

■ Table of Contents

Introduction	1
Part 1. Basics	
1.1 Getting Started	9
1.1.1 Starting and Quitting	9
1.1.2 Interrupting and Quitting	12
1.2 Help!	14
1.3 Numerical Calculations	17
1.3.1 Simple Examples	17
1.3.2 External Packages: Units	25
1.3.3 Large Numbers: The RSA Public-Key Cryptosystem	32
1.4 Symbolic Calculations	44
1.4.1 Polynomials	44
1.4.2 Equations	54
1.4.3 Calculus	66
1.5 Plots: Different Pendulums	81
1.5.1 Two-Dimensional Plots	81
1.5.2 Example: The Triple Pendulum	89
1.5.3 Three-Dimensional Graphics and Animation: A Rotating Double Pendulum	106
1.5.4 Parametric Plots: A Rotating Double Pendulum	121
1.5.5 Plotting Data: The Random Generator	130
1.6 Lists	138
1.6.1 Creating and Formatting Lists	138
1.6.2 Calculations with Lists, Pure Functions	143
1.6.3 List Manipulation: The Cross Product	148
1.6.4 Vectors, Matrices, Tensors: The Jacobian	158
1.6.5 Eigenvectors and Eigenvalues: An Oscillator	164
1.7 Graphics Programming	172
1.7.1 The Structure of Graphics	172
1.7.2 Example: Animation of the Triple Pendulum	178
1.7.3 Example: The Oscillator	184
1.8 More Selected Tools	190

1.8.1 Graphics and Sound	190
1.8.2 Complex Numbers	195
1.8.3 Sums, Products, Series	198
1.8.4 Data Analysis, Interpolation	201
1.8.5 Transformations	207
1.8.6 Mathematical Functions	213
1.8.7 Polynomials	214
1.8.8 Linear Algebra, Linear Programming	216
1.8.9 File Manipulation	217
1.8.10 Custom Configuration	219
1.8.11 Resources	222

Part 2. Structure

2.1 Expressions.....	229
2.1.1 The Structure of Expressions	229
2.1.2 Working with Parts of Expressions	231
2.2 Patterns	233
2.2.1 Simple Patterns	233
2.2.2 Restricted Patterns	237
2.2.3 More Complicated Patterns	242
2.2.4 Example: A Simple Integrator	248
2.3 Transformation Rules and Definitions	251
2.3.1 Transformation Rules	251
2.3.2 Definitions	255
2.3.3 Attributes	263
2.4 Evaluation and Tools for Programming	268
2.4.1 Standard Evaluation	268
2.4.2 Special Evaluation	271
2.4.3 Conditionals, Loops, and Control Structures	277
2.5 Modularity.....	290
2.5.1 Local Variables and Constants	290
2.5.2 Contexts and Packages	297
2.6 Strings, Text, Messages	308
2.6.1 Printing Text	308
2.6.2 Arranging Text	309
2.6.3 Built-in Formats	310
2.6.4 Formats for Numbers	313
2.6.5 Subscripts and Superscripts	315

2.6.6 Custom Formats	318
2.6.7 Strings	321
2.6.8 Messages	323

Part 3. Programming

3.1 Programming Methodologies	331
3.1.1 Procedural Programming	331
3.1.2 Recursive Programming	332
3.1.3 Functional Programming	335
3.1.4 Rule-Based Programming	336
3.1.5 Programming with Constraint-Propagation	337
3.1.6 Data Types, Object-Oriented Programming	340
3.2 Developing Programs.....	342
3.2.1 Debugging	342
3.2.2 Example: NonNegativeQ`	348
3.2.3 Example: AbsArg`	353
3.2.4 Example: RSA`	355
3.2.5 Example: Perturbation`	359
3.3 Numerics	368
3.3.1 Compiling Expressions: Fractals	368
3.3.2 Precision and Accuracy	376
3.3.3 Controlling Numerical Built-in Functions	378
3.4 Long Calculations: RSA	384
3.4.1 Primes for RSA	384
3.4.2 Saving Results in a File	386
3.4.3 External Programs, Calculations in the Background	389
References	395
Index	399
