

Contents

1	Introduction	1
1.1	What Animal Behaviour is and Why it is Important.	2
1.2	Levels of Behavioural Analysis	4
1.3	Anthropomorphism	7
	References	7
2	General Principles	9
2.1	Preliminary Considerations, Scientific Methodology, and Transparency	10
2.2	Research Questions, Hypotheses and Predictions.	12
2.3	Selection of the Study Species	14
2.3.1	Domesticated Animals.	15
2.4	Laboratory Tests and Field Work.	17
2.5	Scheduling a Research Project	19
2.6	Marking of Animals for Individual Identification	20
2.6.1	Marking Methods	20
2.6.2	Naming of Animals	25
2.7	Animal Husbandry	25
2.8	Ethical Aspects of Working with Animals	26
2.8.1	Animal Welfare.	27
	References	28
3	Experimental Planning and Experimental Design	31
3.1	Descriptive and Experimental Research	32
3.1.1	Preliminary Observations and Pilot Studies	32
3.1.2	Descriptive Data Recording	34
3.2	Planning of Experiments: Experimental Groups and Data Structure	35
3.2.1	Controls	36
3.2.2	Data Recording Structure	37
3.2.3	Order Effects	41
3.3	Sampling	44
3.4	Individual Differences	45
3.5	Replication and Pseudoreplication	47
3.5.1	Replication.	47
3.5.2	Pseudoreplication	48
3.6	Internal and External Validity	49
3.6.1	Precision and Reliability	50
	References	51
4	Quantification of Behavioural Processes	53
4.1	Selection and Definition of Behaviour	54
4.2	Categorizations of Behaviour	55
4.3	Defining Behavioural Bouts	56

4.4	Time Parameters of Behaviour	56
4.4.1	Latencies	57
4.4.2	Durations	58
4.4.3	Frequencies and Rates	59
4.5	Recording Rules	60
4.5.1	Continuous Data Recording	60
4.5.2	Interval Structured Recording (Time Sampling)	60
4.6	Sampling Rules	63
4.6.1	Ad Libitum Registration	64
4.6.2	Scan Sampling and Behaviour Sampling	64
4.6.3	Focal Animal Sampling	64
	References	65
5	Research Biases	67
5.1	Sampling Biases	68
5.2	Observer Biases	71
5.2.1	Experimenter Bias	71
5.2.2	Expectation Bias	72
5.2.3	Clever Hans Effect	73
	References	75
6	Tools for Measuring Behaviour	77
6.1	Video Recording, Video Playback and Photos	80
6.2	Recording, Analysis and Playback of Acoustic Data (Bioacoustics)	81
6.3	Animal Movement Tracking	84
	References	87
7	Data Analysis and Presentation	91
7.1	Statistical Data Analysis	92
7.1.1	Descriptive Statistics	92
7.1.2	Inferential Statistics	95
7.2	Presentation of Scientific Results	99
7.2.1	Oral presentations	99
7.2.2	Making Scientific Posters	101
7.2.3	Writing Scientific Texts	102
7.3	Literature Search	104
	References	105
