

Contents

Theory and Practice in Parallel Job Scheduling	1
Dror G. Feitelson, Larry Rudolph, Uwe Schwiegelshohn, Kenneth C. Sevcik, and Parkson Wong	
Using Queue Time Predictions for Processor Allocation	35
Allen B. Downey	
A Historical Application Profiler for Use by Parallel Schedulers	58
Richard Gibbons	
Memory Usage in the LANL CM-5 Workload	78
Dror G. Feitelson	
Modeling of Workload in MPPs	95
Joefon Jann, Pratap Pattnaik, Hubertus Franke, Fang Wang, Joseph Skovira, and Joseph Riordan	
PSched: Political Scheduling on the CRAY T3E	117
Richard N. Lagerstrom and Stephan K. Gipp	
An Experimental Evaluation of Processor Pool-Based Scheduling for Shared-Memory NUMA Multiprocessors	139
Timothy B. Brecht	
Implementing Multiprocessor Scheduling Disciplines	166
Eric W. Parsons and Kenneth C. Sevcik	
Objective-Oriented Algorithm for Job Scheduling in Parallel Heterogeneous Systems	193
Pham Hong Hanh and Valery Simonenko	
Implications of I/O for Gang Scheduled Workloads	215
Walter Lee, Matthew Frank, Victor Lee, Kenneth Mackenzie, and Larry Rudolph	
Improved Utilization and Responsiveness with Gang Scheduling	238
Dror G. Feitelson and Morris A. Jette	
Global State Detection Using Network Preemption	262
Atsushi Hori, Hiroshi Tezuka, and Yutaka Ishikawa	
Performance Evaluation of Gang Scheduling for Parallel and Distributed Multiprogramming	277
Fang Wang, Marios Papaefthymiou, and Mark Squillante	
Author Index	299
