

Table of Contents

1 The Ear

Case 1.1	18
Case 1.2	20
Case 1.3	22
Case 1.4	24
Case 1.5	26
Case 1.6	27
Case 1.7	29
Case 1.8	30
Case 1.9	38
Case 1.10	40
Case 1.11	41
Case 1.12	46
Case 1.13	49
Case 1.14	53
Case 1.15	55
Case 1.16	58

2 The Nasal Cavity and Paranasal Sinuses

Case 2.1	65
Case 2.2	68
Case 2.3	70
Case 2.4	74
Case 2.5	79
Case 2.6	82
Case 2.7	85
Case 2.8	88
Case 2.9	90
Case 2.10	94
Case 2.11	98
Case 2.12	102

3 The Larynx

Case 3.1	116
Case 3.2	120
Case 3.3	123
Case 3.4	126
Case 3.5	127

4 The Trachea

Case 4.1	134
Case 4.2	139
Case 4.3	141
Case 4.4	143
Case 4.5	148

5 The Oral Cavity

Case 5.1	157
Case 5.2	159
Case 5.3	161
Case 5.4	164
Case 5.5	167
Case 5.6	168
Case 5.7	170
Case 5.8	172
Case 5.9	175

6 The Pharynx

Case 6.1	181
Case 6.2	182
Case 6.3	184
Case 6.4	186
Case 6.5	188
Case 6.6	190
Case 6.7	191
Case 6.8	193
Case 6.9	198

Chapter/ Case	Problem	Diagnosis
1 The Ear		
Case 1.1	Alopecia pinna and forehead	Dermatophytosis 18
Case 1.2	Alopecia, erythema, edema and erosion of pinna and muzzle, submandibular lymphadenopathy	Juvenile cellulitis 20 (puppy strangles)
Case 1.3	Pruritis, papules, erythema, alopecia, excoriations, scales on ears, elbows and hocks	Sarcoptic mange 22
Case 1.4	Non-pruritic, non-antibiotic responsive pustular dermatosis, hyperkeratotic foot pads	Pemphigus foliaceus 24
Case 1.5	Crusting and ulceration of pinnae and oral mucocutaneous junctions	Vasculitis 26
Case 1.6	Bilateral pinnae crusting and necrosis	Squamous cell carcinoma 27
Case 1.7	Crusting pinnae, nose, toes	Insect bite granuloma 29
Case 1.8	Head shaking, scratching and pinnal swelling	Aural hematoma 30
Case 1.9	Seasonal alopecia and erythema – pinna, axilla, groin and interdigital spaces; recurrent yeast otitis externa	Atopy 38
Case 1.10	Pruritic, non-seasonal, recurrent yeast and bacterial otitis; trunkal pustular papillary dermatitis	Food allergy 40
Case 1.11	Recurrent otitis externa and seborrhea	Vertical ear canal stenosis 41
Case 1.12	Unilateral otitis externa	Neoplasia – ceruminous 46 gland adenoma
Case 1.13	Chronic otitis with canal obstruction	Bacterial otitis externa and media 49
Case 1.14	Chronic proliferative otitis externa, hearing loss	Proliferative otitis externa 53 and media; end stage ear
Case 1.15	Unilateral, exudative otitis externa, chronic upper respiratory disease	Ear polyp 55
Case 1.16	Head tilt, circling, bilateral otitis externa	Peripheral vestibular syndrome 58 with otitis interna, media and externa

