6j$ -Symbol	43
5.3	$6j$ -Symbol with a zero element	45
5.4	$6j$ -Symbol with Three 0-Lines	46
6	Properties of the $9j$-Symbol	49
6.1	Definition of the $9j$ -Symbol	49
6.2	Symmetry Properties of the $9j$ -Symbol	51
6.3	A $9j$ -Symbol with a zero element	52
7	General Principles for Diagrams	55
7.1	Multiplication Convention	55
7.2	Notation for Graphical Elements	56
7.3	Transformation and Deformation	56
7.4	Diagrams Connected by a Single Internal Line	57
7.5	Separation for Diagrams Connected by Two Lines	58
7.6	Contraction of Two Angular Momentum Lines	60
7.7	Summation Procedure	61
7.8	Separation for Three Lines	63
7.9	Joining Two Diagrams	66
7.10	Separation for Four Lines	67
7.11	Separation for Five Lines	69
8	Closed Diagrams	73
8.1	Sums with Single $3nj$ -Symbols	73
8.1.1	Sum with a $3j$ -Symbol	73
8.1.2	Alternating Sum with a $3j$ -Symbol	75
8.1.3	Sum with a $6j$ -Symbol	76
8.1.4	Alternating Sum with a $6j$ -Symbol	78
8.1.5	Sum with a $9j$ -Symbol	81
8.2	Sums with Two $3nj$ -Symbols	82
8.2.1	Sum with Two $6j$ -Symbols	82
8.2.2	Alternating Sum with Two $6j$ -Symbols	85
8.2.3	Sum with a $6j$ - and a $9j$ -Symbol	88
8.2.4	Sum with Two $9j$ -Symbols	93
8.3	Sums with Three $3nj$ -Symbols	99
8.3.1	The $9j$ -Symbol Expressed Through $6j$ -Symbols	99
8.3.2	Sum with One $9j$ - and Two $6j$ -Symbols	103
8.3.3	Alternating Sum with One $9j$ - and Two $6j$ -Symbols	109
9	Open Diagrams	119
9.1	Sum with Two $3jm$ -Symbols	119
9.2	Sum with Three $3jm$ -Symbols	122
9.3	Sum with Four $3jm$ -Symbols I	126

9.4	Sum with Four $3jm$ -Symbols II	129
	A Variation of this Formula	133
9.5	Sum with Six $3jm$ -Symbols	136
	A Variation of this Formula	143
9.6	New Formula for a Product of two $3jm$ -Symbols	146
9.7	Recovering a Previous Result	152
10	Application in Atomic Physics	159
10.1	Spherical Tensor Operators	159
10.2	Reduced Matrix Elements	160
10.3	X-ray Absorption: an $E1$ Process	162
10.4	Resonance-Enhanced X-Ray Scattering: $E1$ - $E1$ -Process	164
10.5	Equivalent Atomic Tensor Operator	166
10.6	Retaining Dependence on \bar{j} and \bar{m}	171
10.7	The Sum Over \bar{m}	186
10.8	The Sum Over \bar{j}	190
	Confirmation via a Different Route	193
