

Contents

1. Fundamental Issues

Philosophical Foundations for Causal Networks <i>G. Shafer</i>	3
---	---

Non-Standard Probabilistic and Non Probabilistic Representations of Uncertainty <i>P. Smets</i>	13
---	----

2. Theory of Evidence

Argumentation Systems and Evidence Theory <i>J. Kohlas, H.W. Brachinger</i>	41
--	----

Algebraic Structures Related to Dempster-Shafer Theory <i>M. Daniel</i>	51
--	----

Extension of Lower Probabilities and Coherence of Belief Measures <i>Z. Wang, W. Wang</i>	62
--	----

A Note on Multi-Objective Information Measures <i>C. Padet, A. Ramer, R. Yager</i>	70
---	----

Decision Making Using Belief Functions : Evaluation of Information <i>K. Mellouli</i>	77
--	----

3. Networks

Hybrid Propagation in Junction Trees <i>A.P. David, U. Kjærulff, S.L. Lauritzen</i>	87
--	----

Heuristic Algorithms for the Triangulation of Graphs <i>A. Cano, S. Moral</i>	98
--	----

Computing Marginals from the Marginal Representation in Markov Trees <i>H. Xu</i>	108
--	-----

Representation of Bayesian Networks as Relational Databases <i>S.K.M. Wong, Y. Xiang, X. Nie</i>	117
---	-----

Decision Influence Diagrams with Fuzzy Utilities <i>M. López</i>	131
---	-----

Causal Networks and Their Toolkit in KSE <i>J. Liang, Q. Ren, Z. Xu, J. Fang</i>	139
---	-----

Approximations of Causal Networks by Polytrees: an Empirical Study <i>S. Acid, L.M. de Campos</i>	149
Evidence Propagation on Influence Diagrams and Value of Evidence <i>K.J. Ezawa</i>	159
4. Probabilistic, Statistical and Informational Methods	
Some Varieties of Qualitative Probability <i>M.P. Wellman</i>	171
The Qualitative Verification of Quantitative Uncertainty <i>S. Parsons, A. Saffiotti</i>	180
Uncertainty Management Using Probability Intervals <i>L.M. de Campos, J.F. Huete, S. Moral</i>	190
Probabilistic Consistency of Conditional Probability Bounds <i>A. Gilio</i>	200
Testing the Convenience of a Variate for Stratification in Estimating the Gini-Simpson Diversity <i>M.C. Alonso, M.A. Gil</i>	210
Fuzzy Probabilities and their Applications to Statistical Inference <i>D. Ralescu</i>	217
A Bayesian Functional Approach to Fuzzy System Representation <i>C. Georgescu, A. Afshari, G. Bornard</i>	223
Information Matrices Associated to $(h, \emptyset)$ -Divergence Measures: Applications to Testing Hypotheses <i>D. Morales, L. Pardo, M. Salicrú, M.L. Menéndez</i>	233
Informational Energy Test for Equality of Variances <i>J.A. Pardo, M.C. Pardo, M.L. Vicente, M.D. Esteban</i>	241
Compositive Information Measure of a Fuzzy Set <i>C. Bertoluzza, T. Brezmes, G. Naval</i>	248
Informational Time <i>R. Vallée</i>	255
5. Possibility Theory	
Updating, Transition Constraints and Possibilistic Markov Chains <i>D. Dubois, F. Dupin de Saint Cyr, H. Prade</i>	263
Possibilistic Logic as Interpretability Logic <i>P. Hájek</i>	273