Chapter/ Case	Problem	Diagnosis
2 The Nasal Cavity and Paranasal Sinuses		
Case 2.1	Mucocutaneous depigmentation and ulceration	Leishmaniasis 65
Case 2.2	Nasal planum ulceration	Squamous cell carcinoma 68
Case 2.3	Cat – bilateral mucopurulent discharge	Idiopathic chronic rhinosinusitis 70
Case 2.4	Dog- bilateral mucopurulent discharge	Mycotic rhinitis 74
Case 2.5	Unilateral epistaxis	Rhinosporidiosis 79
Case 2.6	Unilateral mucopurulent discharge and nasal deformity	Cryptococcosis 82
Case 2.7	Sneezing and unilateral mucoid discharge	Foreign body rhinitis 85
Case 2.8	Bilateral mucopurulent discharge, sneezing, stertorous breathing	Traumatic cleft palate 88
Case 2.9	Unilateral, blood-tinged, mucopurulent discharge and sneezing	Dental rhinitis 90
Case 2.10	Unilateral, blood-tinged mucopurulent discharge and reverse sneeze	Nasal tumor – squamous cell 94 carcinoma
Case 2.11	Intermittent epistaxis, sneezing, stridor	Nasal polyp 98
Case 2.12	Bilateral mucopurulent discharge, sneezing, stridor, dyspnea, dysphagia	Nasopharyngeal polyp 102
3 The Larynx		
Case 3.1	Voice change, progressive stridor, exercise intolerance	Laryngeal paralysis 116
Case 3.2	Recurrence of clinical signs following bilateral ventriculocordectomy for laryngeal paralysis	Laryngeal stenosis 120
Case 3.3	Stertor, stridor, exercise intolerance	Laryngeal collapse 123 (laryngeal saccule eversions, cuneiform and corniculate collapse), elongated soft palate
Case 3.4	Stertor, syncope, severe exercise intolerance	Aryepiglottic fold obstruction 126 (hypertrophy and emphysema), elongated soft palate
Case 3.5	Stridor, dysphagia and choking	Laryngeal tumor – rhabdomyoma 127 (oncocytoma)

Chapter/ Case	Problem	Diagnosis
4 The Trachea		
Case 4.1	Dry, paroxysmal, “seal bark” cough	Tracheobronchitis 134
Case 4.2	Chronic, nonproductive cough, exercise intolerance	Parasitic tracheitis (<i>Oslerus osleri</i>) 139
Case 4.3	Coughing, dyspnea	Hypoplastic trachea 141
Case 4.4	Dyspnea, exercise intolerance, cervical swelling	Tracheal trauma – disruption 143
Case 4.5	Intermittent, nonproductive, “honking” cough	Tracheal collapse 148
5 The Oral Cavity		
Case 5.1	Multiple gingival masses, halitosis	Gingival hypertrophy 157
Case 5.2	Gingival firm swelling, left hemimandible	Acanthomatous epulis 159
Case 5.3	Unilateral facial swelling (maxillary), pain	Fibrosarcoma 161
Case 5.4	Head trauma	Transverse maxillary fractures, 164 lacerated tongue, superficial contusions
Case 5.5	Excess salivation, dysphagia	Lingual squamous cell carcinoma 167
Case 5.6	Chronic sneezing associated with eating	Traumatic oronasal fistula 168
Case 5.7	Chronic bilateral nasal discharge	Traumatic oronasal fistula 170
Case 5.8	Nasal regurgitation	Congenital oronasal fistula 172 (secondary cleft palate)
Case 5.9	Anorexia, occasional sneezing, excess salivation	Stomatitis secondary to acute 175 feline calicivirus infection

Chapter/ Case	Problem	Diagnosis
6 The Pharynx		
Case 6.1	Gagging, crying, neck pain	Retropharyngeal foreign body/abscess 181
Case 6.2	Gagging, coughing	Tonsillitis 182
Case 6.3	Weight loss, dysphagia	Tonsillar squamous cell carcinoma 184
Case 6.4	Regurgitation, gagging, coughing	Focal myasthenia gravis 186
Case 6.5	Decreased appetite, halitosis	Feline lymphocytic/plasmacytic gingivitis/pharyngitis 188
Case 6.6	Stertor, nasal discharge, epistaxis	Nasopharyngeal tumor 190
Case 6.7	Regurgitation after eating	Cricopharyngeal achalasia 191
Case 6.8	Gagging, collapse, stridor	Brachycephalic syndrome 193
Case 6.9	Dysphagia, dyspnea	Pharyngeal mucocele 198
