

Contents

List of Contributors	VII
1. Smooth Muscle Myosin: Molecule Conformation, Filament Assembly and Associated Regulatory Enzymes <i>A. Sobieszek</i>	1
2. Actin and Thin-Filament-Associated Proteins in Smooth Muscle <i>R. Dąbrowska</i>	31
3. Current Concepts on Mechanisms of Force Generation in Airways Smooth Muscle <i>M. A. Giembycz</i>	61
4. Phosphoinositidase C, Inositol Polyphosphates and Force Generation of Airways Smooth Muscle <i>E. R. Chilvers</i>	77
5. The Intracellular Calcium Store in Airways Smooth Muscle <i>C. H. C. Twort</i>	97
6. Current Concepts on Mechanisms of Force Maintenance in Airways Smooth Muscle <i>W. T. Gerthoffer</i>	117
7. Diglyceride, Protein Kinase C and Force Maintenance of Airways Smooth Muscle <i>J. M. Langlands, R. R. Schellenberg and H. Salari</i>	137
8. Sources of Activator Calcium for Force Generation and Maintenance of Airways Smooth Muscle <i>Y. Ito and T. Itoh</i>	153
9. G-Proteins in Airways Smooth Muscle <i>N. J. Pyne and S. Pyne</i>	187
10. Cyclic AMP and the Control of Airways Smooth Muscle Tone <i>T. J. Torphy and I. P. Hall</i>	215
11. Myosin Dephosphorylation as a Mechanism of Relaxation of Airways Smooth Muscle <i>S. Cai, G. Nowak and P. de Lanerolle</i>	233
12. Cyclic GMP and the Control of Airways Smooth Muscle Tone <i>F. Hofmann, A. Ludwig, and A. Pfeifer</i>	253
13. Cyclic Nucleotide Phosphodiesterases in Airways Smooth Muscle <i>J. E. Souness and M. A. Giembycz</i>	271

14. Modulation of Agonist-Stimulated Phosphoinositide Turnover in Airways Smooth Muscle by Cyclic Nucleotide-Dependent and Independent Mechanisms <i>R. A. J. Challiss and J. P. Boyle</i>	309
15. Airways Smooth Muscle Cells in Culture <i>I. P. Hall</i>	329
