Introduction IX

Part I: Foundations

Mobile Computation (*Luca Cardelli*) 3

Objectworld (*Denis Tsichritzis*) 7

Commentary on “Objectworld” (*Denis Tsichritzis*) 23

Mobile Agents: Are They a Good Idea? (*David Chess, Colin Harrison and Aaron Kershenbaum*) 25

Update (*David Chess, Colin Harrison and Aaron Kershenbaum*) 46

A Note on Distributed Computing (*Jim Waldo, Geoff Wyant, Ann Wollrath and Sam Kendall*) 49

Afterword (*Jim Waldo, Ann Wollrath and Sam Kendall*) 65

Instruction–Based Communications (*Christian Tschudin*) 67

Part II: Concepts

Analyzing Mobile Code Languages (*Gianpaolo Cugola, Carlo Ghezzi, Gian Pietro Picco and Giovanni Vigna*) 93

Sumatra: A Language for Resource-Aware Mobile Programs (*Anurag Acharya, M. Ranganathan and Joel Saltz*) 111

Migratory Applications (*Krishna Bharat and Luca Cardelli*) 131

The Messenger Environment MØ – A Condensed Description (*Christian Tschudin*) 149

Mobility and Persistence (*Miguel Mira da Silva*) 157

Security and Communication in Mobile Object Systems (*Jan Vitek, Manuel Serrano and Dimitri Thanos*) 177

Safe and Secure Execution Mechanisms for Mobile Objects (*Kazuhiko Kato*) 201

Jada – Coordination and Communication for Java Agents (*Paolo Ciancarini and Davide Rossi*) 213

Part III: Implementation

Performance-Oriented Implementation Strategies for a Mobile Agent Language (*Frederick Knabe*) 229

Dynamic Linking for Mobile Programs (<i>Anurag Acharya and Joel Saltz</i>) . . .	245
Adaptive Compression of Syntax Trees and Iterative Dynamic Code Optimization: Two Basic Technologies for Mobile Object Systems (<i>Michael Franz</i>)	263
A Type-Based Implementation of a Language with Distributed Scope (<i>Dominic Duggan</i>)	277
Interaction of Java and Telescript Agents (<i>Peter Dömel</i>)	295
 Appendix	
Glossary	315
List of Authors	317
