

CONTENTS

Preface	1
PART ONE - FOOD HABITS AND CONSUMPTION	3
1 Introduction	5
2 Introduction to food habits and food consumption patterns	7
2.1 What is food ?	7
2.2 Social functions of food in society	8
2.3 Gastronomic function	8
2.4 Means of cultural identity	9
2.5 Religious or magic function	9
2.6 Food as means of communication	10
2.7 Food as an expression of economic status	10
2.8 Means to exercise influence and power	10
3 Food habits and ecology	11
3.1 Ecology of food	11
3.2 Dairy foods and ecology	13
4 Dynamics of food habits	15
4.1 Changes in food habits	15
4.2 Acceptance of new foods	17
5 Orientation from food subsistence farming to cash-crop farming	19
5.1 Cash crops and food crops	19
5.2 Gender issues and food production	20
5.3 Scarcity of fuel for cooking	21
6 Food habits and urbanization	23
6.1 Urbanization	23
6.2 Urban influences on food habits in rural areas	24
6.2.1 Migration and rural nutrition	24
6.2.2 Urban markets and food production	25
6.2.3 Spread of urban food habits into rural areas	26
6.3 Changing urban food habits	26

6.4	Food habits of socio-economic classes	28
6.4.1	The main urban classes	28
6.4.2	Rural classes	29
6.4.3	Income	30
6.4.4	Household size	30
6.5	Street foods and urban agriculture	31
7	Food distribution in the household and infant feeding	33
7.1	Food distribution	33
7.2	Food avoidances	34
7.3	Fasting and feasting	36
7.4	Infant feeding	37
8	Food shortages and adaptation of food habits	41
8.1	Seasonality	41
8.2	Adjustment of food habits compelled by necessity	41
8.3	Adjustment of food habits as a coping strategy	43
8.4	Food shortages of a chronic nature	45
8.5	Women and food shortages	46
9	Nutrition policy and programmes	47
PART TWO - FIELD STUDIES		49
10	Some notes on field studies	51
10.1	Food habits and food consumption surveys, an outline of steps involved	51
10.2	Sampling of the population	53
10.3	Methods of collecting data	54
10.4	Fieldwork	56
10.5	Actual fieldwork	56
11	Food ethnography	59
11.1	Aim of a food ethnography	59
11.2	Methodology	60
11.3	Measuring trend: a three-generation study	62
11.4	Time allocation survey	63
12	Measurement of food consumption	67
12.1	Food balance sheets	67
12.2	Budgetary and household food consumption surveys	68
12.2.1	Budgetary surveys of families	69
12.2.2	Methods used to ascertain food consumption of the household	69

12.3	Individual dietary survey	71
12.3.1	Recall of past intakes of individuals	71
12.3.2	Recording of present food intake	72
12.3.3	Short-cut methods	73
12.3.4	Combinations of methods	74
12.4	Validity and reproducibility of the methods	74
12.4.1	The purpose of the study and the validity of the method	74
12.4.2	Random versus systematic error	77
12.4.3	Subject-associated bias	79
12.5	Conclusion	79
13	Conversion of amounts of foods into nutrients and evaluation of results	81
13.1	Using food analysis	81
13.1.1	Analysis of duplicate portions	81
13.1.2	Analysis of aliquots	81
13.1.3	Equivalent composite technique	82
13.2	Using food composition tables and nutrient data bases	82
13.2.1	Foods	82
13.2.2	Nutrients	83
13.2.3	Conclusion regarding food composition tables	83
13.3	Evaluation of dietary intakes	83
14	Reporting data	85
14.1	Presentation of numeric data on food habits	85
14.2	Working out trends	85
14.3	Putting the report together	87
A	Appendices	
A	Items of observational data on food ethnography	89
B	Example of a food ethnography questionnaire	95
C	Presentation of data on food ethnography	117
D	Questionnaire on food consumption of an individual	131
E	Examples of calculation of nutrient intakes	137
