Introduction	1
---------------------------	---

Part I On Cities and Urbanism

1. Cities as Concepts	9
1.1 Cities Have Been with Us for over 5000 Years	9
1.2 The Aristotelian City	10
1.3 The City of Wittgenstein	11
1.4 The City as a (Pattern) Language	12
1.5 The Prototypicality of Core Cities	13
1.6 The Ideal-Type City of Max Weber	14
1.7 IRN Cities	15
2. Prototype Urbanisms	17
2.1 The Ecocity	17
2.1.1 Eco-nomic Cities	17
2.1.2 Eco-logical Cities	24
2.1.3 Their Common Origin	27
2.2 Sir Isaac Newton's Cities	27
2.3 Chicago	28
2.4 Monstrosity	30
2.5 Taming Megalopolis	30
2.6 Plan the Beast	31
2.6.1 The Disillusionment, or the First Planning Dilemma ..	32
2.7 The City of (In)Justice	34
2.8 The Humanistic City of Everyday Life	36
2.8.1 The City of Daily Routines	36
2.8.2 The Cognitive City in the Head	37
2.8.3 The Humanistic City	37
2.9 The Marx(ist) City	39
2.10 De-Visualized Cities	41
2.11 The Split	42
2.12 The Second Planning Dilemma	42

2.13	The Postmodern City	44
2.14	Los Angeles	45
2.15	The Hypermodern Self-Organizing City	45
3.	Self-Organizing Cities	49
3.1	A Concise Introduction to Self-Organization	49
3.2	Dissipative Cities	51
3.3	Synergetic Cities	54
3.3.1	The Laser Paradigm	54
3.3.2	The Paradigm of Pattern Formation	57
3.3.3	The Paradigm of Pattern Recognition	58
3.3.4	Slow Cities and Fast Regions	60
3.3.5	Pattern Formation and Pattern Recognition in the City	62
3.4	Chaotic Cities	63
3.5	Fractal Cities	65
3.6	Cellular Automata Cities	66
3.7	Sandpile Cities	68
3.8	FACS and IRN Cities	70

Part II City Games

4.	Free Agents in a Cellular Space	75
4.1	Free Agents	75
4.1.1	Between Atoms and Free Agents	76
4.1.2	Intentionality, Hermeneutics and Memory	77
4.1.3	Internal and External Information	77
4.2	In-Formation	78
4.2.1	Between the Local and the Global	78
4.3	Self-Organization with Free Agents	79
4.3.1	Stratigraphic Change	81
4.3.2	Furcative Change	82
4.3.3	Hermeneutic Change	84
4.4	Free Agents in a Cellular Space (FACS)	85
4.4.1	Cellular Automata	85
4.4.2	City	85
4.4.3	City-1	86
4.4.4	City-2	88
4.4.5	City-3	89
4.4.6	City-4 and City-5	90
4.4.7	Modeling Groups Internal Complexity	91
4.5	Urban Games with FACS	92

5. City: The Greens and the Blues	95
5.1 Introduction	95
5.2 City: A Heuristic Model	96
5.3 City: A Formal Description of the Cellular-Automata Model	97
5.3.1 Internal Migrations	98
5.3.2 Occupation by Immigrants: Rules $F_{t+2/3}$	102
5.4 The Properties of the Model	102
5.4.1 Self-Organization	103
5.4.2 A Probabilistic CA Model	103
5.4.3 A Genuinely Spatial Model	104
5.4.4 A Heuristic Model	104
5.4.5 Between the Local and the Global	104
5.5 Three Heuristic Games	105
5.5.1 Game 1: Segregative Blues Versus Segregative Greens	105
5.5.2 Game 2: Neutral and Segregative Greens Versus Segregative Blues	106
5.5.3 Game 3: Neutral and Segregative Blues Versus Neutral and Segregative Greens	107
5.6 Intention Versus Behavior in a City	109
5.6.1 Intention Versus Behavior in Games 1, 2 and 3	109
5.7 Stability and Instability in the City	112
5.7.1 Predictability Versus Unpredictability	113
5.7.2 Local Versus Global Stability and Instability	113
5.7.3 Stability Versus Instability in Games 1, 2 and 3	113
5.8 The Captivity Principle	116
5.9 Conclusions	120
6. International Migration and the Internal Structure of Cities	121
6.1 Introduction	121
6.2 City-1: An Heuristic Immigration Absorption Model	121
6.2.1 A Formal Description of City-1	121
6.2.2 Some Properties of City-1	128
6.3 Selected Results	129
6.3.1 Stability of the Socio-spatial Structure of the City in Face of Massive Waves of International Migration	130
6.3.2 Competing Order Parameters in a Self-Organizing City	134
6.4 Concluding Notes	139
7. Spatial Cognitive Dissonance and Socio-spatial Emergence in a Self-Organizing City	141
7.1 Introduction	141
7.2 Intention Versus Behavior	142

