

CONTENTS

Preface

Introductory Lectures

S. MITSUHASHI: Biological Significance of Drug Resistance Plasmids	3
J. GRUNT, V. KRČMÉRY, L. ROSIVAL and F. VÝMOLA: Antibiotic Policy-an All-Nation Computer-assisted Model	11
J. JELJASZEWICZ, I. STOCHMAL and G. PULVERER: Geographic Differences in Antibiotic Susceptibility Patterns: Staphylococci	17

I. Environmental Consequences of Plasmids

(Chairmen: M. H. Richmond and L. Rosival)

M. H. RICHMOND: Resistant <i>E.coli</i> of Farm Origin and their possible Danger to Man. (Opening Lecture)	27
T. AOKI, T. KITAO and T. ARAI: R Plasmids in fish Pathogens	39
T. ARAI: R Plasmids which Reduce Nitrofurantoin Sensitivity of Their Host Bacteria; their Role in the Selection of R-Plasmids-Carrying Bacteria	47
O. J. VRTIAK, F. FEDERICH and M. A. RABIU: Drug Resistance in Staphylococcus aureus Strains Isolated from Raw Milk	53
F. ROZGONYI, M. BOJÁN and L. ÉR: Frequency and Some Properties of Methicillin-Resistant Strains of <i>Staphylococcus aureus</i> Isolated from Clinical Sources	59
E. SCHÖN and J. PLACHRÁ: Survey of Drug Resistance in <i>Staphylococcus aureus</i> . . .	65
E. BULLING, R. STEPHAN, A. STEINBECK and E. TROMMER: Colonization of the Intestine in New-born Children by R-Plasmid-Carrying Coliforms	69

II. Genetics of Plasmids

(Chairmen: B. HOLLOWAY and J. JELJASZEWICZ)

B. W. HOLLOWAY, C. CROWTHER, A. GODFREY, D. HAAS, V. KRISHNAPILLAI, A. MORGAN and J. WATSON: Plasmid-Chromosome Interactions in <i>Pseudomonas aeruginosa</i> (Opening Lecture)	77
B. MILLS and B. W. HOLLOWAY: Intrinsic Resistance to Aminoglycosides in <i>Pseudomonas aeruginosa</i>	89
S. IYOBE, H. SAGAI, K. HASUDA and S. MITSUHASHI: Drug-Resistance Plasmids in <i>Pseudomonas aeruginosa</i>	95
H. MALKE, A. A. TOTOLIAN, T. G. KOLESNICHENKO, V. I. GOLUBKOV and R. STARKE: Plasmid-Determined Resistance to Erythromycin and Lincomycin in <i>Streptococcus pyogenes</i>	101
H. TSCHÄPE: Genetic Characterization of Transferable Plasmids Presumed to be Unloaded	109
M. ACHTMAN: A Physical Analysis of Mating in <i>Escherichia coli</i>	117

W. B. DEMPSEY and N. S. WILLETS: Studies with λ Transducing Phages Bearing Antibiotic Resistance Genes from the Plasmid R100	127
N. WILLETS and S. MCINTIRE: λ <i>Tra</i> Transducing Phages	131
H. J. BURKARDT, A. PÜHLER and W. HEUMANN: Physical Mapping and Molecular Relationship of the R Factors RP1, RP4 and RP8	141
A. PÜHLER and G. KRAUSS: Transposition of the Ampicillin Resistance Gene from the RP4 Factor to the Bacteriophage P1 and to the <i>Escherichia coli</i> Fertility Factor	151
F. SCHÖFFL, A. PÜHLER and W. HEUMANN: Identification and Characterization of a New Resistance Transfer Factor Isolated from <i>Escherichia coli</i>	161
V. KRČMÉRY, F. VÝMOLA, H. HUŠTAVOVÁ, M. TROJANOVÁ and S. MITSUHASHI: Transfer of Gentamicin-Tobramycin Resistance and of Hemolytic Toxin Production from Lysogenic, Hospital Strains of <i>Pseudomonas aeruginosa</i> in Mixed Cultures and by Transduction	171
M. YOSHIKAWA, H. YOSHIMOTO, M. SOTOMURA, N. TAMAKATSU and Y. YOSHIDA: Plasmid-Chromosome Interaction in Hfr Strains	177
Y. TERAWAKI, N. GOTO and R. NAKAYA: Control of the Replication of an R Plasmid Rts1	185
N. GOTO, Y. TERAWAKI and R. NAKAYA: Hybrid R Plasmids between Temperature-Sensitive Rts1 and a Transfer-Deficient Derivative of NR1: Integrative Suppression of the Temperature-Sensitive Replication of Rts1	191
D. NOACK, U. TAUBENECK, M. ROTH and M. ZIPPEL: Plasmids in Streptomyces	199
E. VELTKAMP and H. J. NIJKAMP: Genetical and Biochemical Aspects of Replication of the Bacteriocinogenic Plasmid Clo DF 13	203
P. M. ANDREOLI, R. N. H. KONINGS and H. J. NIJKAMP: In vivo and in vitro Synthesized Gene Products of the Bacteriocinogenic Plasmid Clo DF 13	213
J. ŠMARDÁ: The Action of Colicins in other Cells than Rod-Shaped Enteric Bacteria	225

III. Molecular Biology of Plasmids

(Chairmen: R. ROWND and H. HASHIMOTO)

