

Contents

- 1 Preface: Monitoring the Comprehensive Nuclear-Test-Ban Treaty
B. J. Mitchell
- 3 Introduction
F. Ringdal, B. L. N. Kennett
- 7 Locating Seismic Events in the CTBT Context
B. L. N. Kennett, F. Ringdal
- 19 Location Calibration Data for CTBT Monitoring at the Prototype International Data Center
I. Bondár, X. Yang, R. G. North, C. Romney
- 35 Source Specific Station Corrections for Regional Phases at Fennoscandian Stations
X. Yang, I. Bondár, K. McLaughlin, R. North
- 59 Analysis of the IMS Location Accuracy in Northern Eurasia and North America Using Regional and Global *P_n* Travel-time Tables
RF/US Calibration Working Group/V. Ryaboy
- 79 Application of 3-D Crustal and Upper Mantle Velocity Model of North America for Location of Regional Seismic Events
V. Ryaboy, D. R. Baumgardt, P. Firbas, A. M. Dainty
- 105 Relocation of Wyoming Mine Production Blasts Using Calibration Explosions
C. A. Finn, G. D. Kraft, M. S. Sibol, R. L. Jones, M. E. Pulaski
- 117 Seismic Location Calibration of the European Arctic
E. Kremenetskaya, V. Asming, F. Ringdal
- 129 Earthquake Location Accuracies in Norway Based on a Comparison between Local and Regional Networks
E. C. Hicks, H. Bungum, F. Ringdal
- 143 A Study of Small Magnitude Seismic Events During 1961–1989 on and near the Semipalatinsk Test Site, Kazakhstan
V. I. Khalturin, T. G. Rautian, P. G. Richards

- 173 Precise Relative Location of 25-ton Chemical Explosions at Balapan Using
IMS Stations
W. S. Phillips, H. E. Hartse, L. K. Steck
- 193 On the Use of Calibration Explosions at the Former Semipalatinsk Test Site
for Compiling a Travel-time Model of the Crust and Upper Mantle
*N. N. Belyashova, V. I. Shacilov, N. N. Mikhailova, I. I. Komarov, Z. I.
Sinyova, A. V. Belyashov, M. N. Malakhova*
- 211 Improving Regional Seismic Event Location in China
L. K. Steck, A. A. Velasco, A. H. Cogbill, H. J. Patton
- 241 Seismic Event Location: Nonlinear Inversion Using a Neighbourhood
Algorithm
M. S. Sambridge, B. L. N. Kennett
- 259 Best Practice in Earthquake Location Using Broadband Three-component
Seismic Waveform Data
R. A. Uhrhammer, D. Dreger, B. Romanowicz
- 277 HYPOSAT – An Enhanced Routine to Locate Seismic Events
J. Schweitzer
- 291 Global Event Location with Full and Sparse Data Sets Using Three-
dimensional Models of Mantle *P*-wave Velocity
M. Antolik, G. Ekström, A. M. Dziewonski
- 319 Improving Seismic Event Location: An Alternative to Three-dimensional
Structural Models
C. Piromallo, A. Morelli
- 349 Robust Bearing Estimation for Three-component Stations
J. P. Claassen
- 375 Slowness Corrections – One Way to Improve IDC Products
J. Schweitzer
- 397 Definition of Exclusion Zones Using Seismic Data
Y. Bartal, M. Villagran, Y. Ben Horin, G. Leonard, M. Joswig
