

Table of Contents

Component Reuse and Verification

Consistency Checking for Component Reuse in Open Systems	1
<i>Peter Henderson and Matthew J. Henderson</i>	
Generating Verified Java Components through RESOLVE	11
<i>Hampton Smith, Heather Harton, David Frazier, Raghuveer Mohan, and Murali Sitaraman</i>	
Increasing Reuse in Component Models through Genericity	21
<i>Julien Bigot and Christian Pérez</i>	
Verifying Component-Based Software: Deep Mathematics or Simple Bookkeeping?	31
<i>Jason Kirschenbaum, Bruce Adcock, Derek Bronish, Hampton Smith, Heather Harton, Murali Sitaraman, and Bruce W. Weide</i>	

Feature Modeling

Extending FeaturSEB with Concepts from Systems Engineering	41
<i>John Favaro and Silvia Mazzini</i>	
Features Need Stories	51
<i>Sidney C. Bailin</i>	
An Optimization Strategy to Feature Models' Verification by Eliminating Verification-Irrelevant Features and Constraints	65
<i>Hua Yan, Wei Zhang, Haiyan Zhao, and Hong Mei</i>	
Reusable Model-Based Testing	76
<i>Erika Mir Olimpiew and Hassan Gomaa</i>	

Generators and Model-Driven Development

A Case Study of Using Domain Engineering for the Conflation Algorithms Domain	86
<i>Okan Yilmaz and William B. Frakes</i>	
Model Transformation Using Graph Transactions	95
<i>Leila Ribeiro, Luciana Foss, Bruno da Silva, and Daltro Nunes</i>	
Refactoring Feature Modules	106
<i>Martin Kuhlemann, Don Batory, and Sven Apel</i>	

Variability in Automation System Models 116
Gerd Dauenhauer, Thomas Aschauer, and Wolfgang Pree

Industry Experience

A Case Study of Variation Mechanism in an Industrial Product Line ... 126
Pengfei Ye, Xin Peng, Yinxing Xue, and Stan Jarzabek

Experience Report on Using a Domain Model-Based Extractive
Approach to Software Product Line Asset Development 137
*Hyesun Lee, Hyunsik Choi, Kyo C. Kang, Dohyung Kim, and
Zino Lee*

Reuse with Software Components - A Survey of Industrial State of
Practice 150
*Rikard Land, Daniel Sundmark, Frank Lüders, Iva Krasteva, and
Adnan Causevic*

Product Lines

Evaluating the Reusability of Product-Line Software Fault Tree
Analysis Assets for a Safety-Critical System 160
Josh Dehlinger and Robyn R. Lutz

Feature-Driven and Incremental Variability Generalization in Software
Product Line 170
Liwei Shen, Xin Peng, and Wenyun Zhao

Identifying Issues and Concerns in Software Reuse in Software Product
Lines 181
Meena Jha and Liam O'Brien

Reuse of Architectural Knowledge in SPL Development 191
Pedro O. Rossel, Daniel Perovich, and María Cecilia Bastarrica

Reuse and Patterns

Introducing Motivations in Design Pattern Representation 201
Luca Sabatucci, Massimo Cossentino, and Angelo Susi

The Managed Adapter Pattern: Facilitating Glue Code Generation for
Component Reuse 211
Oliver Hummel and Colin Atkinson

Reusing Patterns through Design Refinement 225
Jason O. Hallstrom and Neelam Soundarajan

Service-Oriented Environments

Building Service-Oriented User Agents Using a Software Product Line Approach	236
<i>Ingrid Nunes, Carlos J.P. de Lucena, Donald Cowan, and Paulo Alencar</i>	
DAREonline: A Web-Based Domain Engineering Tool	246
<i>Raimundo F. Dos Santos and William B. Frakes</i>	
Extending a Software Component Repository to Provide Services	258
<i>Anderson Marinho, Leonardo Murta, and Cláudia Werner</i>	
A Negotiation Framework for Service-Oriented Product Line Development	269
<i>Jaejoon Lee, Gerald Kotonya, and Daniel Robinson</i>	
Ranking and Selecting Services	278
<i>Alberto Sillitti and Giancarlo Succi</i>	
A Reusable Model for Data-Centric Web Services	288
<i>Iman Saleh, Gregory Kulczycki, and M. Brian Blake</i>	
Author Index	299