7.2.1	Classical Social Theory	143
7.2.2	Self-Organization Theory	143
7.2.3	Cognitive Dissonance	144
7.3	The Model	147
7.3.1	Preliminaries	147
7.3.2	Spatial Cognitive Dissonance and Its Implications	149
7.3.3	In the Queue	153
7.3.4	Further Structural Changes in the City.....	153
7.3.5	Socio-spatial Emergence	154
7.3.6	City-2 as a Heuristic-Hermeneutic Model.....	155
7.3.7	The Interpretation Screen	155
7.4	Results and Interpretations	157
7.4.1	Spatial Dialectics	160
7.4.2	Internal Versus External Spatial Information and Cultural Emergence	164
7.4.3	City-3: Human Agents Between the Local and the Global.....	168
7.5	Conclusions.....	172
8.	Individuals' Cultural Code and Residential Self-Organization in the City	175
8.1	Introduction	175
8.2	The Memetic Code	176
8.3	The Model	178
8.3.1	The Definition of the m-Code	178
8.3.2	Cultural Groups.....	179
8.3.3	Model Dynamics: Trade Off Between Migration and Individual's Change	180
8.4	Results.....	182
8.4.1	Parameter Value and Initial Conditions	183
8.4.2	Presentation of the City Patterns.....	183
8.4.3	Model Dynamics for Low-Dimensional Cultural Identity: $K = 1$ and $K = 2$	184
8.4.4	Model Dynamics for High-Dimensional Cultural Identity: $K = 5$	186
8.5	Concluding Notes	188
9.	From CA- to GIS-City.....	191
9.1	Introduction	191
9.2	The GIS (Geographical Information System)-City	191
9.3	Model Description	192
9.4	Preliminary Results.....	195
9.4.1	Scenario A: A City with No Internal Boundaries.....	197
9.4.2	Scenario B: City of Quarters, with the Roads as Internal Boundaries.....	197

10. Internal Complexity and Socio-spatial Segregation of Groups in a Self-Organizing City	201
10.1 Introduction	201
10.1.1 Hierarchical and Non-hierarchical Cultural Groups	201
10.1.2 Cultural Generative Orders	203
10.1.3 Aims	203
10.2 The City-6 Model	204
10.2.1 The Cellular Space	204
10.2.2 The Agents	206
10.2.3 Decision-Making	207
10.2.4 The Q-Analysis Device	209
10.3 Game 1: Forms of Unintended Consequences	209
10.3.1 Initial Conditions	210
10.3.2 Results and Discussion	211
10.4 Internal Relations Between Cultural Orders	215
10.4.1 Q-analysis	216
10.4.2 Game 2: The Emergence of a Cultural Order Parameter in Self-Organization Process	216
10.4.3 Game 3: The Relations Between Cultural Levels – Synergetics and Dissonance	220

