<i>Preface</i>	<i>vii</i>
1 Introduction	1
1.1 Starting <i>Mathematica</i>	1
1.2 Calculating with numbers	3
1.3 Calculating with real numbers and functions	6
1.4 Calculating with complex numbers and functions	6
1.5 Problems	11
2 Term transformations	12
2.1 Calculating with symbols	12
2.2 Calculating with rational integral terms	14
2.3 Calculating with fractions (rational expressions)	18
2.4 Problems	20
3 Lists, tables and functions	21
3.1 Lists	21
3.2 Tables	23
3.3 Functions	24
3.4 Problems	26
4 Solution of equations	27
4.1 Solution of rational integral equations	27
4.2 Equations with square roots and absolute values	31
4.3 Trigonometric equations	33
4.4 Problems	37
5 Linear algebra and sets of equations	38
5.1 Description of matrices and vectors	38
5.2 Transformation matrices	40
5.3 Calculating with vectors	43
5.4 Solution of systems of equations	44
5.5 Problems	47
6 Graphics	48
6.1 2D graphics	48
6.2 3D graphics	55
6.3 Problems	62

7	Analysis	63
7.1	Derivatives	63
7.2	Integrals	66
7.3	Limits, series and products	68
7.4	Differential equations	71
7.5	Problems	74
8	Simple programs	76
8.1	Rule-based programs	76
8.2	Altering commands	78
8.3	Procedural programs	79
	Appendix A Installation on PCs	82
A.1	Installation under MS-DOS	82
A.2	Installation under MS-Windows	85
	Appendix B List of commands	87
	Appendix C Solutions	94
C.1	Solutions to Chapter 1	94
C.2	Solutions to Chapter 2	94
C.3	Solutions to Chapter 3	95
C.4	Solutions to Chapter 4	95
C.5	Solutions to Chapter 5	95
C.6	Solutions to Chapter 6	96
C.7	Solutions to Chapter 7	96
	<i>References</i>	<i>97</i>
	<i>Index</i>	<i>98</i>