A) Replication of DNA

E. R. APPELBAUM, D. P. TAYLOR, N. GOTO, J. GREENBERG and R. H. ROWND: Dissociation and Replication of Segments of a Composite R Plasmid in <i>Proteus mirabilis</i> and <i>Escherichia coli</i>	235
R. L. WARREN, D. D. WOMBLE, N. TANAKA, C. R. BARTON, S. SCALLON, J. H. CRAMER and R. H. ROWND: Replication of R Plasmid DNA in <i>Proteus mirabilis</i>	253
R. J. SHEEHY, W. CLARK and E. R. ARCHIBOLD: A Technique for the Analysis of Non-Replicating and Replicating Forms of R6K Plasmid DNA in <i>Escherichia coli</i> : Relationship to the Folded Chromosome	265
Y. IKE, H. HASHIMOTO and S. MITSUHASHI: Various Types of Mutant R Plasmids that Specify Hypersynthesis of β -Lactamase	277
DON B. CLEWELL and Y. YAGI: Recombination Sequences and the Amplification of the Tetracycline-Resistance Determinant in Plasmid pMx1 of <i>Streptococcus faecalis</i>	285
W. GOEBEL, G. LUIBRAND and H. MAYER: Generation of Small Ampicillin-Resistant Plasmids (Rsc) and their Mode of Replication	293
R. NOVICK: Relaxation Complexes Affecting Plasmids in <i>Staphylococcus aureus</i> Encoding Streptomycin and Chloramphenicol Resistance	303
G. NAHLER and G. HÖGENAUER: In vitro Translation of R-factor DNA	317

B) Mechanism of Resistance to Antibiotics

T. SAWAI, I. TAKAHASHI and S. YAMAGISHI: Oxacillin-Hydrolyzing Penicillinase of <i>Aeromonas hydrophyla</i>	325
S. YAMAGISHI, T. YAMAMOTO and T. SAWAI: Anion Effect on Oxacillin-Hydrolyzing Penicillinase of an R Plasmid	331
T. YOKOTA and S. KUWAHARA: Adenosine 3', 5'-Cyclic Monophosphate-Dependent and Independent Production of Chloramphenicol Acetyltransferase in <i>Escherichia coli</i> Carrying R plasmids	339
T. YOKOTA and T. YAMAMOTO: β -Lactamase-Directed Barrier of <i>Escherichia coli</i> Carrying R Plasmids for Penicillins and Cephalosporins	345
F. ROZGONYI, J. KISS, G. LÉVAI, P. BIACS and L. VÁCZI: Phenotypic Expression of Methicillin Resistance in <i>Staphylococcus aureus</i>	353
F. LE GOFFIC, N. MOREAU, S. ROLLAND and C. CERCEAU: Resistance of <i>Haemophilus</i> to Aminoglycoside Antibiotics	361
H. KAWABE, H. UMEZAWA, S. IYOBE and S. MITSUHASHI: Mechanism of R-Mediated Streptomycin Resistance in <i>Pseudomonas aeruginosa</i>	365

IV. Plasmid Engineering

(Chairman: R. CURTISS III.)

R. CURTISS, J. E. CLARK, R. GOLDSCHMIDT, JEMIN CH. HSU, S. C. HULL, M. INOUE, L. J. MATURIN, R. MOODY and D. A. PEREIA: Biohazard Assessment of Recombinant DNA Molecule Research	375
E. GARFIELD and M. E. LEDERBERG: Is the Current System of Scientific Communication Adequate to the Age of Plasmid Engineering?	389
J. R. MYLROIE, D. A. FRIELLO and A. M. CHAKRABARTY: Transformation of <i>Pseudomonas putida</i> with Antibiotic-Resistance and Degradative Plasmid DNA	395
P. BRODA, S. BAYLEY, C. J. DUGGLEBY, M. J. WORSEY and P. A. WILLIAMS: Plasmid-coded Degradation of Toluene and Xylenes in Soil <i>Pseudomonas</i>	403
J. MANIS and B. C. KLINE: In vitro Rearrangement and Deletion of Plasmid DNA Sequences: the Isolation and Partial Characterization of a Novel F-Controlled Plasmid Cloning Vehicle	407
K. TIMMIS, F. CABELLO and S. N. COHEN: Properties and Regulation of DNA Replication Origins and Associated Functions in Multi-Origin Replicons	417

V. Medical Aspects of Plasmids

(Chairmen: S. MITSUHASHI and S. M. NAVASHIN)

S. M. NAVASHIN, I. P. FOMINA: Medical Aspects of Antibiotic Resistance	427
H. KNOTHE, M. KETTNER and V. KRČMÉRY: R Plasmids in <i>Providencia</i> and <i>Proteus rettgeri</i> Strains from Frankfurt University Hospital	435
Y. SAKAMOTO, K. YAMAMOTO, T. IJIMA, S. IYOBE and S. MITSUHASHI: A Phage Typing of <i>Pseudomonas aeruginosa</i>	441
V. G. LÁSZLO: Studies on R Factors in <i>Salmonella typhi</i> Strains	449
H. MILCH: Bacteriophage Restriction by R Factors in <i>E. coli</i> of Human and Animal Origin	453
V. S. ZUEVA: Appearance of Drug Resistant Variants of <i>Staphylococci</i> in the Process of their Genetic Exchange in Natural Conditions	461
P. BRODA, J. CULLUM and J. F. COLLINE: Plasmid Spread through <i>Escherichia coli</i> Populations	469
E. J. PEREA, R. M. DAZA, V. BOROBIO, I. ANDRES and J. M. ORTIZ: Characterization of an R Factor to Fosfomycin	473
