Lecture Notes

The Ram Accelerator: Overview and State of the Art <i>A.P. Bruckner</i>	3
Ram Accelerator Performance Modeling <i>C. Knowlen, A. Sasoh</i>	25
Real Gas Effects in Ram Accelerator Propellant Mixtures: Theoretical Concepts and Applied Thermochemical Codes <i>P. Bauer, J.F. Legendre, M. Henner, M. Giraud</i>	39

Facilities and Experiments

High Acceleration Experiments Using a Multi-stage Ram Accelerator <i>J.E. Elvander, C. Knowlen, A.P. Bruckner</i>	55
RAMAC in Subdetonative Propulsion Mode: State of the ISL Studies <i>M. Giraud, J.F. Legendre, M. Henner</i>	65
Presentation of the Rail Tube Version II of ISL's RAMAC 30 <i>F. Seiler, G. Patz, G. Smeets, J. Srulijes</i>	79
The Behaviour of Fin-Guided Projectiles Superdetonative Accelerated in ISL's RAMAC 30 <i>G. Patz, F. Seiler, G. Smeets, J. Srulijes</i>	89
High Performance Ram Accelerator Research <i>D.L. Kruczynski</i>	97
Ignition Study for Low Pressure Combustible Mixture in a Ram Accelerator <i>X. Chang, S. Matsuoka, T. Watanabe, S. Taki</i>	105
Thermally Choked Operation in a 25-mm-Bore Ram Accelerator <i>A. Sasoh, S. Hirakata, J. Maemura, Y. Hamate, K. Takayama</i>	111
37-mm-Bore Ram Accelerator of CARD C <i>Liu Sen, Z.Y. Bai, H.X. Jian, X.H. Ping, S.Q. Bu</i>	119

Performance Prediction

Real Gas Effects on Thermally Choked Ram Accelerator Performance <i>D.L. Buckwalter, C. Knowlen, A.P. Bruckner</i>	125
Numerical Investigation on Subdetonative Mode Ramjet-in-Tube <i>M.M. Morales, M.A.S. Minucci, J.B. Channes-Jr., A.G. Ramos, D. Bastos-Netto</i>	135
On the Optimization of Thermally-Choked Ram Accelerator Systems <i>X.J. Wang, E. Spiegler, Y. Timnat</i>	143
Prediction of Surface Heating of a Projectile Flying in RAMAC 30 of ISL <i>F. Seiler, F. Gatau, G. Mathieu</i>	151
Ram Accelerator Optimization and Use of Hydrogen Core to Increase Projectile Velocity <i>D.W. Bogdanoff</i>	159
Analysis and Experimental Results of a Fin-Stabilized Subcaliber Projectile with a Blunt Step in the External Propulsion Accelerator <i>J. Rom, D. Kruczynski, M. Nusca</i>	167

Starting Processes

Effects of Launch Tube Shock Dynamics on Initiation of Ram Accelerator Operation <i>J.F. Stewart, A.P. Bruckner, C. Knowlen</i>	181
Overview of the Subdetonative Ram Accelerator Starting Process <i>E. Schultz, C. Knowlen, A.P. Bruckner</i>	189
Diaphragm Rupturing Processes by a Ram Accelerator Projectile <i>J. Maemura, S. Hirakata, A. Sasoh, K. Takayama, J. Falcovitz</i>	205
Numerical Simulation of the Unsteady Processes in Starting Period of Ram Accelerator <i>S. Taki, C. Zhang, X. Chang</i>	215
RAMAC 90: Detonation Initiation of Insensitive Dense Methane-Based Mixtures by Normal Shock Waves <i>J.F. Legendre, P. Bauer, M. Giraud</i>	223

Hypersonic Blunt Body in Chemically Reacting Flows

Comparison of Numerical Simulations and PLIF Imaging Results of Hypersonic Inert and Reactive Flows Around Blunt Projectiles <i>K. Toshimitsu, A. Matsuo, M.R. Kamel, C.I. Morris, R.K. Hanson</i> ...	235
Comparisons of Numerical Methods for the Analysis of Unsteady Shock-Induced Combustion <i>J.Y. Choi, I.S. Jeung, Y. Yoon</i>	243
On the Detonation Initiation by a Supersonic Sphere <i>Y. Ju, A. Sasoh, G. Masuya</i>	255
Experimental Observation of Oblique Detonation Waves Around Hypersonic Free Projectiles <i>J. Kasahara, A. Takeishi, H. Kuroda, M. Horiba, K. Matsukawa, J.E. Leblanc, T. Endo, T. Fujiwara</i>	263
Numerical Prediction of Envelope Oscillation Phenomena of Shock-Induced Combustion <i>A. Matsuo</i>	271

Diagnostics

Experimental Investigation of Ram Accelerator Flow Fields and Combustion Kinetics <i>M.R. Kamel, C.I. Morris, A. Ben-Yakar, E.L. Petersen, R.K. Hanson</i> .	281
Accelerating Hydrogen/Air Mixtures to Superdetonative Speeds Using an Expansion Tube <i>J. Srulijes, G. Smeets, G. Patz, F. Seiler</i>	295

Computational Fluid Dynamics

Numerical Simulations of Unsteady Ram Accelerator Flow Phenomena <i>M.J. Nusca</i>	305
Numerical Investigation of Ram Accelerator Flow Field in Expansion Tube <i>J.Y. Choi, I.S. Jeung, Y. Yoon</i>	313
CFD Computations of Steady and Non-reactive Flow Around Fin-Guided Ram Projectiles <i>M. Henner, M. Giraud, J.F. Legendre, C. Berner</i>	325
Ignition of a Reactive Gas by Focusing of a Shock Wave <i>M. Rose, U. Uphoff, P. Roth</i>	333