Part III Self-Organizing Planning

11. Planning the Unplannable: Self-Organization and City Planning	225
11.1 Introduction	225
11.1.1 The First Planning Dilemma	225
11.1.2 The Second Planning Dilemma	226
11.1.3 The Third Planning Dilemma	228
11.2 The Planning Dilemma of Self-Organizing Cities	229
11.3 In Search of a New Planning Approach	231
11.3.1 Just-in-Time Versus Just-in-Case	231
11.3.2 A City Is Not a Tree; Nor Is It an Aristotelian Category	232
11.3.3 Push Planning	235
11.3.4 The Food-Market of New York City	236
11.4 Preliminary Principles for a Self-Organizing Planning	237
11.4.1 Parallel Distributed Planning (“PDP”) in a Self-Organizing City	237
11.4.2 Decision Making Agents as Self-Organizing Systems	239
11.4.3 Self-Organization in Private and Collective Planning	240
11.4.4 Planning Synergetic Cities	242
11.4.5 Plans as Patterns of Routinized Activities	242

11.4.6	Enslavement to, and Emergence of, a City's Order-Parameter Plans	243
11.4.7	Between Fast Local Plans and Slow Global Plans	243
11.5	Planning the Ideology of the Unplannable	244
11.5.1	Planning the Ideology of Planning	244
11.5.2	Planning Is an Ideological False Consciousness	245
11.5.3	Planning Between Nationalism and Urbanism	246
11.6	SOCity: A Virtual Self-Planned City	247
11.6.1	SOCity	247
11.6.2	A Concluding Note	250
12.	Artificial Planning Experience	251
12.1	Introduction	251
12.2	Planning by Means of Artificial Experience (AE)	251
12.3	The Planning Game	253
12.3.1	An Example	255
12.4	Conclusions	258
Part IV Synergetic Cities		
13.	Synergetic Cities I: The Pattern Recognition Approach ...	261
13.1	Approaches of Synergetics	261
13.2	The Pattern Recognition Approach to Cities	263
13.3	The Model	264
13.4	Linear Models	265
13.5	Nonlinear Models	268
13.6	Another Origin of the Saturation of Attention	273
13.7	Concluding Remarks	274
14.	Synergetic Cities II: Pattern Recognition, Cognitive Mapping and Decision-Making	275
14.1	Introduction	275
14.2	Pattern Recognition as Decision-Making	275
14.3	An Extension Concerning Cognitive Mapping	279
14.4	Optimization	280
14.5	Mathematical Formulation	281
14.6	Discussion	287
14.7	Decision-Making Heuristics	288
14.8	SIRN (Synergetic Inter-representation Networks) and Decision-Making	292
14.8.1	Intra-personal Decision Making	295
14.8.2	Interpersonal and Collective Decision Making	295
14.9	An Outline for a SIRN Decision-Making Model	300

Part V Self-Organization and Urban Revolutions

15. Self-Organization and Urban Revolutions	305
15.1 From the Urban Revolution to La Révolution Urbaine.....	305
15.1.1 Gordon V. Childe: The Urban Revolution	306
15.1.2 A Spencerian Interpretation	307
15.1.3 The First City	309
15.1.4 Henri Lefebvre: La Révolution Urbaine.....	311
15.1.5 Manuel Castells: Network Society with its Information Megacity	314
15.1.6 The Modern, the Postmodern and the Hyper-modern City	315
15.2 Self-Organization, Social Theory and Socio-spatial Revolutions	317
15.2.1 On Punctuated Equilibria and Social Revolutions	317
15.2.2 Similarities Between Self-Organization and Social Theory	318
15.2.3 The Differences	319
15.2.4 Self-Organization, Social Theory and Urban Revolutions	320
15.3 Self-Organized Urban Revolutions	321
15.3.1 The First Urban Revolution from the Perspective of Self-Organization	322
15.3.2 A Sequence of Urban Revolutions	324
15.4 Self-Organized Urban Revolutions at the End of the Second Millennium	329
15.4.1 Cities as a Self-Organized Family Resemblance Category	329
15.4.2 Urbanism as a Generative Order Parameter.....	329
15.4.3 Two Cognitive Maps: a Territory and Its Cities Versus a City and Its Territory	331
15.4.4 From Nationalism to Urbanism: A New Urban Revolution at the Gate of the 21st Century?	332
Concluding Notes: Self-Organizing Cities at the Gate of the 21st Century	335
Bibliography	337
Index	349