A Numerical Framework for Possibilistic Abduction <i>J. Gebhardt, R. Kruse</i>	281
Possibility Theory and Independence <i>L. Fariñas del Cerro, A. Herzig</i>	292
Handling Hard Rules and Default Rules in Possibilistic Logic <i>S. Benferhat</i>	302
A General Possibilistic Framework for Reliability Theory <i>B. Cappelle, E.E. Kerre</i>	311
Possibilistic Semantic Nets <i>S. Sandri, G. Bittencourt</i>	318
6. Logics	
An Essay on Name and Extension of Rule-Given Properties <i>E. Trillas, S. Cubillo, A.R. de Soto</i>	329
On Non-Alethic Logic <i>C.A.A.P. Abar, M. Yamashita</i>	339
Marginal Problem in Different Calculi of AI <i>M. Studeny</i>	348
Implication Connectives for Logics with Right Weakening <i>P. Besnard, Y. Moinard</i>	360
Stochastic Logic <i>S. Guíasu</i>	370
An Approach to Handle Partially Sound Rules of Inference <i>S. Gottwald</i>	380
Using Classical Theorem-Proving Techniques for Approximate Reasoning: Revised Report <i>S. Brüning, T. Schaub</i>	389
Translation-Based Deduction Methods for Modal Logics <i>O. Gasquet, A. Herzig</i>	399
A System of Knowledge Representation Based in Formulae of Predicate Calculus whose Variables are Annotated by Expressions of A "Fuzzy" Terminological Logic <i>R.M. da Silva, A.E.C. Pereira, M.A. Netto</i>	409
Using Preference based Heuristics to Control Abductive Reasoning <i>J. Bigham</i>	418

Efficient Interpretation of Propositional Multiple-valued Logic Programs <i>G. Escalada-Imaz, F. Manyà</i>	428
Many-Valued Epistemic States: An Application to a Reflexive Architecture: Milord-II <i>L. Godo, W. van der Hoek, J.-J.C. Meyer, C. Sierra</i>	440
7. Chaos	
Acoustical Chaotic Fractal Images for Medical Imaging <i>W.S. Gan</i>	455
Chaos Causes Perspective Reversals for Ambiguous Patterns <i>K. Sakai, T. Katayama, S. Wada, H. Oiwa</i>	463
Implications of a Continuous Approach to Chaotic Modeling <i>M.E. Cohen, D.L. Hudson, M.F. Anderson, P.C. Deedwania</i>	473
"Homeostasic" Control of Imbalanced Strange Attractors with or without Asking to a Change in Chaotic Dynamics <i>E. Bernard-Weil</i>	483
8. Reusability	
A Feature-Based Reuse Library <i>S. Park, J.D. Palmer</i>	495
Managing Uncertainty in an Object Recovery Process <i>H. Gall, R. Klösch</i>	501
Juggling in Free Fall : Uncertainty Management Aspects of Domain Analysis Methods <i>M.A. Simos</i>	512
Hybrid Fuzzy Metrics for Software Reusability <i>B.J. Balentine, M.K. Zand, M.H. Samadzadeh</i>	522
A Program Tranformation System for Software Reuse <i>M. Bakhouch</i>	534
Abstract Visualization of Software. A Basis for a Complex Hash-Key ? <i>R.T. Mittermeir, L. Würfl</i>	545
9. Applications	
Retrieval of Images Using Pixel-based Objects Models <i>M. Mukunoki, M. Minoh, K. Ikeda</i>	557

Object Recognition Based on Pattern Features <i>W. Zhang, A. Ralescu</i>	567
Key-Picture Selection for the Analysis of Visual Speech with Fuzzy Methods <i>H.H. Bothe, N. von Bötticher</i>	577
Effective Scheduling of Tasks under Weak Temporal Interval Constraints <i>F.D. Anger, R.V. Rodriguez</i>	584
Introducing Contextual Information in Multisensor Tracking Algorithms <i>V. Nimier</i>	595
FAM on Gain Scheduling Control of Highly Nonlinear and Disturbed Processes <i>R. Ferreira Garcia</i>	605
How to Choose According to Partial Evaluations? <i>A. Guénoche</i>	611
The Role of Measurement Uncertainty in Numeric Law Induction <i>M. Moulet</i>	619
