PART I

Particles and Fields

Wigner on Particles and Fields	
Annotation by Arthur S. Wightman	3
Remark on Einstein's New Formulation of the Principle of General Relativity / Eine Bemerkung zu Einsteins neuer Formulierung des allgemeinen Relativitätsprinzips	25
Calculation of the Natural Line Breadth on the Basis of Dirac's Light Theory / Berechnung der natürlichen Linienbreite auf Grund der Diracschen Lichttheorie (with V. Weisskopf)	30
On the Natural Line Breadth in the Radiation of the Harmonic Oscillator / Über die natürliche Linienbreite in der Strahlung des harmonischen Oszillators (with V. Weisskopf)	50
Relativistic Wave Equations / Relativistische Wellengleichungen	62
Group Theoretical Discussion of Relativistic Wave Equations (with V. Bargmann)	82
Do the Equations of Motion Determine the Quantum Mechanical Commutation Relations?	95
Some Remarks on the Infinite de Sitter Space	97
The Intrinsic Parity of Elementary Particles (with G. C. Wick and A. S. Wightman)	102
On Kinematic and Dynamic Laws of Symmetry	107
Conservation Laws in Classical and Quantum Physics	109
Relativistic Invariance in Quantum Mechanics	113
Relativistic Invariance of Quantum-Mechanical Equations	129
Must the Photon Mass Be Zero? Discussion of Paper by L. Bass and E. Schrödinger	146
Quantum Limitations of the Measurement of Space-Time Distances (with H. Salecker)	148
Measurement of the Curvature in a Two-Dimensional Universe	155
Geometry of Light Paths Between Two Material Bodies	156
Invariant Quantum Mechanical Equations of Motion	161
Events, Laws of Nature, and Invariance Principles	185
Classical Relativistic Mechanics of Interacting Point Particles (with H. Van Dam)	199

The Conceptual Basis and Use of the Geometric Invariance Principles (with R. M. F. Houtappel and H. Van Dam)	206
Instantaneous and Asymptotic Conservation Laws for Classical Relativistic Mechanics of Interacting Point Particles (with H. Van Dam)	244
de Sitter Space and Positive Energy (with T. O. Philips)	250
Proof of the Fermion Superselection Rule Without the Assumption of Time-Reversal Invariance (with G. C. Hegerfeldt and K. Kraus)	296
Relativistic Interaction of Classical Particles	299
Superselection Rule for Charge (with G. C. Wick and A. S. Wightman) ..	307
Summary of the Course: What I Have Learned	310
Relativistic Wave Equations Admitting Only Positive Energy	321
Invariant Theoretic Derivation of the Connection Between Momentum and Velocity (with S. M. W. Ahmad)	322
On the Relation Between Momentum and Velocity for Elementary Systems (with R. F. O'Connell)	333
Position Operators for Systems Exhibiting the Special Relativistic Relation Between Momentum and Velocity (with R. F. O'Connell) ...	335
Fifty Years of Symmetry Operators	338
The Basic Conflict Between the Concepts of General Relativity and of Quantum Mechanics	350
Is the Principle of Causality Valid? / Gilt das Kausalitätsprinzip?	351
The Role and Value of Symmetry Principles and Einstein's Contribution to Their Recognition	353
The Meaning of Symmetry	361
The Use and Ultimate Validity of Invariance Principles	366
Are Quantum Mechanics and Relativity Theory Consistent?	373
Cylindrical Group and Massless Particles (with Y. S. Kim)	380
Covariant Phase-Space Representation for Localized Light Waves (with Y. S. Kim)	385
Bibliography of Papers on Particles and Fields	391
Papers Reprinted in Volume III	391
Papers Related But Reprinted in Other Volumes of The Collected Works	395
Papers Related But Not Reprinted in The Collected Works	397

PART II

Foundations of Quantum Mechanics

Wigner on Foundations of Quantum Mechanics Annotation by Abner Shimony	401
The Measurement of Quantum Mechanical Operators / Die Messung quantenmechanischer Operatoren	415
The Probability of the Existence of a Self-Reproducing Unit	423
Quantum Mechanical Measurements (with M. Yanase)	431

Theory of Quantum Mechanical Measurement /	
Theorie der quantenmechanischen Messung	432
Comments on Professor Putnam's Comments (with H. Margenau)	440
The Problem of Measurement	442
Information Contents of Distributions (with M. M. Yanase)	452
On the Positive Semidefinite Nature of a Certain Matrix Expression (with M. M. Yanase)	461
Does Quantum Mechanics Exclude Life?	471
Reply to Professor Ageno's Letter:	
Does Quantum Mechanics Exclude Life? (with P. T. Landsberg)	474
Some Comments Concerning Measurements in Quantum Mechanics (with J. M. Jauch and M. M. Yanase)	475
Are We Machines?	483
Epistemology of Quantum Mechanics - Its Appraisal and Demands	490
On the Change of the Skew Information in the Process of Quantum Mechanical Measurements (with A. Frenkel and M. M. Yanase)	505
On Hidden Variables and Quantum Mechanical Probabilities	515
On the Observability of the Collision Matrix (with F. E. Goldrich)	524
On the Time-Energy Uncertainty Relation	538
Analysis of the Quantum Mechanical Measurement Process (with M. M. Yanase)	549
On Bub's Misunderstanding of Bell's Locality Argument (with S. Freedman)	565
The Nonrelativistic Nature of the Present Quantum Mechanical Measurement Theory	567
Bibliography of Papers on Foundations of Quantum Mechanics	573
Papers Reprinted in Volume III	573
Papers Related But Reprinted in Other Volumes of The Collected Works	575
Papers Related But Not Reprinted in The Collected Works	576
